Precede the paper by a brief abstract that fits within three lines. You might wish to replace conventional titles like “Summary”, “Introduction”, or “Results” by headings that relate to your actual contents.

Introduction
To ensure a reasonably uniform appearance of the papers in the proceedings volume, we ask all authors to follow these formatting instructions. Be aware that your paper will appear online (hyperlinks can be included) as well as in the printed booklet (gray-scale print).

Summary
The expected and maximum length of the contribution is 1 page. Prepare the document for A4 paper size, with margins of 2 cm (sides), and of 2.5 cm and 3.2 cm (top and bottom). Application of a single font of the type Times New Roman throughout the whole paper is strongly recommended. The title should be written in 14 pt bold letters. The authors’ name(s), affiliation(s) and the e-mail address of the corresponding author should be centered and placed 12 pt below the title. The recommended font size is 12 pt (normal) for the authors’ name(s), and 11 pt italics for the affiliation(s) and e-mail(s). The abstract (11 pt font size) has to be placed 12 pt below the affiliations and e-mail address(es). The text of the contribution should then follow single-spaced, of 12 pt size. References should be formatted preferably as shown below [1]. Displayed equations should be centered.

Results

Fig. 1. The recommended font size is 11 pt (normal) for the figure caption.

Number figures, tables, and equations only when actually required. Omit page numbers. Please also prepare your figures such that nothing is obscured when printed in gray-scale.

Conclusion
Submit your paper in pdf-format at this site (https://easychair.org/conferences/?conf=owtnm2015), by January 30th, 2015. Please indicate whether you prefer an oral or a poster presentation.
