Global Citizenship Summer School 2012***
www.city.ac.uk/arts/global-citizenship

Programme Dates:

Pre-arrival preparatory reading: 25 June – 7 July 2012 (all readings will be available to registered students on the course website)

In-residence London/Utrecht: 8 July – 10 August 2012

Programme requires a total of seven weeks of academic work – with five of those weeks being in residence.

The Global Citizenship Summer School is a seven week programme of study, five of which are spent in residence in London, England and Utrecht, the Netherlands. This innovative programme provides an ideal opportunity for students to develop global perspectives and intercultural competencies that are an increasingly necessary prerequisite for success in the global market place. Through this programme students have the opportunity to work with a diverse cohort of students on a number of interdisciplinary projects, develop a broader understanding of contemporary issues of global significance, and explore the meanings of citizenship and civic engagement within the context of a globalization. Upon successful completion of the programme, students will receive a total of 12.5 ECTS points and transcripts from both City University London and the University of Utrecht.

Students will spend the first half of the programme completing the London module. In this module they will explore a number of contemporary global issues, examine what it means to be a global citizen, and consider how globalisation and the global nature of our contemporary world have changed the responsibilities of citizens.

Following the London portion of the programme, students will travel to Utrecht where they will complete a second two week module that focuses on global citizenship from a specifically European perspective. In Utrecht students will consider what European integration and the EU can teach us about the possibilities of transnational forms of citizenship and identity. The curriculum in Utrecht will be based on an analysis of diverse forms of communication including new and digital media, museums, film and television. Students will spend the last week of the program in Utrecht engaged in independent study while they complete their final papers and projects.

This course is open to students from universities all over the world and from all disciplines. The summer school is an intensive academic programme during which students will be introduced to a wide variety of global issues and will be asked to engage with what it means to be a global citizen on many different levels. Both the London and Utrecht portions of the course are highly interactive and students are

*Please note: Some details in syllabus are subject to change

expected to participate in discussions, debates, and presentations. While the London and Utrecht portions of the course are thematically linked, students should expect that the teaching styles and format of the course in the two universities will be quite different and are reflective of the different university practices in the UK and the Netherlands.
