Wireless Network Connection Instructions – Blackberry

1. From the standby screen, press the BlackBerry button to open the main menu.
2. Select Manage Connections (the radio aerial icon).
3. From the menu that appears select Set Up Wi-Fi Network.
4. A setup wizard will appear, to guide you through the setup process. Select Next.
5. Select Scan for Networks to search for available networks. If Wi-Fi is currently turned off, you will be asked if you wish to enable it - select Turn-On Wi-Fi.
6. The Available Wi-Fi Networks screen will be displayed.
7. Select citywifi.
8. The Wi-Fi Security screen will be displayed:
9. Complete the following settings:
    - Set Security Type to PEAP.
    - In the User name field, enter your City University username i.e. abcd123
    - In the User password field, enter your City University password.
    - Set Inner link security to EAP-MS-CHAP v2 (not MS-CHAP v2 without EAP)
10. Select Connect from the buttons at the bottom of the screen.
11. After a few seconds delay you should be connected to the citywifi wireless network.
