MODULE SUMMARY

Module outline and aims

This module will give you access to current issues in research on Developmental Language Impairment (DLI), and provide you with opportunities to reflect on research methods and findings and to explore the implications for individual clinical cases.

The module will:

- Extend your knowledge of current research in the field of Developmental Language Impairment.
- Develop your insights into relations between current research and clinical/educational practice in the field of DLI.
- Enhance your ability to apply your knowledge and understanding to work with children with DLI.

Content outline

Topics will include:

- The identification, nature and origins of DLI
- Social disadvantage, language development and DLI
- Language impairments across developmental disorders
- Single-word processing focusing on lexical phonology
- Pragmatic/social communication skills and the role of social cognition
- Speech processing and intervention
- Intervention with preschool children
- Intervention with school-age children
WHAT WILL I BE EXPECTED TO ACHIEVE?

On successful completion of this module, you will be expected to be able to:

Knowledge and understanding:

- Demonstrate knowledge and understanding of current theoretical explanations and research methods in language development and DLI.
- Demonstrate familiarity with research findings relevant to your area of work and/or interests.

Skills:

- Present issues, evidence and conclusions clearly, concisely and coherently in verbal and written presentation.
- Describe and justify your selection of methods and stimuli for targeting relevant aspects of speech, language and communication in a child or client group, in assessment and intervention.
- Critically evaluate and synthesise relevant research from a range of sources.

Values and attitudes:

- Demonstrate sensitivity to issues of human diversity including culture, ethnicity and disability and act accordingly.
- Show an insight into and respect for the experience of service users and participants in research.

HOW WILL I LEARN?

The module will combine lectures with student-led discussions based on prior reading and experience.

Teaching pattern:

WHAT TYPES OF ASSESSMENT AND FEEDBACK CAN I EXPECT?

Assessments

You will be assessed through an oral presentation of an assessment and/or intervention for an individual child or a client group motivated by relevant research covered in the module, and a written review of the relevant literature.

Assessment pattern:

<table>

Assessment criteria

Assessment Criteria are descriptions of the skills, knowledge or attributes students need to demonstrate in order to complete an assessment successfully and Grade-Related Criteria are descriptions of the skills, knowledge or attributes students need to demonstrate to achieve a certain grade or mark in an assessment. Information on the above module assessment criteria and grade-related criteria can be found on the module space in Moodle.

Feedback on assessment

Following an assessment, students will be given their marks and feedback in line with the Assessment Regulations and Policy. More information on the timing and type of feedback that will be provided for each assessment will be available from the module leader.

Assessment Regulations

The Pass mark for the module is 50%. The two components of the assessment are weighted equally. The Programme Specification contains information on what happens if you fail an assessment.

INDICATIVE READING LIST

Version: 2.0
Version date: June 2014
For Use from: September 2014
