SCOPE

This specification covers the general requirements for the design, fabrication, materials and inspection and testing of unfired pressure vessels. Protection of equipment both during transit and on City University site is covered by City University Specification No PE1, Issue No 3.
RESPONSIBILITIES

The purchaser shall be responsible for supplying the manufacturer with the following information.

A specification of the normal working conditions of the vessel together with details of any adverse conditions in which the vessel is required to operate.

Outline drawings of the vessel showing overall dimensions, nozzle orientation, sizes and agitator details.

The name of the notified Body.

Any special statutory regulations with which the finished vessel is required to comply.

Responsibilities of the Purchaser (City University) shall be responsible for furnishing
