## Introduction

#### Abstract

About this report As a Higher Education Institution, City, University of London has specific equality duties, as outlined by the Equality Act (2010). These require public authorities to tackle discrimination, victimisation and harassment, advance equality, and foster good relations. City is required to publish equality information on an annual basis, which demonstrates progress against specific measurable equality objectives, in line with the Vision and Strategy 2030. The staff and student equality monitoring report provides an overview of staff and student equality data.

City will measure progress on advancing the diversity of student and staff communities, work to create an inclusive environment and promote inclusive teaching, education and engagement practices.

## Equality Objectives

The outlined Key Performance Indicators (KPIs) capture the ability to embed organisational values and build an inclusive University culture which promotes dignity and respect for all members of City's diverse community. City has committed to measuring and delivering on the following equality KPls, which also address commitments to progressing the Athena Swan and Race Equality Bronze Charter Mark action plans.

## KPI 1: Reduce gender and ethnicity pay gaps:

- The ethnicity pay gap for 2024 will be $19 \%$
- The gender pay gap for 2026 will be $15 \%$

## KPI 2: Increase ethnic diversity of staff to better reflect student population

- The proportion of Staff of Colour will be $32 \%$ by 2024
- The proportion of Grade 9 staff (including Professors) that are People of Colour for 2024 will be $15 \%$
- The proportion of women in Professorial roles will be $32 \%$ by 2024
- We have achieved our target to increase the proportion of women in Grade 9 (excluding Professors) roles of $51.5 \%$ by 2024

## KPI 3: KPI: Reduce Black student attainment gap

- The Black student attainment gap will be $12 p$ p by 2024

In 2023, City, University of London officially launched the Office for Institutional Equity and Inclusion (OIEI), demonstrating the commitment to delivering against the Equality, Diversity and Inclusion (EDI) Strategy. The OIEI is pivotal in enabling the University to establish an inclusive environment and removing barriers to progression for students, staff and the wider community, enabling a culture of fairness, equity and respect.

City continues to deliver positive change initiatives through Charter Mark frameworks. These include Athena Swan, Disability Confidence Scheme, Race Equality Charter and Stonewall. The associated action plans outline priorities for the upcoming five years, acknowledging the intersectionality of gender, race and other diverse identities.

## Staff Equality Monitoring Statistics

## Introduction

This report presents City's staff equality data for the academic year 2022/23. City currently collects and monitors data on eight protected characteristics defined by the Equality Act 2010. The characteristics covered are:

- Age
- Disability
- Gender reassignment
- Religion and belief
- Race (including colour, nationality, ethnic or national origin)
- Sex
- Sexual Orientation
- Being pregnant or on maternity leave

The data used for this report includes all salaried staff who were employed at City on the 31 July each academic year. Turnover data calculations use average headcount at the institution throughout the year.

In 2022/23 City employed 2410 staff comprising 1036 Academic and Research Staff ( $43 \%$ ) and 1374 Professional Services Staff (57\%). Staff were employed across central Professional Services and six Schools:

- Bayes Business School
- City Law School
- School of Communication and Creativity
- School of Health and Psychological Sciences
- School of Policy and Global Affairs
- School of Science and Technology

In the data tables throughout the report, * indicates where staff numbers are fewer than 5 and data has been redacted.

## Staff breakdown

In 2022/23 City employed 2410 staff comprising 1036 Academic and Research Staff (43\%) and 1374 Professional Services Staff (57\%).

## Ethnicity

Throughout this section data is presented by ethnicity, and split by White, BAME and Refused or Not known. BAME includes staff who identify as Black, Asian, or Minority Ethnic. Calculations include only those who have declared an ethnicity e.g., Refused/Not known are excluded.

In this report we have referred to BAME staff throughout these tables, which is consistent with HESA's data collecting and reporting. We use the term whilst recognising its limitations and homogenisation. City's writing style guide states that BAME should only be used in relation to data collection.

Further analysis by ethnic group has been conducted as part of our Race Equality Charter submission.

| Information Refused / Not Available* | 1444 | $60 \%$ |
| Total | $\mathbf{2 4 1 0}$ | $\mathbf{1 0 0 \%}$ |

$60 \%$ of staff refrained from answering the monitoring question related to gender reassignment. This is below the sector average of $43 \%$ in other institutions that have voluntarily reported this data to HESA (Advance HE, 2022).

As with all diversity monitoring categories, data is collected when an employee begins working at City. This can be updated any time on the Employee Staff System (ESS). Gender reassignment, religion and belief and sexual orientation were added to the HESA record in 2012/13, meaning staff employed before this date may be less likely to have shared this data.

City recognises individuals with the protected characteristic of gender reassignment as transgender (or trans) people. City will continue to work with statistical data to improve its reporting and declaration rates for trans people.

The category 'Spiritual' is no longer a category reported by HESA. Staff who have declared a religion were the largest group at $37 \%$ overall compared to those that have declared No religion, Not known or refused at $63 \%$.

The proportion of staff identifying as Christian, Muslim and Sikh have increased from 2021/22 to 2022/23. The proportion of staff identifying as Buddhist and Jewish has decreased from 2021/22 to 2022/23.

We have higher than the sector average of staff in the Not known or refused category for religion and belief at $26 \%$, compared with the sector average of $44 \%$ (Advance HE, 2022).

Sex
City staff records includes the field 'legal gender' where the options are male and female. This correlates to the HESA data field 'sex'.

Figure 10: Recruitment by ethnicity

The percentage of BAME applicants increased from 58\% in 2021/22 to 60\% in 2022/23. The proportion of BAME applicants shortlisted and interviewed decreased from $50 \%$ in $2021 / 22$ to $47 \%$ in $2022 / 23$. The proportion of appointments of BAME staff decreased from 37\% in 2021/22 to 36\% in 2022/23.

The data demonstrates that although applications increased, interviews and appointment of BAME staff both decreased. The gap between the proportion of BAME applicants and BAME appointments widened from 21 pp in 2021/22 to 24pp in 2022/23.

The tables below show the breakdown of applications by ethnicity and the percentage that progress to the next recruitment stage.

Promotion refers to circumstances in which academic and Professional Services staff progress from one grade to another (unless it is automatic) and the formal academic promotion process. There is no formal promotion process for promotions for Professional Services staff; progression to a higher grade is through re-evaluation of the grade for the role or a recruitment application to a higher graded post.

In 2022/23, 51\% of female academic staff were promoted decreasing from 54\% in 2021/22. In 2022/23, 54\% of female Professional Services staff were promoted or progressed decreasing from 57\% in 2021/22.

## Training opportunities

Training data relates to all salaried staff who attend online or in-person training in the academic year organised by the Organisational Development team, Office for Institutional Equity and Inclusion and/or the Health and Safety team. Training focuses on career progression, equality, health and safety, management and personal development.

*'Headcount' reflects headcount over the year
In 2022/23, 35\% of staff who declared a disability attended training. This is an increase from 32\% in 2021/22 and there was also an increase in the number of staff declaring a disability.

## Students' Equality Monitoring Statistics

The following report provides an overview of student diversity data at City, with both analysis of the institution overall, and of data within each of City's Schools. The following protected characteristics are considered in the analysis provided through this report:

- Age
- Disability
- Ethnicity
- Religion and Belief
- Sex
- Sexual Orientation

It should be noted that the data used within this report to calculate student headcount comprises City's full headcount without exclusions based on student status, meaning that numbers will differ from those included in other reports available on the City's website. Including all students without exclusions allows us to give a fuller snapshot of our registered student population. Figures are computed utilising a unique identifier, considering that certain students may undertake multiple courses throughout the year. This leads to diverse totals based on the perspective from which the data is examined.

* Denotes a number which is less than 10 and redacted.

## Overview of Student Body

| $\mathbf{2 0 2 2 / 2 3}$ | 21,908 | 16,891 |

There has been an increase to overall student population between 2021/22 and 2022/23 by 6\%. There has also been an increase for Full Time Equivalent (FTE) student which has been more gradual at 0.7\%.

## Level of Study Breakdown by School and City Overall

The greatest proportion of students are consistently undergraduate students studying their First Degree.

## Age

The greatest proportion of students at City continued to be students aged between 18 and 21 years old, followed by students aged between 21 and 24 years old, which is similar to the previous three years data. All groups other than ' 25 to 29 ' and '30+' have seen a decrease across the three years.

Note: Age is calculated at start of the academic year reported, i.e. August 2022.
The above table provides a breakdown of age group by School for the year 2022/23. These numbers are presented as proportions of overall populations on the following page.

The majority of students at $51 \%$ are under the age of 21 which is in line with the sector norms, where across the UK the majority of students were aged 21 and under (Advance HE, 2022).

## Disability

The proportion of students with a declared disability has increased from 8\% in $2021 / 22$, to $12 \%$ in $2022 / 23$. This is still lower than the national average, as Advance HE reports that, according to the most recently available data, 15\% of students nationally declare a disability (Advance HE, 2022).

Due to changes in HESA returns, there has been a change in the language used to describe disabilities. This has resulted in an extra category which cannot be mapped to those previously used. Appendix A shows how the new categories have been mapped to those previously used. In 2022/23, the most highly represented disability group is students who have reported a Mental Health Condition, which accounts for $4 \%$ of City's students. This is a change from previous years where it has been a Specific Learning Difference (SpLD). SpLD is now the second most reported disability alongside those who reported two or more disabilities at 3\%.

Bayes Business School had the highest proportion of students with No Known Disability. The School of Communication and Creativity had the highest proportion of students to declare a disability during 2022/223, followed by the School of Health and Psychological Sciences. The School of Communication and Creativity accounted for the highest proportion of students who have declared a mental health condition, which was $9 \%$ in 2022/23.

## Ethnicity

Throughout this section data is presented by ethnicity, and split by White, BAME and Refused or Not known. BAME includes staff who identify as Black, Asian, or Minority Ethnic. Calculations include only those who have declared an ethnicity e.g., Refused/Not known are excluded.

This report refers to BAME staff throughout the tables, which is consistent with HESA's data collecting and reporting. We use the term whilst recognising its limitations and homogenisation. City's writing style guide states that BAME should only be used in relation to data collection and reporting.

Table 72: Ethnic Group over Years

| Ethnic Group | $2019 / 20$ | $2020 / 21$ | $2021 / 22$ | $2022 / 23$ |

| White | $39.7 \%$ | $34.9 \%$ | $32.9 \%$ | $30.0 \%$ |

BAME students accounted for $68 \%$ in 2022/2023, which is a 3pp increase from $65 \%$ in 2021/22. This is also the highest proportion across a four-year period. Disaggregated data highlights that Asian students were the largest group at $37 \%$, with White students the second largest proportion at 30\%.

The ethnicity breakdown was similar to last year's figures. The smallest proportion is both those whose ethnicity is Not known/Refused and those who identified as 'Other' at $3 \%$. This was followed by those who identified themselves as Mixed or Arab at 5\%. The biggest decrease from 2021/22 is students who identified themselves as White, with a decrease of $3 \%$. The largest increase was in students who identified as Asian which increased by $3 \%$.
