Turning the page is the first step on your path of growth and achievement.

City, University of London is a special place. As the university of the City of London, we have strong links with the City, not least because the Lord Mayor of London is our Rector.

For over a century, our academics and students have used education, research and enterprise to transform their lives, their communities and the world.

In recent years we have invested heavily in our academic staff, our estate and infrastructure and have almost tripled the proportion of academic staff producing world-leading or internationally excellent research.

We recently joined the University of London, further strengthening the diverse, academically excellent environment we provide.

City is a place to study alongside leading academics in central London, one of the world’s most connected and opportunity-filled cities. Turn the page and take the first step.

This is City.

Professor Sir Paul Curran
President
City, University of London is committed to academic excellence and focused on business and the professions.

76% of research submitted to the last REF was rated as world-leading or internationally excellent*

This is City
London is our campus

This is City.

Maccartney Cruz (MSc Criminology and Criminal Justice), Kristina Nikolova (MSc Speech and Language Therapy) and Ananya Vittal Chavan (LLM Legal Practice).
City’s central London location places it at the heart of some of the most creative areas. From coffee houses and cocktail bars, cosy pubs and art galleries to shopping and outdoor spaces, there is something to inspire everyone in City’s bustling neighbourhoods.

Exmouth Market
A semi-pedestrianised street lined with sidewalk cafes, food stalls and restaurants that cater to a worldly palette. This is a great place to eat and drink.

Clerkenwell
Both a home for history museums and a hub for creative startups. This trendy area where Charles Dickens once lived also has some of the city’s oldest pubs.

The Angel, Islington
A lively part of town known for its restaurants, independent boutiques and theatres. There is always fun to be had whether it is during the day, evening or night.

Museum of London
Everything you need to know about London under one roof. Also houses the London 2012 Olympic Cauldron.

Shoreditch
The streets of trendy Shoreditch are lined with creative spaces and vintage shops, not to mention iconic street art and the famous Columbia Road Flower Market.
City has a lively social and cultural scene with clubs and societies, sporting facilities and opportunities for volunteering and paid employment. We also offer comprehensive support to all our students from day one with staff on hand to support with learning, health and wellbeing, accommodation and careers for life.

A lively social and cultural scene

City has a lively social and cultural scene with clubs and societies, sporting facilities and opportunities for volunteering and paid employment. We also offer comprehensive support to all our students from day one with staff on hand to support with learning, health and wellbeing, accommodation and careers for life.

A place to eat, drink and relax

There is a range of places to eat and meet friends at City, including coffee shops and sandwich bars, the student refectory and the University’s social hub: CityBar. During the day, CityBar is a great place to eat or relax. In the evening it becomes a vibrant social space, hosting a range of events organised by the Students’ Union and student clubs and societies.

A highly ranked Students’ Union

City, University of London Students’ Union (CULSU) works to improve the experience of City students by providing independent advice on academic issues, supporting student clubs and societies, organising events and ensuring that your voice is heard on key student issues.

www.culsu.co.uk

A home away from home

City’s Accommodation team, based in the Student Centre, can help you to find suitable accommodation in halls of residence or the private sector.

At City, we offer accommodation specifically for postgraduate students in halls of residence, contracted for the University’s use through independent housing providers. City’s postgraduate halls of residence are self-catered facilities within easy travelling distance of the main University buildings. We have some accommodation suitable for students with mobility difficulties.

www.city.ac.uk/student-centre

The largest student sports facility in central London

CitySport, our leading-edge sports centre, is the largest student sports facility in central London. One hundred stations of gym equipment spread over two floors, including the latest consoles with tablet-style screens, internet access and device connectivity are available at the touch of a finger. For those who prefer group exercises, there are purpose-built studios for mind and body classes, indoor studio cycling, martial arts and student team sports.*

At the heart of the centre is the Saddlers Sports Hall, an elite, Olympic-standard competition space adapted to Sport England standards and able to accommodate several court sports.

*To find out about competitive sport, the campus physical activity programme and how TeamCity can support you in whatever sport you are passionate about, visit: www.city.ac.uk/sport

Wendi Lam (MSc Entrepreneurship), Soe Thet Paing (MSc Health Management) and Reka Mezo (LLM Banking and Finance).
A place to build your
career

This is City.

City’s location in the centre of one of the world’s most diverse and fast-paced cities, combined with its highly international community of students and staff, mean the institution has developed close links with an extensive network of global academic partners. These ties ensure that our students enjoy excellent employment prospects.

Specialist careers advice
The friendly and helpful Careers Service staff are on hand to help you evaluate your career goals and plan the steps you need to take to achieve them. Discuss your plans at one-to-one appointments and discover our extensive careers resources, which include computer-aided guidance packages and aptitude testing systems.

Careers workshops and presentations
Find out about potential employers’ recruitment arrangements and polish your job search techniques. Major employers visit City regularly to give presentations, attend careers fairs and run skills sessions, while careers consultants and employers frequently hold workshops on subjects such as successful interviews and presentation skills.

Graduate, internship and placement opportunities
With City CareersHub, our specialist online service, you can discover internship opportunities available during your studies and identify graduate opportunities for life after City. All City students and graduates are registered on the site, along with more than 5,000 employers such as the BBC, Bloomberg, Deloitte, Goldman Sachs, HSBC, Macfarlanes LLP, PwC, Santander and The Times.

Sector-specific panel events
Panel events are an opportunity to explore and discover the range of sectors, industries and opportunities available to you from investment banking to engineering, government and international relations to creative industries. They are designed to enable you to ask questions to a range of industry professionals and experts who will share their own career stories, top tips and industry news. These events often feature City alumni.

Student volunteering
Improve your employment chances by developing new skills through volunteering. Recent volunteers have worked with a broad range of organisations, both on and off campus. Once you have completed a placement, the Careers Service will help you articulate your newly found skills through your CV and during interviews.

Find out more
www.volunteering.city.ac.uk
Located between the City of London and Tech City, Europe’s largest cluster of digital and technology startups, we are committed to developing the next generation of entrepreneurial talent within the student and graduate community.

Today’s City students share knowledge and resources in a London-wide community of budding entrepreneurs, while exploring opportunities to bring their expertise and ideas to a wider audience than ever before.

The benefits of being on the doorstep of Tech City include excellent student employability, research relationships and business collaborations. EC1V (City’s postcode) and neighbouring postcode N1 are both among the top UK postcodes for starting a business*. In 2016, around 17,000 new businesses were started within these postcodes.

If you want to start your own company, City’s focus on Enterprise Education is designed to help you develop the entrepreneurial mindset and skills needed to thrive in an increasingly competitive and challenging world.

CityStarters
The CityStarters team runs a wide range of extracurricular Enterprise Education events, programmes and activities that are free of charge and accessible to all students and graduates studying at City.

Find out more
www.citystarters.co.uk/cityventures/start

CitySpark
This ‘business design and doing’ competition is an opportunity for City students to win up to £5,000 to develop a new business idea, test it with potential customers and then make it happen.

Find out more
www.city.ac.uk/cityspark

City Launch Lab
City Launch Lab is a specially designed incubation space that provides business mentoring support and access to an accelerator programme to kick-start your business as well as free desk space for student and graduate entrepreneurs from City.

Find out more
www.city.ac.uk/launchlab

Made@City
An end-of-year celebration to showcase and reward final-year student project work. Made@City brings together students, staff and alumni from City with members of the local Tech City community.

Find out more
www.citystarters.co.uk/made-at-city

Start-Ed
Start-Ed is a free walk-in centre offering advice on a range of business and legal matters to businesses and technology startups.

Cass Entrepreneurship Fund
The Cass Entrepreneurship Fund is a £10 million venture capital fund, providing growth equity to startup and early-stage companies.

Peter Cullum Centre of Entrepreneurship (PCCE)
The PCCE is a focal point for budding and established entrepreneurs. It brings together the skills, experience and networks of successful entrepreneurs, financiers and business leaders and offers a range of short courses and support services to entrepreneurs.

Ground-breaking research

This is City.

Postgraduate research opportunities

Research is a vital part of City. With world-leading academics and over 450 doctoral students, our research is driving positive change and making a difference to society. We offer each research student the opportunity to work closely with their academic of choice in a stimulating and supportive environment that is designed to support their learning and development.

Students operating the spectrally calibrated monitor in the Colour Research Laboratory available in the School of Health Sciences.
Doctoral study at City can lead to a PhD or an alternative research degree such as a professional doctorate. It involves three to four years of full-time study of original research on a specific topic, while under the supervision of an expert academic from one of our five Schools.

The School of Arts & Social Sciences is a vibrant and cutting-edge research environment, recognised nationally and internationally. It has niche areas of research with 75 per cent of research submitted to the last REF rated as world-leading or internationally excellent.

The School provides dedicated shared office space for PhD research and an extensive programme of research methods, training and career development sessions. We are also members of the Bloomsbury Postgraduate Skills Network, which facilitates access to a range of research methods classes across other University of London partners.

Each department organises a research seminar series that enables doctoral students to engage with the latest ideas and developments relating to their specialist topic. All doctoral students are expected to attend these seminars and to present on their own research at least once a year.

Departments may be able to provide funding for attendance at national and international conferences and the University’s Graduate School provides further opportunities. Both the School and the University organise social occasions throughout the year for the benefit of the PhD research student community.

Research degrees
MPhil/PhD/DPsych

Duration
Full-time: up to four years
Part-time: up to seven years

The School offers research degree supervision across its core disciplines:
- Culture and Creative Industries
- Economics (health, regulation, finance, monetary, fiscal and macroprudential policy)
- English
- International Politics (development and globalisation, civil society, history and religion, global political economy and governance)
- Journalism (history, ethics, law and regulation, digital practice, representation and democratisation, business and leadership)
- Music (ethnomusicology, musicology, composition and technology)
- Psychology (clinical, social and cognitive neuroscience, cognitive psychology, counselling psychology, decision-making, behavioural economics and developmental economics)
- Psychology and Social Neuroscience (Joint PhD with Sapienza University of Rome, Italy)
- Sociology (media and communications, employment, crime and victimology, gender and youth studies).

Students should generally enrol for an MPhil research degree and transfer to the PhD after one year of satisfactory academic progress. Students might be required to complete specialist taught modules during the MPhil year.

Find out more
city.ac.uk/ards
Executive PhD

PhD
MPhil/PhD

Duration
Part-time: four years

The Cass Executive PhD focuses on research that makes an impact on professional practice and broader business and society issues. It combines expertise in a range of business topics: management, finance, accounting and actuarial science.

Candidates explore a wide range of subjects, including the latest scientific insights, theoretical frameworks and professional applications, all set in an international context.

The course comprises ten 40-hour residential weeks held at Cass, with additional private study. It includes a thesis presentation in year four.

Career opportunities

The Executive PhD supports the career development of high-profile, research-orientated business professionals who use research to enhance their understanding of the organisations and processes they manage.

It is aimed at individuals who are at critical points in their careers and supports them to change direction or secure more senior positions.

Find out more

city.ac.uk/cerd

PhD

Duration
Full-time: four years

The Cass PhD is designed for students who want to conduct their research in a world-class business school and an intellectually stimulating environment.

In year one, students attend a PhD-level education programme assessed by coursework, examinations and a thesis.

On completion of the first year of education and successful pass of their transfer panel at the end of the second year, students are registered for a PhD.

During years three and four, students deepen their research, finish research articles and present them at workshops and conferences. Every student is expected to submit a thesis and attend a viva voce examination.

Career opportunities

A common route into academic research is a postdoctoral research post or fellowship after completing the doctorate. While some PhD recipients go on to permanent academic positions, others pursue a career in industry research.

Find out more

city.ac.uk/crssd

School of Health Sciences

Research degrees
MPhil/PhD

Duration
Full-time: three years
Part-time: six years

The School of Health Sciences has seven research centres: Centre for Food Policy; Centre for Applied Vision Research; Centre for Health Services Research; Centre for Language and Communication Science Research; Centre for Maternal and Child Health Research; Centre for Mental Health Research and Interdisciplinary Research Centre for Healthcare Innovation.

There are three routes to an MPhil/PhD degree within the School:

• Traditional MPhil/PhD: students undertake a significant piece of original research and write a thesis based on that research. The majority of students take this route.

• MPhil/PhD by Prospective Publication: students base their submission on a series of peer-reviewed research papers which they publish during the course of their MPhil/PhD and incorporate this into an overarching thesis that reflects their work.

• MPhil/PhD by Prior Publication: students who have published several significant peer-reviewed research papers spend between one and two years writing an extended treatise which draws this research together with analysis of previously published work by others into the context of a single overarching thesis.

city.ac.uk/hrds
city.ac.uk/health/research

Sir John Cass Business School is renowned for its impactful, world-class research that is as relevant to business and industry as it is to academia.

Our academic staff apply their international perspective and industry experience to developing progressive thinking and exploring imaginative new research angles on subjects ranging from marketing to investment, leadership to innovation. Each student is allocated two or more dedicated supervisors who will guide their research and foster their development as academic researchers.

Together, they form a vibrant and well-integrated intellectual community, where collaborations and exchanges across disciplines are common. This community regularly gathers in different seminar series, where well developed and less developed work is presented and discussed in a constructive and friendly atmosphere. Cass offers two PhD programmes, the full-time PhD programme and the part-time Executive PhD programme.

The full-time PhD programme offers specialisations in the fields of finance, accounting, actuarial science, management, marketing and operational management. Throughout the programme, students benefit from comprehensive research training, including intensive courses in the core topics of their discipline, advanced courses and development workshops and training designed to prepare them for the academic workplace.

The Executive PhD is designed to be flexible, to enable busy executives to undertake a PhD without having to take a career break. It is designed for senior executives working in industry, government or not-for-profit sectors who want a qualification that combines academic rigour and practical relevance.
The City Law School

The City Law School has a vibrant and dynamic community of scholars and students with considerable strengths in education and research. The School’s research expertise straddles different areas and approaches, including doctrinal legal, socio-legal and interdisciplinary research. Its research strengths include but are not limited to EU and international law, intellectual property, commercial and human rights law.

The School is committed to academic excellence and considers its PhD students as part of its scholarly community.

Research degrees
MPhil/PhD

Duration
Full-time: minimum period of registration is two years; maximum is four years
Part-time: minimum period of registration is three years; maximum is seven years

PhD students are assigned two supervisors to support them throughout their research. They also benefit from the School's Research Training Programme which focuses on research skills and methodologies, employability skills, career management and personal development.

PhD students become part of a stimulating research environment by participating in the activities of the School’s research centres, institutes and groups.

The award of a PhD requires the submission of a thesis for examination at a viva voce (oral examination) by two examiners, at least one of whom is external to City. A PhD thesis (up to 100,000 words) must be an original and substantial piece of work which makes a contribution to the relevant literature. All students are initially registered for an MPhil degree. Those students who wish to proceed to a PhD must upgrade within 18 months (30 months for part-time students).

city.ac.uk/lrds

The School of Mathematics, Computer Science & Engineering

The School of Mathematics, Computer Science & Engineering has a vibrant research community with an interdisciplinary perspective and a greater understanding of the impact of Science, Technology, Engineering and Mathematics (STEM) on society.

Science, technology and mathematics permeate nearly every aspect of life. As the pace of innovation accelerates and technology grows ever more complex, science and technology are becoming increasingly interdisciplinary, demanding an approach that spans multiple academic disciplines and includes a broader, non-technical perspective.

Research in the School focuses not only on explaining fundamental principles but also on solving real-world problems. Through our PhD research courses, we aspire to train future leaders capable of incorporating both technical and non-technical considerations, whether in academia, business, government or the not-for-profit sector.

Industry inspired courses

Postgraduate taught courses

Whether you are looking to continue your educational journey, advance your career or even make a career change, we have over 150 postgraduate taught courses that offer high quality teaching informed by industry insights.
The School of Arts & Social Sciences has a world-class reputation for dynamic, inspiring and rigorous postgraduate education. Academic staff at the School are highly regarded in their fields and the research they undertake regularly informs academic debate and political policy at a regional, national and international level.

School of Arts & Social Sciences

The School’s strengths in research and education lie in the following disciplines: Economics; English (including Creative Writing and Publishing); History; International Politics; Journalism; Music; Psychology; and Sociology, Media, Criminology, Cultural and Creative Industries. Over 1,000 postgraduate students from around the world join the School each year, creating a lively and stimulating environment for studying and socialising. Students undertaking both taught and research postgraduate degrees play a key role in the life of the School, through their participation in seminar series, their research activities, their contribution to student media and their involvement in student politics and representation.

Courses at the School of Arts & Social Sciences are renowned for their professional relevance. Academic staff enjoy close ties with industry and the professions, which means that when designing and updating courses, they ensure the needs of graduating students and their potential employers are met. These links and City’s central London location ensure that students benefit from regular lectures, seminars and networking opportunities led by prominent speakers and visiting lecturers. The School’s vibrant alumni network, which postgraduate students automatically join upon graduation, has among its members leading figures in the worlds of journalism, culture and creative practice and the social sciences.

City’s location, its outstanding academic staff and the professional orientation of its postgraduate degrees mean that graduates of the School of Arts & Social Sciences are successful in securing employment once they graduate. Many of the School’s graduates also move on to doctoral-level study, both within the School and at other leading institutions around the world.

This master’s course is designed to bridge the gap between economics and development, providing strong education in quantitative and policy analysis in development economics. It provides students with an understanding of the key issues in economic development, using rigorous economic theory and statistical tools to enable them to analyse policies and assess their impact on economic and human development.

The course is led by a team of academic staff who are leading experts in their field of research. All students must complete four core modules and either a literature survey or dissertation. Students who choose the literature survey can choose four electives. The dissertation option allows students a choice of two electives.

**Career opportunities**

Graduates of this course enjoy employment possibilities in both the public and private sectors, including consultancy and economic analysis. In addition, this course provides students with the skills to work in consulting firms specialising in development, governmental bodies such as the Department for International Development (DFID) or in major international financial and development institutions. The MSc also provides a solid academic foundation for students wishing to pursue doctoral research in economics.

Creative Writing
MA

Duration
Full-time: one year
Part-time: two years

Based in the heart of commercial and literary London, this course has a distinguished track record in helping students to publication. Available as either full-time or part-time, the course helps students to develop their creative writing and publishes them in the burgeoning environment of digital media and publishing.

Alongside core workshops dealing with the practice of creative writing, students can choose specialisms in literary prose fiction, genre fiction and creative non-fiction. Students work with experienced lecturers and publishers and complete their qualification with a 15,000-word piece of creative writing.

Career opportunities
The MA Creative Writing helps students develop practical understanding of the different elements and genres of creative writing today. It also equips them with a range of subject-specific, transferable and employability skills. In addition to publishing their creative work, our graduates go on to employment in fields such as journalism, publishing and marketing, library science, digital media, cultural organisations, charities and teaching.

City.ac.uk/cwmf

Creative Writing
MFA

Duration
Full-time: two years
Part-time: four years

This course is for students who want to complete a longer, potentially publishable piece of creative writing. The MFA Creative Writing is a two-year course which helps students develop advanced creative writing skills. The first year follows the taught curriculum of the MA in Creative Writing, while the second asks students to complete an independent creative writing project of potentially publishable length. Students who begin the MA in Creative Writing may apply to transfer to the MFA after two terms of taught provision.

During the second year of the MFA, students complete an extended piece of creative writing (40,000-60,000 words). Students also receive one-to-one tutorial support from one of City’s distinguished staff of experienced lecturers and published authors.

Career opportunities
Aspiring writers enjoy exposure to publishers and our alumni successes include Sonya Lalli’s The Arrangement (Orion) and Carline Sorosiak’s If Birds Fly Back (HarperTeen). Students on the course have won the Orwell Society’s Dystopian Fiction Prize for three years running. The industry placement option also provides students with invaluable work experience in a wide range of London-based trade, academic and children’s publishers.

Creative Writing and Publishing
MA

Duration
Full-time: one year
Part-time: two years

This master’s course is ideal for students who want to have a grounding in the business of publishing while fostering their creative ambitions. Attracting a diverse group of students with a wide range of backgrounds, the course welcomes both experienced and aspiring writers and will appeal to anyone writing in the genres of literary fiction, fantasy, young adult, dystopian fiction and crime. Students gain the knowledge and skills relevant to professional practice in commercial publishing settings which produce creative content for both print and digital formats.

Delivered by industry professionals and leading published authors, this course has a strong track record in students winning literary prizes, gaining representation and publishing contracts.

Career opportunities
Aspiring writers enjoy exposure to publishers and our alumni successes include: Head of Operations and Marketing, Little, Brown; Director, Book Publishing, Faber & Faber; Publishing Director, Holt; and Head of Publishing, Smith & Shoesmith. Students on the course have won the Orwell Society’s Dystopian Fiction Prize for three years running. The industry placement option also provides students with invaluable work experience in a wide range of London-based trade, academic and children’s publishers.

English
MA

Duration
Full-time: one year
Part-time: two years

This distinctive course approaches English as an academic subject that makes a significant contribution to cultural and social life. The course aims to enable students to develop a range of subject-specific, transferable and employability skills. The MA English allows students to focus solely on English literature or to combine literary scholarship with elective modules in creative writing and/or publishing. It varied, innovative assessment regime develops a range of academic and transferable skills.

The course’s predominantly contemporary curriculum explores questions of identity and genre. Students benefit from advanced theoretical and research training and access to London’s outstanding cultural and research facilities. Elective modules in publishing and creative writing will enable the development of additional, aligned skill sets.

Career opportunities
The MA English develops key transferable skills in research, critical analysis and oral and written communication relevant to a range of graduate careers. English graduates work in publishing, advertising and marketing, library science, digital media, charities and the heritage industry, teaching and journalism.

Publishing/International Publishing
MA

Duration
Full-time: one year
Part-time: two years

MA Publishing/International Publishing covers all types of publishing, from trade and specialist publications to novels and non-fiction. Students complete core modules in term one with options in term two, including commercial and creative publishing projects, an interactive media module, a libraries and publishing module and a digital culture option. The course provides a thorough grounding in the drivers of commercial success for print and digital media, with a focus on the evolving implications of digital content and e-delivery. Students are educated both by expert scholars with up-to-date industry knowledge and publishing practitioners. Together, they support students to develop confidence and skills in the critical analysis of current global publishing conditions.

MA Publishing students are encouraged to complete a 15-credit professional placement option and all of the MA International Publishing case studies relate directly to current publishing practice projects.

Career opportunities
MA International Publishing graduates have gone on to work in leading media, charity and think-tanks.

International Politics

Diplomacy and Foreign Policy
MA

Duration
Full-time: one year
Part-time: two years

This degree explores issues and problems that face the study of foreign policy through an engagement with the theoretical and real-world dimensions of foreign policy analysis, a salient strand of International Relations Theory. It focuses on traditions and techniques in the areas of diplomacy, decision-making, in the context of foreign policy and economic diplomacy.

The course deals with a range of topics relating to the economic, political and professional dimensions of diplomacy and foreign policy with reference to key regions. It provides students with a research-led education in this dynamic field.

Students explore professional approaches to policy formulation, decision-making and negotiation with international organisations and between competing parties.

Through exercises, debates and simulations, students experiment with different ways of defining problems, recognising competing agendas, facilitating dialogue and mitigating risk.

Career opportunities
The MA Diplomacy and Foreign Policy is designed for those planning, or already engaged in, a career in the diplomatic service, journalism, international organisations (such as the UN or the EU) or NGOs (such as Amnesty International or Oxfam). It also prepares students for a career in political risk, international finance and think-tanks.

City.ac.uk/apip
Global Political Economy
MA
Full-time: one year
Part-time: two years
The MA Global Political Economy provides a critical edge perspective on global economic and financial relations, inter-state competition, mechanisms of global governance and processes of transformation and change.

The course consists of core modules on the history of global capitalism and contending approaches from across the political economy traditions. Students then develop specialist knowledge through elective modules, which cover issues such as economic and financial crises, international organisations and economic diplomacy, poverty and inequality, regionalisation and globalisation, states and sovereignty and the rise of new economic powers.

Students benefit from our internationally renowned expertise in the field of global political economy, exemplified by the leading academic staff who deliver the course, the vibrant research culture centred around the City Political Economy Research Centre and City’s central London location.

Career opportunities
This is a specialised degree enabling graduates with and without prior knowledge of economics to engage competently and confidently with economic and financial developments and pursue professional careers in the public and private sectors, international organisations or the media. The degree also provides a solid foundation for students wishing to pursue doctoral research in politics and political economy.

International Politics
MA
Full-time: one year
Part-time: two years
At the heart of contemporary international politics are new challenges to enduring problems. Increasing concerns such as poverty, terrorism, conflict, human rights, economic development, displacement and the global environment make the study of international politics a unique and exciting challenge. The MA International Politics provides students with an opportunity to examine and critically evaluate issues of the contemporary world. It focuses on the study of global policy-making using theoretical and real-world approaches. In the core module students are introduced to the critical and theoretical study of international politics. Students are then able to choose elective modules covering their interests, including modules on development and inequality, security, foreign policy and diplomacy, religion, global economics and financial crises, migration, human rights and more.

Career opportunities
The skills, knowledge and expertise students develop during their time on this course open up several career opportunities for them. Whether students are looking to work at an NGO supporting developing nations or closer to home as part of the civil service or media, they will develop enviable skills that are highly prized in several industries.

city.ac.uk/siph

International Politics and Human Rights
MA
Full-time: one year
Part-time: two years
This is a course where students challenge their own point of view. It unpicks the idea of human rights and how it structures the way we understand the world, so that students can identify how those understandings shape global events. Students then focus on developing their critical intellectual skills to challenge conventional views of international politics and how those views may be ethically problematic. International Politics and Human Rights is an evolving subject so students explore unique specialisms backed by real-world research. Our academics are actively affecting policy, conducting research that has shaped World Bank, UNHCR and European governments’ responses to the resettlement of refugees and other displaced persons, hosting talks on the right to employment in the UK and engaging in study groups around the Trump presidency.

Career opportunities
Our alumni have some of the most important jobs in production and management in the UK. Work experience days during the course are vital and owe a lot to City’s industry contacts. These are undertaken over 15 days, usually within the Christmas break and students learn to be all-round broadcast news reporters with television, radio, social and digital skills. Students will join alumni that are working as journalists in the public and private sectors, international organisations or the media. The degree also provides a solid foundation for students wishing to pursue doctoral research in politics and political economy.

Broadcast Journalism
MA
Full-time: ten months
MA Broadcast Journalism is the keystone broadcasting course at City, highly rated by employers and with a national and international reputation. Students benefit from a diverse cohort of 50 with great networking and peer support. On news days, students work in groups of 15, covering news, sport and current affairs. The final project is a short documentary for television or radio, made individually or in pairs. Tutors include talkRADIO's award-winning journalist Sandy Wart, former BBC/ITV producer-director Sally Webb, former BBC TV reporter Celeste Cooney, Reuters journalist George Nesas and BBC World Service’s Dr Abdallah Tasiu Abubakar. Lecturers include former Reuters editor Lloyd Watson and former editor of The Andrew Marr Show, Professor Barney Jones. Other modules are delivered with the MA Television Journalism.

Career opportunities
Our students have gone on to work for The Wall Street Journal/Dow Jones, the BBC, Reuters, China Daily, Danish Broadcasting Corporation, Helsingin Sanomat, TV 2 Norway, Xinhua News Agency, Bangkok Post, Associated Press and Platts. Others are working for international organisations, including the Organisation of Petroleum Exporting Countries, the European Commission or for international corporations including Morgan Stanley.

Erasmus Mundus MA: Journalism, Media and Globalisation
MA
Full-time: two years
This is a unique two-year master’s course and part of the prestigious Erasmus Mundus programme (www.mundusjournalism.com). Students learn as part of a diverse cohort of individuals from around the world.

As this course brings together five leading European institutions in journalism and media education, there is a wealth of international guest lecturers and academics. The first year is spent in Aarhus University (Denmark), the second at City, University of London or at Swannea University (Wales), University of Hamburg (Germany) or University of Amsterdam (Netherlands).

The course also offers exchange opportunities for students to travel to one of the following three institutions in the spring of the first year: University of California, Berkeley, USA; Pontificia Universidad Católica de Chile or University of Technology Sydney, Australia.

Career opportunities
Our alumni have some of the most important jobs in production and management in the UK. Work experience days during the course are vital and owe a lot to City’s industry contacts. These are undertaken over 15 days, usually within the Christmas break and students learn to be all-round broadcast news reporters with television, radio, social and digital skills. Financial Journalism
MA
Full-time: ten months
The MA Financial Journalism has proved itself to be the perfect training ground for many of the world’s leading news organisations. This unique course provides both basic and specialist knowledge allowing graduates to hit the ground running, reporting on important international issues from global economics to financial markets.

Generous funding from the Marjorie Deane Foundation allows all students to visit Shanghai and New York to learn first-hand about these major global superpower economies. The course is truly distinctive in its international reach and breadth of opportunities. Beyond the course, students will have an extensive education in the best professional practice of reporting business and financial news, using state-of-the-art multimedia facilities and Bloomberg and Reuters terminals to produce highly prized content.

Career opportunities
Financial journalists are still in demand despite the industry’s difficulties in recent years. Graduates of the course have gone on to work for Bloomberg, Reuters, the Financial Times, the BBC, The Telegraph, The Wall Street Journal/Dow Jones, the BBC, Reuters, China Daily, Danish Broadcasting Corporation, Helsingin Sanomat, TV 2 Norway, Xinhua News Agency, Bangkok Post, Associated Press and Platts. Others are working for international organisations, including the Organisation of Petroleum Exporting Countries, the European Commission or for international corporations including Morgan Stanley.

International Journalism
MA
Full-time: two years
The MA International Journalism provides a critical edge perspective on global economic and financial relations, inter-state competition, mechanisms of global governance and processes of transformation and change.

The course consists of core modules on the history of global capitalism and contending approaches from across the political economy traditions. Students then develop specialist knowledge through elective modules, which cover issues such as economic and financial crises, international organisations and economic diplomacy, poverty and inequality, regionalisation and globalisation, states and sovereignty and the rise of new economic powers.

Students benefit from our internationally renowned expertise in the field of global political economy, exemplified by the leading academic staff who deliver the course, the vibrant research culture centred around the City Political Economy Research Centre and City’s central London location.

Career opportunities
This is a specialised degree enabling graduates with and without prior knowledge of economics to engage competently and confidently with economic and financial developments and pursue professional careers in the public and private sectors, international organisations or the media. The degree also provides a solid foundation for students wishing to pursue doctoral research in politics and political economy.

Interactive Journalism
MA

Duration
Full-time: ten months

This exciting and contemporary course continues to develop in response to the rapidly changing environment of digital journalism in the UK and internationally, with a focus on social media, multimedia storytelling and data journalism. Video and audio work are also geared to online platforms.

Students are encouraged to undertake work placements to further develop the skills they learn on the course. In addition to online specialisms, students learn the journalism essentials of writing, reporting, newsgathering, interviewing and feature writing, which are core elements of MA Interactive Journalism.

The course has a strong reputation for preparing students for specialist jobs, such as data journalism, social media and audience development, as well as broader roles in digital journalism. Learning from current journalists ensures up-to-date skills and relevant industry contacts.

International Journalism
MA

Duration
Full-time: one year

The International Journalism course was started in 1962 and has built a worldwide reputation with well over 1,000 alumni working all over the world. Students become adept at broadcast, print and online journalism in a global context. They study international news and obtain a profound understanding of international journalism from a UK perspective.

Students practise all platforms of journalism (broadcast, print and online) and explore theory and reflect on their practice. Our students come from all over the world and have the benefits of being in one of the world’s most significant media cities with access to thousands of international journalists and sources.

On this course students benefit from using both traditional and contemporary journalism tools and acquire comprehensive skills.

Career opportunities
Typically, more than 92 per cent of graduates from this course are in employment six months after completing it. Some go on to further study. Graduates work in both global and national media and in allied occupations around the world. Most recently, these have included roles from researchers to editors in media such as the BBC World Service, Al Jazeera, Deutsche Welle, CNN, France 24, Bloomberg, Sky, Fox, Thomson Reuters, AP and Dow Jones and major newspapers and magazines including The New York Times, Financial Times, The Hindu, Politiken, GQ, Euronews, Radio France Internationale and The Times.

Investigative Journalism
MA

Duration
Full-time: ten months

This pioneering course is an intense, challenging degree designed to equip students with the reporting and research skills needed to produce investigations that matter. Basic reporting leads quickly to advanced methods, including working with data, building sources and using public records and access laws.

Case studies of high-profile investigations help students understand how to investigate companies, organisations and individuals for issues of public concern, miscarriages of justice or abuse of power, within an ethical and legal framework. Small groups help focus on producing high-quality narrative writing, while students also learn professional multimedia skills including audio and film. Students also complete several complex and ambitious investigative projects under the tutelage of some of the most experienced professionals in the field.

Career opportunities
Graduates move into employment across print, online and broadcast media, from The Times, The Daily Telegraph, The Guardian to quality regionals, trade and current affairs magazines including The Spectator and New Statesman. Graduates also work for BBC Panorama, Sky News, Bloomberg TV, BuzzFeed, regional BBC TV, CNN, independent production companies and the Bureau of Investigative Journalism. Some have found work for charities, non-profit organisations such as Greenpeace or for media organisations overseas.

“I chose City because here I can focus on the research I am interested in. I work together with my supervisors and I have access to a laboratory with state-of-the-art equipment. City’s location and the resources provided to research students contributed to my decision as well.”

Vasiliki Meletaki
Psychology research student
This hugely successful and well-established course prepares students for a wide range of careers in magazine and features journalism, both in print and online, from glossy consumer titles to international news journals. Skills learned include: writing long-form investigative features to arts and culture reviews; published profile pieces to podcasts and video editing for online; designing and subbing print and online pages and picture editing. There is a strong entrepreneurial angle to the course and students learn how to research, create and launch new media products and engage audiences.

Accredited by the Professional Publishers Association, students learn from magazine and specialist journalists and around 30 visiting editors, commissioning editors and editorial directors from the UK’s leading publishing houses.

**Career opportunities**

Graduates occupy top positions in magazines, newspaper supplements and digital content providers, including Harper’s Bazaar, The Guardian Weekend, The Week, Bluejaam Media, Stylist, Esquire, New Statesman, The London Magazine; EII magazines such as Architects’ Journal, Estates Gazette, Chemist & Druggist, Travel Weekly; customer magazines such as BA’s High Life and major newspapers including London Evening Standard, The Observer and The Sunday Times.

**Magazine Journalism MA**

**Duration**

Full-time: ten months

This fast-paced, exciting degree is designed to train the future reporters, correspondents and editors of the world’s leading media organisations. The course was established in 1982 and has an exceptional reputation for helping aspiring journalists gain employment. Students benefit from a central London location, unrivalled industry contacts and a thorough grounding in the best practices of professional journalism.

The course combines education in reporting, interviewing, writing, editing, research and newspaper production (in print and online) with a concern for professional standards and critical and ethical reflection. Multimedia work is geared to online. Students are encouraged to undertake work placements to put into practice the skills they learn at City. There is scope for students to develop specialist areas and topics on which they wish to concentrate.

**Career opportunities**

Graduates have gone on to work for a wide range of news organisations, including national newspapers (The Guardian, The Daily Telegraph, Daily Mail, The Times, Daily Mirror, The Sun, The Sunday Times, Financial Times, Metro); broadcasters (BBC, Sky, CNBC); online/news agencies (Press Association, Bloomberg, Huffington Post, BuzzFeed); magazines (New Statesman, Prospect, The Economist, Newweek); regional press (London Evening Standard, City AM, Manchester Evening News) and international newspapers (The Daily Star, Ventnor, South China Morning Post, Hong Kong).

**Newspaper Journalism MA**

**Duration**

Full-time: ten months

The course develops skills in the broad field of contemporary sound practice, encompassing notated and digital music, sound art, improvisation, performance, sound studies and interdisciplinary work. It embraces contemporary sound in all its plurality and provides a critical context for exploring key topics at the frontiers of its increasingly overlapping sub-disciplines.

Engagement with professional creative practice lies at the core of the course, which is led by world-leading composers and sound artists. Students workshop with professional ensembles in-residence EXAUDI and Plus Minus as well as international visitors and present work to the public at City Summer Sounds Festival. The course complements our research centre SPARC (Sound Practice And Research @ City), which attracts visiting artists to work with students through workshops, lectures, masterclasses and an annual interdisciplinary symposium and hosts our groundbreaking record label and distribution service, distributed by NMC Recordings.

**Career opportunities**

Our employment rate is exceptionally high. Our students have gained great jobs on- and off-screen including: Alistair Bunkall, Reporter, Sky News; Osama Bin Javid, News Anchor, Dawn News Pakistan and Al Jazeera; Claire Burton, News Presenter, BBC Channel Islands; Rose Hughes, Reporter, Sky News; Anna Belcher, Producer, CNN; Warren Nettledrove, Reporter, ITN’s News and many more. Work experience days are undertaken each Wednesday in terms one and two and owe a lot to City’s industry contacts. Students go to one company or broadcaster and build relationships with employers.

**Behavioural Economics MSc**

**Duration**

Full-time: one year

Part-time: two years

MA Behavioural Economics applies psychological insights to human behaviour to investigate how people make economic decisions under various conditions of constraint (e.g., time and knowledge) and influence (e.g., social pressure). This is an important field in modern economics and the social sciences generally.

Commercial organisations have long known the limitations of individual decision-making and they routinely use this knowledge in their commercial practices (e.g., the anchoring effect of minimum payment on credit cards). The real-world implications of behavioural economics are varied and significant and acknowledged to provide a powerful and cost-effective approach to improving human welfare.

This MSc is the only one of its type in central London. Unlike other courses, the MA Behavioural Economics at City is based in both the Economics and Psychology department, offering students a good balance of both disciplines.

**Career opportunities**

Behavioural economists use data to better understand human behaviour. These highly valuable skills can be applied in a range of professions, for example to formulate policies or to advise consumer behaviour. There is increasing demand for behavioural economists in a range of sectors, including financial trading and risk assessment, consumer psychology and marketing, consulting and public policy. The research focus of the course also allows graduates to succeed at PhD level in Economics or Psychology.

---

**Behavioural Economics MSc**

**Duration**

Full-time: one year

Part-time: two years

The aim of this course is to provide students with a thorough grounding in social, clinical and cognitive neuroscience. Students gain a deep understanding of how different brain functions contribute to cognitive, social interaction and determine mental health, wellbeing and psychiatric illness. Students learn about the latest advances in clinical, social and cognitive neuroscience and develop an appreciation of the reciprocal nature of research and practice in these domains.

The Department of Psychology strives to provide a supportive, vibrant research environment and excellent research-led education, delivered by internationally recognised experts.

The Centre for Psychological Wellbeing and Neuroscience has close links to the community mental health services, like City & Hackney Mind, which attracts visiting artists to work with students through workshops, lectures, masterclasses and an annual interdisciplinary symposium and hosts our groundbreaking record label and distribution service, distributed by NMC Recordings.

**Career opportunities**

The course provides a gateway to the clinical professions. Students will also be well placed should they wish to undertake further professional training in clinical psychology or a related discipline. For students wishing to continue to PhD level, this course is an ideal platform from which to progress, particularly in cognitive and social neuroscience. The knowledge and skills students acquire are sought after in many sectors (neuro-marketing, media and the arts, business and education).

## Counselling Psychology
**PGCert**

**Duration**
Part-time: one year

The PGCert Counselling Psychology provides an excellent foundation for students who wish to extend their knowledge and experience prior to undertaking more advanced professional training in counselling psychology or related disciplines. The course gives students the opportunity to learn about the interpersonal and therapeutic skills, which are the foundation of the counselling process and also provides a range of theoretical frameworks, linking psychological theory and counselling technique and acting as a template for model-based counselling practice. Experiential learning and skills practice are central to this course. It may also be of interest to healthcare workers, managers and others who wish to enhance their psychological knowledge and counselling skills and apply them within their professional practice.

**Career opportunities**
The course is an excellent pathway to future careers. Many of our graduates have been successful in gaining places on related master’s and doctoral-level courses in areas including counselling psychology, child and adolescent psychology, counselling and psychotherapy.

Find out more [city.ac.uk/scpg](http://city.ac.uk/scpg)

## Counselling Psychology
**DPSych**

**Duration**
Full-time: three years

The Professional Doctorate in Counselling Psychology is a professional course approved by the Health and Care Professions Council and accredited by the British Psychological Society (BPS).

Counselling Psychology at City has a long-established tradition and was one of the first courses to be accredited by the BPS in 1995. We have retained our accreditation since then, constantly keeping pace with developments both nationally and internationally and maintaining our reputation for innovation and excellence. Students learn to work with individual adults and children, couples, families, groups and organisations with a wide range of complex presenting issues both in short and long-term, single and multi-professional contexts and through transferring psychological skills to others in multidisciplinary teams.

**Career opportunities**
This professional and academic course enables students to work in a broad range of settings, including the NHS, forensic, third sector (voluntary), industry, government, private practice, academia and research. Recent graduate job titles include Consultant Psychologist, Counselling Psychologist, High Intensity Therapist, Lecturer and Practitioner Psychologist.

Find out more [city.ac.uk/scpd](http://city.ac.uk/scpd)

## Organisational Psychology
**MSc**

**Duration**
Full-time: one year

This course incorporates: organisational development and change; improving employees’ wellbeing; occupational choice; coaching psychology; selection and assessment; mindfulness; leadership; learning and training. This long-standing and award-winning course provides students with in-depth theoretical and research knowledge in these and related areas. Students have opportunities to develop a range of organisational consulting skills, such as managing client relationships, facilitating participative decision-making, negotiating access into organisations, facilitating employee focus groups and providing feedback.

The course covers the five knowledge areas for occupational psychology as outlined by the British Psychological Society. It is delivered by a dedicated team of research-active and chartered occupational psychologists.

**Career opportunities**
This course has high levels of employability with many of our students securing roles within the field or with public and private sector organisations including RIS, HSBC, KPMG and the Ministry of Defence, large and small occupational business psychology consultancies and human resources departments. The high-quality research focus means some graduates also go on to complete PhDs.

Find out more [city.ac.uk/swrp](http://city.ac.uk/swrp)

## Research Methods with Psychology
**MSc**

**Duration**
Full-time: one year

This course provides education in psychological research methods, including research design, statistical methods and relevant software. It comprises seminars, lectures, computing and statistics classes and an individual research project/dissertation.

The course draws on other courses, especially the MSc Behavioural Economics (particularly for generalised linear model training, undertaken using R® software), the MSc Clinical, Social and Cognitive Neuroscience (particularly for programming and computational modelling training, undertaken using Matlab® software) and our School-wide MSc Research Methods (particularly for qualitative methods training).

Optional modules introduce psychological content with a less methodological focus to provide students with an understanding of methodologies, from personal interviewing to large-scale survey research.

**Career opportunities**
Possible career paths for graduates of this course include academic research (usually following a PhD) or work involving central and local government agencies, public health, the voluntary sector, market/media research or management consultancy.

Find out more [city.ac.uk/ssrm](http://city.ac.uk/ssrm)

## Research Methods
**MSc**

**Duration**
Full-time: two years

The MSc Research Methods offers theoretical and applied education in research methods and analysis for the social sciences. It is designed to provide students with an understanding and appreciation of qualitative and quantitative research methods over a range of disciplines. The course consists of modules from interdisciplinary core subjects, department-specific elective modules and a dissertation comprising a piece of original empirical research. It equips students with real-world skills in collecting and analysing empirical data and reporting research findings.

MSc Research Methods is a School-wide master’s course delivered by academic staff with a diverse range of substantive research interests. Our staff are experts in a plethora of methodologies, from personal interviewing to large-scale survey research.

**Career opportunities**
There is a high demand for Research Methods graduates and there are excellent employment opportunities to work in several sectors, including academic research, central and local government agencies, public health, the voluntary sector, market and media research. The course is also an ideal foundation for students who wish to pursue doctoral research in social sciences.

Find out more [city.ac.uk/ssrme](http://city.ac.uk/ssrme)

## Research Methods
**MSc**

**Duration**
Part-time: two years

Understanding criminality and crime control in the 21st century requires researchers and professionals to think globally and work across disciplines. This course enables students to develop the theoretical understandings and methodological skills to navigate this ever-changing policy landscape.

The course develops students’ abilities to use criminological knowledge to analyse the problem of crime and crime control strategies, equipping them with the skills they require to become experts in their fields.

The course is delivered by internationally recognised criminologists who work closely with students throughout their studies. We have particular expertise in policing and surveillance studies, victimology, feminist criminology, youth cultural studies, penology, criminal justice policy, theoretical criminology and media criminology.

**Career opportunities**
Graduates pursue careers in criminal justice and related professions, both nationally and internationally. These include careers in the police, the prison service, probation or one of the many criminal justice charities based in London. Others pursue careers in research, policy development, campaigning or advocacy work.

Whatever a student’s career choice, the course team will work with them to develop the specialist skills that they require.

Find out more [city.ac.uk/ssccj](http://city.ac.uk/ssccj)

## Sociology
**MSc**

**Duration**
Full-time: one year

This long-standing and award-winning course is designed to provide students with the specialist skills that will enable them to undertake independent research at the postgraduate level.

Students are taught about the methods of social scientific research and the skills necessary for developing research projects. They are also provided with an understanding of the major theoretical and applied education in the social sciences.

**Career opportunities**
Possible career paths for graduates of this course include academic research (usually following a PhD) or work involving central and local government agencies, public health, the voluntary sector, market/media research or management consultancy.

Find out more [city.ac.uk/soc](http://city.ac.uk/soc)
Culture, Policy and Management

MA

Duration
Full-time: one year
Part-time: two years

With MA Culture, Policy and Management, students can shape the cultural and creative sector and gain experience inside leading arts organisations (London-based or international).

We have several elective modules to choose from, meaning students can customise their learning so they can become a competent professional ready to start, continue or change their career. On completion of the course, students are able to evaluate and integrate the theories and practices of culture, policy and management.

The student experience runs through everything we do on the course. The curriculum was developed in consultation with senior creative industry figures so students’ learning is attuned to the latest insights from the sector.

Career opportunities

Launched in 1974, this pioneering course has over 3,000 alumni including key figures such as Tate Britain Director Alex Farquharson and UN World Tourism Organisation Culture Adviser Jin Yung Woo.

Our graduates find employment in creative industries globally, from orchestras to film, fashion, events or museums; from marketing to policy or management. Examples include Ullens Art Centre, Beijing; Royal Opera, London; and Christian Dior, Paris.

Find out more

city.ac.uk/scpm

---

Global Creative Industries

MA

Duration
Full-time: one year
Part-time: two years

This course examines the creative industries and their interface with the wider economy at a global scale. Cultural goods and ideas are increasingly produced and consumed transnationally; however, global cultural trade flows are uneven and this has consequences for local and national development. Moreover, cultural assets are carriers of meaning and their global circulation impacts those who consume them, affecting identities and reproducing social and economic inequalities.

Taught by world experts in the field, the programme offers a unique opportunity for students to analyse the economic, social and cultural aspects of the contemporary transformation of culture and how they relate to the global and the local: how is culture produced and re-produced? What are the mechanisms of the global cultural ecosystems and markets? What are their consequences?

The course prepares students to work professionally or as academics in the expanding cultural sphere worldwide.

Career opportunities

Graduates are qualified to work in national and international institutions. Career paths include: government administration, policy, advocacy, development, mega events (Olympics, Capital/City of Culture legacy projects), academia or doctoral study.

International Communications and Development

MA

Duration
Full-time: one year
Part-time: two years

Communication is integral to development programmes. At a time when ideas about freedom of expression, democracy, human rights and access to natural and material resources guide development projects across the world, the question about the role of media and communications for social change becomes ever more pertinent.

The MA International Communications and Development provides an interdisciplinary framework to understand and critically assess the role of communications for and in development projects.

Development is taken as a contested concept that translates into courses for advocating democratic forms of participation, policy initiatives and training activities in media and communications sectors in different geographical regions.

Career opportunities

Graduates have entered a wide variety of careers in broadcasting, press and telecommunications networks, NGOs, the development sector and consultancies, advertising, marketing, politics, journalism, PR, media management and regulatory agencies.

Sir John Cass Business School has been at the forefront of business education for over 50 years. Located in the heart of one of the world’s leading financial centres, Cass is part of an elite group of business schools to have been awarded triple accreditation by the Association to Advance Collegiate Schools of Business (AACSB), the Association of MBAs (AMBA) and the European Quality Improvement System (EQUIS).

Cass Business School

Academic staff at Cass are world-leading experts in their fields of academic and applied research: they are highly sought after by companies, governments and international bodies for their specialist knowledge. Their work shapes policy, debate and business practice at the highest levels. The Faculty of Finance at Cass is one of the largest and most respected in the world and is renowned for its expertise in accounting, asset pricing, banking, corporate finance, financial markets and regulation, international finance and shipping finance. Academic staff in the Faculty of Management specialise in all areas of management studies, including strategy, entrepreneurship, corporate social responsibility, marketing, information management, organisational behaviour and human resource management.

The Faculty of Actuarial Science and Insurance, one of the leading departments of its kind, undertakes theoretical and applied research into pensions, life and general insurance and healthcare.

The last Research Excellence Framework (REF) rated 84 per cent of the research submitted by Cass as within the top two categories of world-leading (4*) or internationally excellent (3*). This placed Cass in the top six in the UK. The outcome of this independent review highlights the world-class quality of Cass research and recognises the impact it has on business, the professions and policy-makers. Postgraduate students at Cass benefit from the instruction and supervision of these pre-eminent academics, who make great contributions in advancing their specialist fields.

The master’s, MBA and PhD courses offered at Cass are consistently ranked among the best in the UK and the world. Courses are academically rigorous and characterised by a real-world approach that ensures graduates are prepared for top-flight careers in their chosen fields, whether in business, finance, entrepreneurship or academia. Each year, around 2,000 students from all over the world choose Cass for their postgraduate courses, creating a uniquely international environment in which to study, socialise and build networks that remain in place beyond graduation.

Cass blends academic excellence with extraordinary experiences and career progression to foster lifelong learning.
Master’s courses

Actuarial Management
MSc

Duration
Full-time: one year
Part-time: two years

This course is aimed at those who wish to study material relevant to the examinations of the Institute and Faculty of Actuaries.

It has been designed to meet the needs of actuarial employers and employers from other sectors requiring financial risk managers.

Emphasis is placed on skills in the areas of life and non-life insurance, pensions, finance, investment, financial risk management, consultancy and related areas. This fast-track study route allows students to gain professional qualifications before embarking upon their careers.

The course is accredited by the Institute and Faculty of Actuaries, enabling students to study the key areas of actuarial practice and gain exemptions from some subjects of the Institute and Faculty of Actuaries.

Career opportunities
There is a strong demand for graduates educated to a postgraduate degree level in Actuarial Management and members of the actuarial profession are among the highest paid in the UK. They work in fields including insurance, consulting, government, banking and investment and academia.

Recent graduates have gone on to work at Accenture, Arma Partners, Deloitte, Goldman Sachs and Willis Towers Watson.

Duration
Full-time: one year

This course reflects the wide and sophisticated range of activities within banking, a sector which has experienced dramatic development and change in recent years.

The MSc Banking and International Finance is designed to equip students for a wide range of careers in the banking and international finance sector.

Around 35 nationalities are represented in a typical intake, with the global dimension of the course further enhanced by the diverse backgrounds of the permanent and visiting academic faculty.

This international perspective adds range and depth to the student experience, while generating worldwide networking opportunities after graduation.

The course is also aimed at actuarial trainees and associates. Up to eight exemptions from core technical subjects can be gained from the system of professional examinations of the Institute and Faculty of Actuaries. This is just over half the examinations required for Fellowship saving several years of study.

Career opportunities

The actuarial profession is a small but highly respected body whose members are among the highest paid in the UK. Cass graduates work for a range of employers, including insurance companies, investment and retail banks, actuarial consultancies and government and non-government organisations.

Recent graduates have gone on to work at Aon Hewitt, Barnett Waddingham, Reliance General Insurance and Willis Towers Watson.

The MSc Business Analytics combines academic rigour with authentic experience, supporting the career progression of students aiming to generate and capture greater competitiveness in data-driven businesses.

Essential analytical skills and business knowledge are sought to improve the operational efficiency, business performance and strategic management of an organisation.

This course aims to bridge the gap between the computing function and business leaders.

The main purpose of the course is to develop a comprehensive set of skills and encourage attributes that are essential to becoming a successful business analyst. Besides promoting effective and persuasive communication, the module leaders draw attention to ethics-related issues, which are key to responsible leadership.

Career opportunities

Graduates are trained to participate in the strategic management process, improve financial performance and advise on designing effective measures of organisational performance, for which evidence-based data is a strategic asset in the decision-making process. The aim is to provide a foundation for those who will determine the scope and direction of data analytics research within an organisation.

This course offers a unique approach to global business. Students are equipped with key skills in the areas of energy and commodity economics, trading, transportation, finance and risk management.

The MSc Energy, Trade and Finance was launched in September 2003 and was the culmination of talks between Charles Daly (Chairman and CEO at Channon Consulting) and Cass about the need to provide postgraduate education to top-quality recent graduates interested in a career in the energy and commodities sector and to young professionals who wanted to consolidate their industry experience with a focused and professional master’s qualification.

The course is validated by the Energy Institute and students can become members after graduating.

Career opportunities

Graduates from MSc Energy, Trade and Finance hold key positions and have eminent careers in over 70 countries in fields such as commercial banking, commodity trading, government, investment banking, law, logistics management, management consultancy, manufacturing, shipping, finance, shipping operations, stockbroking and university research and teaching.

Recent graduates have gone on to work at BearingPoint, Cargill, Gerald UK Ltd, Macquarie, Mercuria Energy Group, Shell and Wood Mackenzie.

Entrepreneurship MSc

Duration
Full-time: one year

Created and delivered by leading academics and entrepreneurs, this degree equips aspiring entrepreneurs with the toolkit and experience necessary to successfully launch new ventures and make a significant impact in their sector.

The course is equally valuable for professionals who wish to take their career to the next level by learning how to be more entrepreneurial and creative within a large corporation.

Can entrepreneurship be taught? Yes. Just as we can educate people to become doctors, engineers and lawyers, we can train people to become entrepreneurs.

Throughout the course, students are encouraged to develop an attitude towards learning from failure and taking calculated risks. We cover challenges and risks that entrepreneurs face and ways to recover from failure.

Career opportunities
Depending on the student’s sphere of interest and expertise, potential opportunities after graduation include continuing as the founder or CEO of the venture created during their studies. This may be in a range of sectors including IT and e-commerce, banking and finance, consulting, professional services, engineering, manufacturing and retail.

Recent graduates have gone on to work at China Merchants Bank, EY, Prism Sport & Entertainment, Hays, and Square.

Executive Master’s in Leadership MSc

Duration
Part-time: two years

This course is designed for aspiring leaders and managers with a good first degree or a relevant professional qualification and at least three to five years’ work experience in a senior role. It is delivered in a flexible, block-taught format, integrating both campus and work-based learning.

Participants learn how to think and act strategically in line with their organisation’s objectives, helping them to make a real impact.

The first year covers a general management route with modules such as accounting, leadership and marketing strategy. In the second year, students can choose to follow a voluntary sector management route with modules specifically tailored to the non-profit sector.

Please note that this course is only available for study using apprenticeship levy funding.

Career opportunities
This course represents an opportunity for career development and progression to aspiring leaders within their organisation in a range of different sectors.

The voluntary sector route in the second year offers a development opportunity for staff in the charity sector.

Successful candidates will also be eligible for professional accreditation from either the Chartered Management Institute or the Institute of Leadership and Management.

Executive Master’s in Medical Leadership MSc

Duration
Part-time: two years

Grounded in research that shows medical leadership improves healthcare system performance, this advanced leadership degree is distinct in targeting doctors. It aims to develop medical leaders who can transform healthcare systems in ways that ultimately help people to live longer, healthier lives.

A key feature of the course is its dual focus on personal development and research-based conceptual knowledge. It combines master’s level learning about people, innovation and change in healthcare with students’ own development as effective leaders in a medical environment, drawing on Cass’s world-class research capabilities and experience of executive development.

This course enables students to meet the Faculty of Medical Leadership and Management’s standards for medical professionals. The course is available under the apprenticeship levy funding scheme.

Career opportunities
Outstanding doctors with leadership skills are sought after in many sectors globally. These include healthcare providers, pharmaceuticals, NGOs, social and private enterprises, insurance, medical devices, biotechnologies, health policy and regulatory organisations and management consultancy firms. Clinical consultants may migrate into senior leadership positions, GPs may progress to become practice partners and junior doctors will be primed for management.

“... The MSc Business Analytics has given me the tools to become data-savvy through the application of statistical learning methods and the use of a palate of visualisation techniques. Studying at Cass has opened doors for me into the world of data science and I am proud to have contributed to the successful delivery of a research project at the Strategy Insight Lab.”

Nikita Polukeev
MSc Business Analytics
Finance
MSc

Full-time: one year

Highly ranked by the Financial Times, this MSc Finance from Cass has the potential to open up global career opportunities for flexible, high-calibre students. This is because Cass is among the world’s most respected business schools, meeting the needs of employers with a unique blend of theory and practice. The course is designed to fit students’ career aspirations with module content regularly refined and delivered to reflect the most up-to-date industry practice. Flexibility is built into the course through a comprehensive elective offering, including several optional overseas electives in locations such as New York, Singapore and Dubai. It equips students with a broad portfolio of skills relevant to investment and risk management, business and corporate finance. Students are exposed to material on hedge fund strategies and performance, and taught to understand corporations’ capital structures and dividend payment decisions.

Career opportunities
Our graduates move into roles including financial analysis, risk management and consultancy within fields such as corporate finance, fund management and banking. Our proximity to London’s financial district provides students with unparalleled opportunities for networking. Recent graduates have gone on to work at China Merchants Bank, Dimensional Fund Advisors, Morningstar, Rolls Royce, Société Générale and State Street Corporation.
International Accounting and Finance
MSc

Duration
Full-time: one year

The MSc International Accounting and Finance prepares students for leading roles in the global investment community and within commercial entities. It provides students with combined expertise in accounting and corporate finance.

Starting with basic principles of accounting and finance, students learn how to assess performance and conduct valuations of firms using complex financial accounting information. In addition, the course provides insights into company strategies and how to manage cost systems. Students also acquire the research skills necessary to undertake valuation.

There is a wide range of elective modules, including the option of studying for a Certificate in International Financial Reporting Standards issued by the Institute of Chartered Accountants in England and Wales.

Career opportunities
Graduates move into a diverse range of careers in the financial sector, particularly roles as analysts in accounting firms, corporate finance, auditing, regulatory bodies and consultancies.

Recent graduates have gone on to work at Asia View Capital, EV, HSBC, KPMG, Moody’s Investors Service, PwC and SWS Research.

International Business
MSc

Duration
Full-time: one year

The course equips students with relevant tools for international business career success by offering specialisations in core functional areas of their choice. The course has a strong experiential element, including study tours abroad.

Students will also appreciate the social impact that business has in society. This is especially pertinent in the backdrop of the current anti-globalisation drivers and the accelerating digital transformation of business.

The course offers core modules in term one and options to customise the intellectual journey in terms two and three. In term three, students have a large range of international electives to choose from and an internationally focused business research project.

Career opportunities
Recent Cass business graduates have found roles in a variety of industries including creative, high technology, hospitality, finance, fast-moving consumer goods, media and entertainment, luxury goods and real estate.

Investment Management
MSc

Duration
Full-time: one year

The MSc Investment Management is founded on three principles: academic rigor, relevant knowledge and a professional orientation. Students acquire a sound knowledge of the foundations that underpin modern investment and risk management techniques.

These principles are applied in practice through case studies and the use of online databases such as Bloomberg and portfolio management simulation exercises. The professionally orientated aspect of the course is delivered by academics with significant industry experience and leading industry practitioners, providing a vital link between theory and practice.

The course is a Chartered Financial Analyst Institute Programme Partner and is accredited by the Chartered Institute for Securities & Investment, the Chartered Insurance Institute and the Chartered Alternative Investment Analyst Association.

Career opportunities
Graduates work as traders, fund managers, risk managers, security analysts, brokers and corporate treasurers.

Recent graduates have gone on to work at Barclays, Citi, Grant Thornton, Invesco PowerShares, Liberty Specialty Markets and Terra Capital Advisory.

Marketing Strategy and Innovation
MSc

Duration
Full-time: one year

This course equips students with the analytical capabilities needed to deal with complex marketing issues. The MSc Marketing Strategy and Innovation also instils essential ‘soft’ skills – including creativity, initiative, persistence, team-working, communication and leadership required to influence people and organisations.

Providing an academically rigorous and professionally relevant education, this course combines sound theoretical foundations in marketing and innovation with a deeper examination of key topics such as brand management, digital marketing and consumer behaviour.

Crucially, the course enables students to harness the latest digital technology in the pursuit of effective solutions. A strong professional dimension includes opportunities to tackle real-world marketing problems, enter competitions and the possibility to undertake an international trip.

This course comprises core modules in terms one and two followed by two core modules and a business research project or three electives in term three.

Career opportunities
Recent graduates have gone on to work at Intercontinental Hotels Group, Lazada Group, LOKimedia, Simon-Kucher & Partners and Sky.

Mathematical Trading and Finance
MSc

Duration
Full-time: one year

This course offers students who already have good mathematical skills a solid foundation in financial mathematical theory and practice. It combines academic rigour with strong professional application. This enables students to participate fully in the ever-changing derivatives market, where financial innovation and globalisation have created new investment opportunities, risks and instruments.

Students acquire a sound knowledge of mathematical finance, stochastic calculus, derivatives valuation, financial engineering, quantitative risk modelling, numerical methods and econometrics.

Career opportunities
This course equips students with all the skills required in front and middle office roles. Asset management, risk management and analyst roles are well suited. Some students also take on trading positions.

Recent graduates have gone on to work at Credit Agricole, Dromeus Capital Management (UK), HSBC, Global Market Solutions and VTB Capital.

Our work is transforming the provision of healthcare services in the UK and internationally.

School of Health Sciences

The School of Health Sciences offers a variety of master’s courses providing an opportunity for graduates and healthcare practitioners to develop their skills and advance their careers. We also offer research degrees at master’s and PhD levels, enabling graduates to have a direct impact on healthcare policy, services and practice.

Graduate entry courses include pre-registration MSc degrees for students who have previously gained an undergraduate degree, while the Midwifery, Primary Care (Practice Nursing) and Public Health (School Nursing, Health Visiting and District Nursing) courses allow registered nurses to gain a second registration.

Scholarships for both home and international students are available for our master’s courses, including the Dean’s Scholarship for Academic Excellence and the School’s International Excellence Scholarship. More details can be found on our website: www.city.ac.uk/health

The School delivers world-leading research in healthcare that impacts policy, service delivery, practice and education in the UK and overseas.

The last Research Excellence Framework rated 82 per cent of its submitted research activity, 100 per cent of its research environment and 100 per cent of its research impact case studies as either world-leading (4*) or internationally excellent (3*).

Research is often multidisciplinary and involves partnerships with service users, NHS Trusts, local authorities, government bodies, non-governmental and third-sector organisations. Examples of the School’s research include nursing and midwifery investigations into reform in maternity and women’s health and service user involvement in mental healthcare. In health services research, academic staff are engaged in implementation research, studies looking at complex interventions, clinical communication, technology-enabled healthcare, care of the elderly and long-term conditions such as dementia. Research within the area of optometry and visual sciences includes the early detection of glaucoma and age-related macular degeneration, occupational vision assessment and ophthalmic public health and more fundamental studies in visual psychophysics, neurobiology and visual optics. Within language and communication sciences staff have conducted groundbreaking research into new forms of therapy for people with aphasia, innovative collaborative work in education with adolescents with language and communication difficulties and have developed language and communication skills among deaf and hearing-impaired children.

We are ranked first in London for Nursing (The Times and Sunday Times Good University Guide 2019) and first in London for Medical Technology (The Complete University Guide 2020).

www.city.ac.uk
Graduate entry courses

Adult Nursing (Pre-Registration)*
MSc

Duration
Full-time: minimum two years

This course is designed to enable students to lead, manage and support evidence-based care for people of all ages with predominantly physical health needs or disabilities using appropriate assessment, diagnostic and decision-making skills. Their focus is on managing the care of adults with particular attention to the needs of an ageing population. Students learn to practise autonomously and demonstrate professional integrity by working within recognised professional, ethical and legal frameworks.

Adult nurses are able to work in partnership with service users, their families and friends to support and promote health and wellbeing using excellent communication skills in order to develop therapeutic and compassionate relationships and promote person-centred care.

Career opportunities
Graduates have excellent career prospects and frequently secure employment in hospital and community settings including: Barts Health NHS Trust, Homerton University Hospital NHS Foundation Trust, University College London Hospitals NHS Foundation Trust and the North Middlesex University NHS Trust. Nursing is a lifelong career where students can develop their skills and interests within a range of specialisms.

*At the time of printing (July 2019) this course was subject to Nursing and Midwifery Council approval after changes in national educational standards. Please visit our website for up-to-date course information.

Adult and Mental Health Nursing (Pre-Registration)*
MSc

Duration
Full-time: three years

This innovative course prepares students to lead, manage and support evidence-based care for people of all ages with both physical and mental health needs. This is a combined course, where on successful completion students are eligible to register with the Nursing and Midwifery Council as a registered nurse in the mental health and adult field of nursing. Students graduate with the skills and knowledge needed to equip them to support the delivery of quality healthcare in a contemporary health service.

Mental illness has a huge impact on the physical health of an individual. People with a mental health condition are at a higher risk of experiencing physical health problems, such as diabetes and heart conditions. In addition, people with long-term physical health conditions are more likely to suffer from mental health issues, particularly depression.

Career opportunities
Graduates have excellent career prospects in the NHS and independent sector hospitals and community settings. These include Barts Health and North Middlesex University Hospital NHS Trusts, Homerton University Hospital and Great Ormond Street Hospital for Children NHS Foundation Trusts. Children’s nursing is a lifelong career and qualified children’s nurses can develop their skills and interests in a range of specialisms.

*At the time of printing (July 2019) this course was subject to Nursing and Midwifery Council approval after changes in national educational standards. Please visit our website for the most up-to-date course information.

Children’s Nursing (Pre-Registration)*
MSc

Duration
Full-time: minimum two years

Children’s nurses must be flexible and resilient with excellent communication skills as they care for children and young people with acute or long-term health problems, mental ill-health, special needs or terminal illness. This care extends to supporting families and the wider community to promote health and wellbeing.

Students combine theoretical study (50 per cent) with clinical experience (50 per cent), working with diverse populations in hospitals and community settings.

Students learn through lectures, facilitated group work, simulated practice, interprofessional learning and evidence-based learning opportunities. Practice is assessed through partnership working between the student, the student supervisor, the practice and academic assessors.

Career opportunities
Graduates have excellent career prospects in the NHS and independent sector hospitals and community settings. These include Barts Health and North Middlesex University Hospital NHS Trusts, Homerton University Hospital and Great Ormond Street Hospital for Children NHS Foundation Trusts. Children’s nursing is a lifelong career and qualified children’s nurses can develop their skills and interests in a range of specialisms.

*At the time of printing (July 2019) this course was subject to Nursing and Midwifery Council approval after changes in national educational standards. Please visit our website for the most up-to-date course information.

Primary Care (Practice Nursing)
MSc

Duration
Full-time: two years
Part-time: three years

Primary care is experiencing an unprecedented cycle of change. Developments in structure, administration and roles all have implications for practitioners employed within this sector. Health policies have led to the need for increasing numbers of general practice nurses (GPN) to meet the service needs of clients. It is the diversity of services now available within primary care that has led to increasing educational and training needs for the GPN.

By undertaking this course, students develop a systematic, inquiring and in-depth knowledge of their discipline. They are able to develop competence and expertise for their practice, drawing on research and contemporary sources of evidence to underpin their clinical engagement as a GPN.

Career opportunities
Completion of the MSc will enable those GPNs to develop higher-order critical skills, which will enhance their clinical practice, underpinned by a strong evidence base. Upon completion of the course GPNs may choose to specialise in specific clinical areas, especially the care and management of long-term conditions.

Midwifery
RM/PGDip

Duration
Full-time: 90 weeks

The Postgraduate Diploma in Midwifery offers a fast-track route to a rewarding and challenging career as a midwife. The course prepares qualified adult nurses who have at least six months’ practice experience to become qualified midwives.

Our staff are at the forefront of the latest healthcare developments through their academic, clinical and research activity. Students prepare for the clinical environment in City’s state-of-the-art simulated ward, while clinical placements take place in some of the busiest and most diverse maternity units in the country.

Students are allocated to a clinical area, where they take on a small caseload of women and are supported by qualified mentors. Clinical placements are based in all areas of maternity services, including community clinics, birthing centres, antenatal clinics, delivery suites, antenatal/postnatal wards and women’s homes.

Career opportunities
Midwives enjoy excellent career opportunities within the NHS and private organisations both in the UK and overseas.

Graduates can work within the NHS in the community, birth centres or hospitals, or independently.

Students can upgrade the Postgraduate Diploma to an MSc following their final year.

Mental Health Nursing (Pre-Registration)*
MSc

Duration
Full-time: minimum two years

This course is tailored to enable students to develop appropriate assessment and decision-making skills to meet the physical and mental health needs of those diagnosed with mental health issues. There is a clear focus on promoting social inclusion, human rights and research, while developing competence in a range of psychological and psychosocial interventions.

Students learn skills to work in partnership with service users, their families and friends to support and promote health and wellbeing. They gain appropriate communication and self-awareness skills to develop therapeutic relationships and to promote person-centred care.

Students learn through lectures, facilitated group work, interprofessional learning and evidence-based learning opportunities. Practice is assessed through partnership working between the student, the student supervisor, the practice and academic assessors.

Career opportunities
Graduates have excellent career prospects in the NHS and the private sector. There are a number of specialisms available, including the East London NHS Foundation Trust where they take on a small caseload of women and are supported by qualified mentors. Clinical placements are based in all areas of maternity services, including community clinics, birthing centres, antenatal clinics, delivery suites, antenatal/postnatal wards and women’s homes.

Career opportunities
Midwives enjoy excellent career opportunities within the NHS and private organisations both in the UK and overseas.

Graduates can work within the NHS in the community, birth centres or hospitals, or independently.

Students can upgrade the Postgraduate Diploma to an MSc following their final year.

Primary Care (Practice Nursing) PGDip

**Duration**
- Full-time: one year
- Part-time: two years

The Postgraduate Diploma Primary Care (Practice Nursing) has been designed for registered nurses who are currently on the Nursing and Midwifery Council register and are employed as practice nurses with a 1st or 2:1 degree. This course equips students with contemporary theoretical and evidence-based skills and knowledge to enhance and develop their professional practice within the general practice setting.

A unique feature of this course is the option for students to exit with a Postgraduate Certificate (PGCert) Primary Care (Practice Nursing).

Students can also undertake a dissertation module to obtain their MSc Primary Care (Practice Nursing), after completion of the PGDip Primary Care (Practice Nursing) course.

**Career opportunities**
Completion of this course enables practice nurses to begin to develop higher-order critical and enhanced clinical skills, which will enhance their clinical practice, underpinned by a strong contemporary evidence base. Furthermore, this will enable those practice nurses who have completed the PGDip to negotiate a higher salary in their current post by extending their leadership and clinical skills.

Find out more city.ac.uk/hpcp

Public Health (School Nursing, Health Visiting and District Nursing) PGDip/MSc

**Duration**
- Full-time: one year
- Part-time: two years

The course enables registered nurses and midwives to enhance their knowledge and broaden their skills to improve health within communities.

School and district nurses and health visitors all need the skills and knowledge to effectively lead, manage, plan and evaluate care. They lead a team and develop effective, enduring relationships with groups, communities and individuals, work in partnership with many agencies and deal with conflicting priorities and complex situations.

The course meets these requirements through practice and campus-based learning. Students undertake a public health trajectory which considers health attainment, promotion and illness prevention in the context of local, national and international public health and primary care policy and practice.

**Career opportunities**
Completion of School Nursing and Health Visiting routes make graduates eligible to apply for second registration on the Specialist Community Public Health Nurse part of the Nursing and Midwifery Council (NMC) register. Completion of the District Nursing route makes graduates eligible to apply for a record of a Specialist Practice (District Nursing) qualification with the NMC. Successful students work for various healthcare providers; many later move into education, management and research.

Speech and Language Therapy MSc

**Duration**
- Full-time: two years

This intensive course is suited to students who are committed to a career in speech and language therapy and who have already completed an undergraduate degree. Students learn a range of subjects that inform their understanding of typical speech, language, communication and swallowing and of pathologies in these areas. Students integrate theoretical and real-world knowledge in considering approaches to the assessment and management of clients with communication and swallowing problems and in taking a holistic approach to clients’ needs. Clinical placements within a range of settings constitute an integral part of the course.

The MSc Speech and Language Therapy is accredited by the Royal College of Speech and Language Therapists and approved by the Health and Care Professions Council (HCPC), which is the UK-wide regulatory body for healthcare professions.

**Career opportunities**
Completion of this course enables speech and language therapists to begin to develop higher-order critical and enhanced clinical skills, which will enhance their clinical practice, underpinned by a strong contemporary evidence base. Furthermore, this will enable those graduates who have completed the MSc to negotiate a higher salary in their current post by extending their leadership and clinical skills.

Find out more city.ac.uk/hslt

“I completed my undergraduate degree at City and I am back for a master’s in Speech and Language Therapy, which itself speaks of my experience here. The staff are supportive and they go the extra mile to ensure we are all doing well.”

Postgraduate Prospectus 2020/21
### Clinical Research
**MRes**

**Duration**
- Full-time: one year
- Part-time: two years

Knowledge and critical understanding of clinical research methods is becoming increasingly important for all professionals in the health and social care sector, where an evidence-based approach supported by academic rigour, is crucial to decision-making, clinical practice and guidance.

The course provides students with education in quantitative and qualitative research methods and applied data analysis from basic to advanced levels.

It aims to enable students to independently design, develop and conduct research relevant to clinical practice, appraise current research, apply findings to the delivery of health services in clinical practice and develop a collaborative, interdisciplinary and ethical approach to research and practice.

The course is suitable for healthcare professionals in primary care or allied health disciplines working in clinical research and students aspiring to work in this field.

**Career opportunities**

The course gives students the research and academic education to become a clinical academic researcher across all health and social care settings. Graduates gain vital transferrable skills which are applicable to all health and medical-related careers.

Find out more [here](city.ac.uk/hcre)

### Food Policy
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

Students gain in-depth knowledge of policies that affect activities related to producing, processing, distributing, marketing, preparing and consuming food. This holistic approach makes the course unique. Students gain a critical understanding of the social, nutritional, health and environmental implications of all these different elements of the food system, at local, national and international levels.

The course is interdisciplinary, drawing on disciplines including sociology, politics, economics, geography, epidemiology and health sciences. It aims to enable students to consider how food policy could better address the totality of the challenges posed by modern food systems and to empower them to formulate solutions. It addresses the major food questions of our time: How can policy be used to feed people healthily, sustainably, equitably and affordably? Why is this not happening?

**Career opportunities**

This course has been running for 20 years and has a thriving community of alumni working in very diverse sectors. Some work for government departments in the UK and abroad or international organisations, such as the FAO. Many work for (and often lead) civil society organisations campaigning for change in the food system. Others have established their own companies as food entrepreneurs. Students may also continue to a PhD.

Find out more [here](city.ac.uk/sfop)

### Health Management
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

The MSc Health Management has a three-decade track record of developing leaders in management and consulting roles, in healthcare and pharmaceutical companies.

Learning emphasises enterprise, innovation, consultancy and builds on the opportunities London offers as a leading global health centre. The approach is international in outlook. Academics include leaders from health industries and scientific communities who share their experiences of change and innovation and insights on future trends.

Collaborative projects put into practice organisational leadership and influencing skills to create value in a range of health sectors. These include a management consultancy project with business clients.

The course develops inspirational leaders who can ensure decisions are translated quickly into action and achieve the exceptional from the everyday.

**Career opportunities**

Healthcare and pharmaceutical companies value skills in strategy, innovation and change leadership, management consultancy and economic evaluation.

The MSc Health Management internship programme and enterprise projects offer opportunities for gaining health sector experience, building students’ CVs and initiating their next career moves.

Find out more [here](city.ac.uk/hman)

### Health Policy
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

Health and healthcare have risen to the top of political agendas around the world. People are living longer and expecting more from their health services. Medical technology is advancing rapidly, creating ever-increasing demand for the latest treatments. Health policy affects (and is affected by) all of these factors.

This course gives students the knowledge and tools they need to understand and influence the health policy process and to operate within an increasingly complex policy environment. They analyse the social, political and economic factors that affect policy, how policy is made and who the key players are.

The course combines an international focus and academic rigour with the development of skills, which can be applied in a wide range of health policy, planning and management settings.

**Career opportunities**

With health and healthcare recognised as such high priorities around the world, health policy specialists continue to be in high demand.

Graduates have gone on to a range of policy, campaigning/advocacy and research roles within the public sector (such as the NHS). NGOs and third-sector organisations campaigning for change in the food system. Others have established their own companies as food entrepreneurs. Students may also continue to a PhD.

Find out more [here](city.ac.uk/hpol)

### Health Psychology
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

The MSc Health Psychology is a British Psychological Society accredited course and the first stage in becoming a qualified health psychologist.

Health Psychology is the study of psychological and behavioural processes in health, illness and healthcare. It is concerned with understanding how psychological, behavioural and cultural factors contribute to physical health and illness. Chartered health psychologists use their knowledge of theory and practice to promote wellbeing and understand physical illness, while promoting healthier lifestyles.

The course aims to provide students with in-depth knowledge and understanding of health psychology, informed by current scholarship and research, including critical awareness of current issues and developments in the field.

**Career opportunities**

The course constitutes the first stage in becoming an academic or practitioner health psychologist. Upon successful completion of the course, graduates are eligible to apply for stage two training in health psychology.

Graduates have gone on to complete PhD Health Psychology and take positions as academic research assistants, assistant psychologists in an applied setting, smoking cessation officers, public health and health promotion practitioners in the NHS and third-sector organisations.

Find out more [here](city.ac.uk/hpsy)

### Leading Integrated Care*
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

This course is aimed at professionals from both clinical (e.g., medical, nursing and allied health professionals) and non-clinical (e.g., commissioners, managers and policymakers) backgrounds working within health or social care organisations who wish to develop their knowledge, understanding and skills relating to integrated and person-centred care.

The course is designed to meet the professional needs of those who are either already occupying leadership or management roles or who wish to move into such roles and are interested in leading integrated care initiatives for the benefit of their local populations, service users and carers and organisations.

In addition to the core skills required to plan and lead an integrated care initiative, the transferable skills that students acquire include: leadership and project management; networking; critical reflection; presentation and team working skills.

**Career opportunities**

In the current context where integrated and person-centred care are increasingly high priorities for policy-makers and organisations, the course offers career prospects in health and social care, where graduates will be able to develop and lead change in their area of practice to enhance the development and provision of integrated services.

*At the time of printing (July 2019) this course was subject to approval. Please visit our website to ensure it is available for 2020/21.

Find out more [here](city.ac.uk/hlic)
Interprofessional courses

Master in Public Health
MPH

Duration
Full-time: one year
Part-time: two years

The Master in Public Health (MPH) provides cutting-edge knowledge of evidence-based practice and research methods for leading public health initiatives.

The course is ideal for those who aspire to address contemporary health challenges at local, national and international levels. It is global, interdisciplinary and has a distinct focus on social, political and economic determinants of health, including mental health.

The course provides a thorough professional and theoretical grounding in public health sciences, enabling students to further the protection and improvement of population health at the local, national and international level.

Students gain the skills and confidence to independently lead public health projects and investigations in public or private sector settings.

Career opportunities
The MPH is the most widely recognised professional qualification for leadership in public health. Our graduates work globally in both private and public sectors including the NHS, international agencies, charities, government and academic environments.

Students gain vital transferable skills, which are applicable to all health-related careers where attention to detail, conducting research and evaluation for evidence-based practice and report writing are an advantage.

Find out more
city.ac.uk/haph

Advanced Clinical Practice
PGDip/MSc

Duration
Part-time: two to four years (PGDip),
three to five years (MSc)

We offer both MSc Advanced Clinical Practice and MSc Advanced Clinical Practice Apprenticeship. These interdisciplinary courses prepare students to become competent Advanced Clinical Practitioners (ACP) by developing their core capabilities and specialty-specific competencies across the four pillars: clinical practice, leadership and management, education and research. The courses have been designed by senior clinicians to equip students with the knowledge, skills, values and attitudes (behaviours) to meet the requirements of the Multi-Professional Framework of Advanced Clinical Practice introduced by Health Education England in 2017.

Students develop the skills to safely assess, diagnose and treat or refer patients presenting with complex problems within their scope of practice. A minimum of three years, clinical experience and employer support is required for students to enter the course.

Career opportunities
Graduates will be able to undertake an ACP role within their specialty, setting or sector.

Future career options cross the span of the four pillars and may include senior ACP, consultant practitioner, senior leadership, clinical educator and research roles. Graduates may also choose to undertake doctoral education or enter a clinical academic career pathway.

Advanced Practice Health and Social Care
MSc

Duration
Full-time: one year taught course plus up to one year for the dissertation
Part-time: two years taught course plus up to one year for the dissertation

This course is flexible and professionally orientated for all health and social care professionals. It seeks to prepare a research-focused workforce that will help revolutionise health and social care to meet society’s changing health needs by using new technologies and more innovative and creative working practices.

Students are prepared for new, efficient and ethical ways of working that will offer better quality management by placing service users and carers at the centre of the service.

Compulsory modules are kept to a minimum, enabling students to tailor the course to meet their professional goals.

The course offers education in the latest theoretical developments and enhances research and critical thinking skills. It provides the opportunity to conduct research under expert supervision, laying the foundations for independent practice and research in the future.

Career opportunities
This course enhances professional skills in practice, research and educating. It is particularly suitable for those professionals who have specific, specialist requirements. Successful completion of the course will enhance students’ prospects when applying for posts in management, education and social support, in a range of public and private settings.

Language and Communication Science

Speech, Language and Communication Needs in Schools: Advanced Practice
MSc

Duration
Full-time: one year taught course plus up to one year for the dissertation
Part-time: two years taught course plus up to one year for the dissertation

Career opportunities
This course offers a flexible, professionally orientated course for speech and language therapists and other graduates from related fields.

Students gain specialist knowledge about disorders of communication and swallowing and develop skills in research methods and critical appraisal. Optional modules integrate learning from allied disciplines such as mental health.

All learning draws on the latest research and makes strong connections with clinical practice.

Students learn from clinical and research leaders and service users. They can study for the full MSc, a PGDip (omitting the dissertation) or a PGCert (four modules).

Career opportunities
This course is for qualified speech and language therapists who wish to enhance their careers or progress into research. It qualifies students for posts in the UK and abroad that require a master’s level degree and for specialist clinical positions. The course is ideal for other graduates seeking a research career in the field of communication disorders. Alumni have progressed into senior clinical roles, doctoral study and research posts.

Midwifery

Speech, Language and Communication Science

Advanced Practice Health and Social Care
MSc

Duration
Full-time: one year taught course plus up to one year for the dissertation
Part-time: two years taught course plus up to one year for the dissertation

Career opportunities
This course enhances skills and knowledge in leadership and clinical practice and can lead to posts in administration, management and clinical practice in a variety of different public and private settings. Specialist routes can strengthen both professional practitioners who have a commitment to the enhancement of personal and professional development in their own area of professional and/or clinical practice. For those working in areas of specialism (neonatal, cardiac, intensive care and midwifery), the course allows for subject-specific modules to be taken as part of this Postgraduate Certificate.

Students gain specialist knowledge about disorders of communication and swallowing and develop skills in research methods and critical appraisal. Optional modules integrate learning from allied disciplines such as mental health.

All learning draws on the latest research and makes strong connections with clinical practice.

Students learn from clinical and research leaders and service users. They can study for the full MSc, a PGDip (omitting the dissertation) or a PGCert (four modules).

Career opportunities
This course is for qualified midwives who have at least one year of experience in clinical midwifery practice.

It provides the opportunity to create a challenging and rewarding course of study tailored to students’ personal development needs. Compulsory modules are kept to a minimum with a wide range of optional modules allowing students to personalise their learning.

Career opportunities
This course allows practitioners flexibility in developing specialist skills and knowledge at a highly demanding academic and professional level. It prepares students for a range of roles, including midwife consultant and jobs in clinical leadership.

This course is flexible and professionally oriented to nurses working in ophthalmic health and eye care. Changes in healthcare needs have led to the use of new technologies and more innovative and creative working practices.

This course prepares a specialist research-focused workforce to help revolutionise health and social care provision. It introduces new, efficient and ethical ways of working that will offer better quality of life and care by placing service users and carers at the centre of decision-making and service redesign. It enables students to respond better to pressures within the current healthcare system.

Learning concentrates on the latest theoretical and clinical developments relating to ophthalmic nursing. The course develops students’ research skills and critical thinking and provides the opportunity to conduct a research project under expert supervision.

**Career opportunities**

This course enhances skills in practice, teaching and research leading to roles in nurse management and as advanced nurse practitioners in ophthalmology in a range of public and private settings. It is suitable for ophthalmic nurses considering a post in research.

Preparatory optometrist to provide enhanced clinical care to patients, this course emphasises the co-management of patients and the expansion of the optometrist's role in ocular therapeutics.

This MSc Clinical Optometry has an international reputation for quality and is at the forefront of professional clinical optometry education.

The course is accredited for the General Optical Council’s Continuing Education and Training points and includes the College of Optometrists’ Professional Certificates in Glaucoma, Medical Retina, Paediatric Eye Care and Visual Impairment. Prescribing modules are accredited by the General Optical Council with content forming the theory for the College of Optometrists’ Common Final Assessment in Independent Prescribing.

**Career opportunities**

Optometrists are equipped to provide enhanced clinical care to patients, particularly in the field of ocular therapeutics. They can choose to become an additional supply or an independent prescribing optometrist as part of the course training. Students can opt to complete the College of Optometrists’ Professional Certificates in Glaucoma, Medical Retina, Paediatric Eye Care and Visual Impairment.

As the original provider of legal education, established 170 years ago as the Inns of Court School of Law, The City Law School has unmatched experience and a highly respected reputation. We are based in the City of London, home to the most prestigious law courts, legal firms and headquarters of international human rights organisations.

The City Law School

Postgraduate students at all levels benefit from the research expertise and practice experience of the School’s academic staff, many of whom are leading experts in their fields. The Graduate Diploma in Law and the Graduate Entry LLB allow graduates who have completed a non-law degree. The Legal Practice Course (LPC), has a worldwide reputation for excellence and equip students with the skills and knowledge required for legal practice.

The Graduate Diploma in Law (GDL) and the Graduate Entry LLB allow graduates who have completed a non-law degree. The Legal Practice Course (LPC) has a worldwide reputation for excellence and equip students with the skills and knowledge required for legal practice.

Finaly, LLM, MPhil and PhD courses allow students to deepen their understanding of particular areas of law while retaining the practice focus that is one of the hallmarks of the School’s approach. City students learn from great legal minds. Our academics are passionate and knowledgeable; producing world-leading research and shaping legal and judicial policy in the UK and across the globe. Our courses are designed to prepare students for a successful career in the legal profession or within another sector. From 2020 we will occupy a brand new building with facilities designed to reflect developments in the sector.

While the School acknowledges its history, it also recognises the need to be at the cutting-edge of the changing landscape of legal education and has successfully launched several new initiatives. For example, the Distance Learning LLM in International Business Law has allowed us to develop our expertise in new modes of delivery.

The City Law School is working hard to become a truly leading law school within a decade, with help from its extended community of stakeholders.
Graduate courses

Graduate Diploma in Law (GDL)

Duration: Full-time: one year

The GDL comprises the seven core foundation subjects normally covered in a qualifying law degree and which are prerequisites for taking the professional legal courses. The course has an unrivalled reputation within the profession for the quality of education, the ability of its students and the professional input it provides for students seeking pupillage or a training contract.

The course is for non-law graduates and is delivered by the School’s own academic and visiting staff from other prestigious universities. In addition to the foundation subjects, students take another academic law subject unique to City: Introduction to legal ethics. This subject directs students’ attention to the ethical challenges which lawyers might face in practice and to the values which characterise the profession.

Students have the option to convert their GDL into an LLB degree by taking later law modules.

Career opportunities

Successful completion of the GDL qualifies students to progress on to the LPC for intending solicitors or the BVC Vocational Studies for intending barristers. As with the qualifying law degree, the GDL can prepare students for a range of non-legal career paths within the civil service, financial companies and more. Expert advice is available from personal tutors and City’s Careers Service. This service can provide support for applications, organise mock interviews and give advice on job-searching techniques.

Graduate Entry LLB

Duration: Full-time: two years

This is a senior status law degree, which allows non-law graduates to achieve an LLB law degree in just two years.

Students have the opportunity to gain skills and knowledge in core legal subjects and specialist areas of law.

In year one, candidates study four of the seven core foundation subjects usually covered in an undergraduate law degree. In year two, students take the remaining three core subjects and have the opportunity to enhance their knowledge of particular areas of law by choosing six elective modules.

This degree attracts international students from around the world, Canada in particular. Canadian law-specific electives can be chosen in year two.

There are opportunities for students to develop legal skills in mooting, legal writing and take part in various pro bono projects.

Career opportunities

Successful completion of this course qualifies students to progress to one of the two professional courses all UK lawyers are required to take: the LPC for solicitors or the BVC/C for barristers. Students can also pursue a Master of Laws qualification.

As with the three-year LLB, this degree can help students to pursue non-legal careers in civil service, financial organisations and other industries.

Professional legal training

Legal Practice Course (LPC)

Duration: Full-time: one year

This course is designed to ensure students are fully prepared to meet the demands of the modern legal profession. Delivered by experienced legal practitioners, the course comprises two stages: Stage One provides students with essential skills and knowledge and Stage Two allows students to enhance their knowledge in three specialist areas.

There are three Legal Practice Course routes. If students successfully complete the compulsory taught element of the course (Stage One and Stage Two) they will be awarded the Postgraduate Diploma. This is the compulsory vocational qualification required as part of students’ training to become a solicitor and be eligible to be admitted to the Roll of Solicitors of England and Wales. Alternatively, students may choose to complete the additional practice-focused dissertation to achieve a master’s degree.

Students may also undertake Stage One only. If they do so, they will be awarded the Postgraduate Certificate but will not be eligible to be admitted to the Roll of Solicitors of England and Wales without also completing Stage Two. Students can participate in a wide variety of pro bono schemes and be part of the LPC Mentor Programme.

Career opportunities

Students progress to a wide variety of firms both in London and beyond. They are assisted by the Training Contract Advisory Service who help with CV, cover letters and interviews. There are opportunities for students to enhance their CVs through pro bono schemes and external competitions.

Master’s courses

International Business Law (Distance Learning)

Duration: Part-time: two years

This course is distance learning.

This flexible, part-time course is designed to provide students with specialist knowledge and will help to broaden existing knowledge of the legal rules which impact on international business. Students acquire legal and research skills to help enhance career prospects as international business professionals or legal practitioners.

As the course is delivered online, students have the freedom to study in their own working environment and at their individual pace. Technology-enhanced learning environments support the student experience and allow students’ expansive range of legal databases, including e-journals and e-books.

Students receive access to study materials and are encouraged to explore and identify areas for research and reflection, with the course typically being completed over six to eight academic terms (or a calendar year). An accelerated route is also available, with students studying the course over four terms.

Career opportunities

By the end of the course, students will have gained specialist knowledge in key areas of law from an international business perspective and acquired transferable skills essential to develop a career in international business or law.

Students who complete the course may wish to continue their advanced legal studies on the LLM or MPHip courses offered by The City Law School.

Find out more

city.ac.uk/lilbl

Legal Practice

Duration: Full-time: six months

Students who studied the Legal Practice Course (LPC) prior to 2017/18 at City can convert their LPC into an LLM Legal Practice. City’s LPC is delivered at master’s level rather than degree level, allowing students to gain an LLM by completing an additional dissertation after their LPC.

This LLM satisfies all the requirements of a traditional LLM, with a focus on professional practice. The course gives students the opportunity to strengthen their knowledge and understanding of a specific area of professional legal practice.

Students make a written proposal for their dissertation and undertake research in an area of choice related to legal practice, procedure or skills.

Please note that the LLM Legal Practice is also included in the LPC course fee and the dissertation must be undertaken after students have completed the LPC. This LLM is only available for those who studied their LPC at City prior to 2017/18. It must be completed within five years of completing the course.

Career opportunities

This course has been developed to enhance the employability of its graduates. Students who have a training contract can use the dissertation to demonstrate commitment to an area of practice. Students seeking a training contract or pursuing an alternative legal career can use the qualification to strengthen their CV and improve employability prospects.

city.ac.uk/lilp

Maritime Law (Dubai)

Duration: Full-time: one year

This course offered in Dubai, is designed to benefit experienced professionals involved in the shipping sectors and those companies that provide services to the shipping industries.

The LLM Maritime Law gives shipping professionals exposure to international maritime and trade law, while legally qualified professionals will benefit from the specialist nature of the course. Non-legal professionals involved in the maritime sector will gain deep insights into the practical workings of maritime and trade law.

The course is delivered in intensive block format by our own UK-based faculty and by scheduled weekend classes. It welcomes applicants who have a good degree in any related discipline and/or relevant work experience.

Career opportunities

A specialist qualification in international maritime law will undoubtedly enhance career prospects. With this course, graduates will be equipped to work in and/or enhance their career prospects in a variety of sectors and job roles, including the civil service or government, insurance companies, law firms, maritime regulators, ports and terminals, shipbrokers, shipping companies and more.

city.ac.uk/madu
Maritime Law
LLM

Duration
Full-time: one year
Part-time: two years

This course is academically demanding and beneficial for anyone working in the shipping industry.

It provides a detailed understanding of maritime law and issues relating to the shipping market, allowing students to build on existing knowledge and enhance their career prospects.

Delivered in the Lloyd’s Register building in Piraeus, Greece with access to the Laskaridou Library, the course is delivered in English in weekend blocks by British academics, legal practitioners and specialist maritime lecturers from around the world.

Career opportunities
The LLM Maritime Law provides students with a sound basis for developing a career in shipping and maritime law, whether it is with a national or international firm or in-house.

Students who complete the course may wish to continue their academic studies by enrolling in a PhD or MPhil offered by the School.

city.ac.uk/lmlg

Master of Laws
LLM

Duration
Full-time: one year
Part-time: two years

The LLM Master of Laws has a flexible, professional and global focus designed to deepen students’ knowledge and fulfil career aspirations.

The course showcases current legal debates, exposing students to legal practitioners and leading academics. Students gain the skills needed to tackle complex legal problems within chosen subjects, with a unique chance to specialise in cutting-edge legal areas.

The LLM Master of Laws offers extensive choice when it comes to student learning. Students can opt for a general Master of Laws degree by selecting courses from the wide-ranging list of modules or pursue one of several specialisms, such as international commercial law, international banking and finance law, international energy law and regulation, public international law and more. Students can build their learning around their academic and professional goals.

Career opportunities
Graduates are well placed to pursue careers in legal practice, as well as business, management, banking and finance, government, NGOs, charities, academia and research. Lawyers in practice support the LLM Master of Laws through a series of talks over the duration of the course. Expert careers advice is available from personal tutors and City’s Careers Service.

Graduates can continue their academic studies by enrolling in a PhD or MPhil offered by the School.

city.ac.uk/lmol

Professional Legal Skills
LLM

Duration
Full-time: six months
Part-time: one year

Students who successfully undertook the Bar Professional Training Course (BPTC) between 2010/11 and 2016/17 (please note that the LLM Professional Legal Skills is only available for those who studied the BPTC prior to 2017/18) can convert their BPTC into an LLM Professional Legal Skills. City’s BPTC is delivered at master’s level, allowing students to gain an LLM by completing an additional dissertation after the BPTC.

Students are asked to put forward a proposal for their dissertation upon application to this LLM. It must be completed within five years of completing the BPTC. This LLM satisfies the requirements of a traditional LLM but has a primary focus on practice. In addition to the taught classes on the BPTC, the LLM gives students the chance to focus on an area of professional legal practice of their choice, while strengthening their knowledge and understanding of legal professional practice. This can be linked to pupillage to underline a commitment to a particular area or it can be used more generally.

Career opportunities
This course has been developed specifically to assist students in achieving their career aspirations. Students who have pupillage can use work on their dissertation to show their commitment to a specific area of practice. Students seeking pupillage or going into other areas of legal work can use the dissertation to strengthen their CV.

city.ac.uk/lprs

“I chose to study at The City Law School because the teaching is world-class and the University offers fantastic mentoring schemes. I plan on becoming a solicitor and I feel ready to do this because City has boosted my professional competence and critical thinking.”

Susan Wangui
LPC with LLM Legal Practice
Bar Vocational Studies

Our Bar Vocational Studies offer a selection of ways to complete the vocational stage of training for aspiring barristers. They provide rigorous and highly skills-focused training that qualifies graduates for Call to the Bar of England and Wales, while the variety of programmes allows students as much flexibility as possible in choosing the option that best suits their needs.

The programmes are designed to reflect the work of the Bar. They focus on advocacy, drafting and written and oral advice, all underpinned by case analysis and legal research, as well as knowledge of the rule of civil and criminal procedure, evidence and professional ethics. The skills and knowledge gained on these programmes prepare students for successful careers as barristers but they are also transferable to a wide range of other careers.

The three programmes on offer are:

**Bar Vocational Studies (Full-time)**

LLM/PGDip with Specialism/PGDip
Duration: full-time, one year

This is a full-time programme which offers the choice of three different routes depending on whether students simply wish to qualify as a barrister or whether they wish to further enhance their employability and develop specialist knowledge and skills.

The Postgraduate Diploma comprises the subjects that form the compulsory vocational qualification for Call to the Bar of England and Wales. The Postgraduate Diploma with Specialism, which includes two additional modules in a specialist area of professional practice, allows students to further develop a critical understanding of the law, procedure and real-world insights in the context of that area.

Students also have the option of obtaining an LLM by completing a practice-focused dissertation or clinical legal education module (which includes undertaking supervised clinical legal work) in addition to the compulsory vocational qualification for the Bar and the specialist modules. This route aims to enhance students’ knowledge of substantive law and/or legal skills in relation to a particular area of professional practice and offers the opportunity for extended practical experience.

**Bar Vocational Studies (Part-time)**

LLM/PGDip with Specialism/PGDip
Duration: Part-time, two years

The part-time programme offers the same choice of three routes as the full-time programme, although students on the LLM route must complete the dissertation.

However, teaching on the programme takes place on fortnightly Wednesdays over two years, with online classes and activities in between the face-to-face learning.

This programme is structured to enable students to manage their studies alongside work and other commitments. It is a blended learning course, making the best use of educational technology to maximise flexibility while also ensuring students are fully supported throughout the programme.

**Bar Vocational Studies (Two-part)**

PGDip
Duration: Part One – self-paced online learning, Part Two – full-time, 21 weeks

The two-part programme comprises the subjects that form the compulsory vocational qualification for Call to the Bar of England and Wales. The programme is delivered in two parts: Part One covers the knowledge subjects which are assessed centrally by the Bar Standards Board: Civil Litigation & Dispute Resolution and Criminal Litigation, Evidence & Sentencing. This part is delivered wholly online, making the best use of educational technology to enable students to study effectively in their own time and from any location.

Students may start Part One in either July or March and will have a choice of three assessment sittings in December, April and August, depending on what best suits their learning.

Part Two is an intensive taught course in which students study and are assessed in the remaining compulsory skills modules. The teaching, learning and assessment on this course is condensed into a shorter period than the other Bar Vocational Studies programmes to enable students to complete them more quickly. There are two entry points for Part Two: in September and February.

Students are not required to pass Part One before commencing Part Two. However, the entry dates have been designed to allow students to receive their results for Part One before commencing Part Two, in order to move promptly from one part to another.

**Career opportunities**

On successful completion of any of the programmes, students will have completed the vocational stage of training for the Bar of England and Wales and are required to become a barrister.

The range of skills that students develop are also highly transferable to successful careers in a wide range of other areas. Students are offered guidance and support via our specialist Pupillage Advisory Service and our Careers team.

*At the time of printing (July 2019), the Bar Vocational Studies where subject to authorisation by the Bar Standards Board. Please visit our website for up-to-date information.*

"I love the people and culture on campus and studying in central London means the courts and law firms are within close proximity. I feel the Legal Practice Course has prepared me well for a trainee solicitor role and I look forward to using the skills and knowledge I learned in practice.”

Karina Sehdev
LPC with LLM in Legal Practice
The School comprises six departments offering a broad portfolio of master’s programmes attracting students from around the world.

School of Mathematics, Computer Science & Engineering

The programmes are informed by our world-class research dedicated to transforming the lives of future generations - tackling energy, environmental, healthcare and technology issues in partnership with global leaders. The last Research Excellence Framework (REF) rated 79 per cent of Engineering and 75 per cent of Mathematics research as either world-leading (4*) or internationally excellent (3*) demonstrating the vast impact of our work on wider society.

The School actively maintains close relationships with industry leaders, who employ our graduates to fuel their teams with fresh ideas and creativity and in turn help us to ensure our programmes reflect current industry requirements. Our dedicated Professional Liaison Unit help students get work-based experience through internships and industry-based projects. All our programmes are accredited by the relevant professional bodies i.e. The British Computer Society, The Royal Aeronautical Society and The Institute of Mechanical Engineers.

In the Department of Civil Engineering, academics work in the fields of structural and geotechnical engineering and hydrodynamics, in partnership with leading design consultancies and building contractors (e.g. Arup, Shansaka, WSP, Thornton Tomasetti and Pell Frischmann). The Department of Electrical & Electronic Engineering is renowned for its expertise in developing sensors and instrumentation (particularly in the field of biomedical engineering), its work on managing systems complexity in design and confronting the challenges of cyber security. The Department of Mechanical Engineering & Aeronautics has outstanding facilities for applied research and is particularly strong in the field of experimental and computational fluid dynamics, two-phase flow, turbomachinery and energy systems, waste heat recovery and compressor technology. The department was the first in the United Kingdom to offer programmes in Aeronautical Engineering.

In the Department of Mathematics, academic staff undertake fundamental research in pure and applied mathematics in the areas of representation theory, mathematical physics and mathematical biology.

Academics in the Department of Computer Science work across three broad areas, in software and systems engineering, research examines fundamental theories, methods and technologies related to the development, assessment and verification of complex sociotechnical and software-intensive systems. In the field of human-computer interaction, academics focus on the accessibility and usability of interactive systems supporting human-computer activities and the development of novel interfaces and devices for such systems. Finally, research on data-intensive systems explores the development of novel methods and frameworks to support the modelling, search, analysis, consumption and evolution of massive text and rich media, including images and sound. The Department’s programmes in Artificial Intelligence, Cyber Security and Data Science reflect particularly research expertise in these areas.

The Department of Library & Information Science builds on City’s long tradition of research in information science. Academics in the department are experts in the history of information sciences, the organisation and communication of information in a digital environment and the information behaviour of individuals and groups within society.

Construction Management
MSc

Duration
Full-time: one year
Part-time: two years

The MSc Construction Management is aimed at technically competent construction professionals who want to move into managerial roles within the construction sector or develop their own businesses.

Career opportunities
This course leads to management roles within all parts of construction delivery, from project supervision and engineering roles through to consultancy in multinational companies.

Students use the course to add a business competence perspective to their professional expertise.

city.ac.uk/cbsy

computer games technology
MSc

Duration
Full-time: one year
Part-time: 28 months
(15 months with internship)

This course is designed for graduates of computing-related degrees who want to further specialise their undergraduate education and develop their careers in the games industry. It is also for those who wish to update their skills after time spent in industry as a computing professional and for those with equivalent experience.

Career opportunities
Students are in demand for roles with artificial intelligence skills, sought after by industry, government and academia.

cyber security
MSc

Duration
Full-time: one year
(15 months with internship)
Part-time: 28 months

This course is aimed at graduate students and IT/ICT professionals and is intended to provide the skills needed to become cyber security professionals.

Career opportunities
Students specialise in many aspects of cyber security, including cryptography, network security, information security and security audit. They engage with researchers to develop their scientific knowledge and skills and are offered the option to specialise in the sociotechnical aspects of security, cybercrime and digital forensics.

- (15 months with internship)
- Part-time: 28 months

This course prepares students for successful careers as data scientists. One of the first degrees of its kind in the UK, it covers the intersection of computer science and statistics, machine learning and professional applications.

The course focuses on machine learning as the most exciting technology around data and our own graduates confirm this is highly valued in employment. Students also expose areas like data visualisation to generate insight from data and communicate it in practice.

Students can benefit from our expertise in machine learning and the excellent facilities we offer to students studying the technical aspects of data analysis. We have a world-leading centre for data visualisation, where students are exposed to the latest developments in presenting and communicating their results – a highly sought-after skill.

**Career opportunities**
The course prepares students for a successful career in industries from health to retail, from technology to government. Students can undertake their final project as an internship with organisations such as Google, Unilever or the Home Office.

Graduates have found employment in major domestic and international companies. Some students may pursue doctoral studies after completing the MSc.

**Human-Computer Interaction Design MSc**

**Duration**
- Full-time: 12 months
- (15 months with internship)
- Part-time: 28 months

This course provides students with advanced knowledge, industry-desired skills and new perspectives on design, thoroughly preparing them for a career in user-centred design or user research.

It equips students with the latest academic research, theories and techniques in human-computer interaction (HCI), user experience (UX), usability and interaction design. It encourages students to think about design in new ways, recognising that there are many ‘right’ ways to design.

Students gain a combination of theoretical and real-world knowledge, along with the necessary skills and experience to create engaging user experiences. They study modules that cover the entire user-centred design and evaluation process, from understanding user needs to designing interactive systems that meet those needs, to evaluating the usability of those (and existing systems) through user research.

**Career opportunities**
This course empowers students to succeed in UX roles in leading digital agencies, business consultancies, IT companies and government. Job titles include UX designer/consultant, user researcher, information architect and accessibility specialist.

This course is highly respected by industry, with high employability prospects. Graduate destinations have included Samsung, Tesco, Thomson Reuters and Google.

---

**Software Engineering MSc**

**Duration**
- Full-time: 12 months
- (15 months with internship)
- Part-time: 28 months

This industry-focused course is for computer science graduates and experienced professional programmers interested in developing high-quality, complex software systems.

The course develops skills in analysing system requirements and designing appropriate software solutions, as well as evaluating and using advanced software engineering environments, design methods and programming languages.

It offers an up-to-the-minute curriculum with a robust professional core. There is a strong focus on key industrial technologies, including object-oriented programming languages (Java, C++), design patterns, service-oriented architecture, cloud computing, big data and mainstream standards.

City has one of the largest groups of academics in London specialising in research in the areas of systems and software engineering. Students are exposed to leading-edge technologies delivered by experts in their fields.

**Career opportunities**
The course aims to meet the significant demand for graduates with a good knowledge of software engineering. This demand arises from consultancies, software houses, major software users such as banks, retailers and the public services, defence, aerospace and telecommunications companies.

Graduate destinations include Ceridian, Galatea Associates, GForces, Oracle and Thomson Reuters.

“**It helps to be in the heart of London and close to the world of business-economy. City has broadened my horizons both in a professional and personal sense and I believe it has prepared me to step into a fulfilling career.”**

Gorkem Yukselen
MSc Maritime Operations and Management
Entrepreneurial students will aim to establish new enterprises or scale up to established providers. This course prepares students with the technical skills needed for a successful career in the growing area of healthcare technology.

Students develop specialist knowledge in principles, design, software development, data analytics, electrophysiology, sensors, fabrication and prototyping of healthcare technologies. In addition to this, students also have the opportunity to develop their understanding of ethics, economics and the regulatory aspects necessary to launch a new product to the market.

The course combines expertise in entrepreneurship from City’s world-leading Cass Business School and provides top laboratory facilities and expertise to support design activities.

It is suited to students with a scientific or engineering background. Students with new healthcare technology ideas who seek the technical skills offered on this course are also encouraged to apply.

Career opportunities
The course prepares students for successful careers in IoT across a range of sectors, including electronics, informatics, telecommunication and computing. Entrepreneurial students gain skills to work for one of many IoT startups or create their own. Students may be considered for competitive industry placements, subject to availability.

---

The course prepares students for a successful career in engineering, has been designed to provide an in-depth insight into the technical workings, management and economics of the electrical power industry.

Due to the introduction of tough environmental laws, the use and integration of renewable energy schemes are now of paramount importance for nations to meet strict low-pollution targets. Knowledge of the impact of such schemes on the existing electrical grid structure is covered in great detail. In addition to this, modules covering power electronics, power systems protection, modelling, simulation and design are all addressed on the course, alongside economics, supply chain and market factors.

The course has been developed for graduates with electrical/electronic or related engineering or scientific background. Graduates have found jobs as engineers, managers and analysts in the power sector with companies such as Ofgem, National Grid, UK Power Networks, E.ON, EDF Energy, Vattenfall, Caterpillar and the transport sector.

Students may also wish to further their research in the energy field by undertaking a PhD.

---

This course, accredited by CIILP, offers a comprehensive insight into the theory and practice of the information professions. It provides our students with highly employable skills that allow them to design and develop innovative information services across a range of sectors.

Our course blends history and philosophy of information with modern techniques for collection, organisation, indexing, retrieval, communication and analysis of information. The combination of research-active staff, key practitioners and pioneering thinkers within the field allows students to develop the knowledge and real-world skills needed to gain employment and to manage and shape today’s constantly shifting information landscape.

The course benefits from City’s central London location, close to the British Library and Turing Institute. An optional programme of workshops, in collaboration with key professionals, widens the impact of learning and networking with the sector.

Career opportunities
Students are equipped to understand, work with, design and deliver collection-based information services within a spectrum of sectors; gaining from the latest academic research, theories and recommendations for practice from leading academics and innovators within the field. We draw inspiration from arts and humanities, philosophy, technology and science.

The course benefits from City’s central London location, close to many important collections, including the British Library, British Museum, Victoria and Albert Museum and the National Archives.

Career opportunities
Graduates take on roles such as library assistant, senior library assistant, assistant librarian, librarian or library manager. Broader employment opportunities include roles in publishing, web design, web content provision, information organisation and architecture, analytics, teaching and UX for information services. The course prepares students for entry into doctoral research.

city.ac.uk/llisc
Maritime Operations Management

Duration
- Full-time: one year with the project taking approximately three months during this period.
- Part-time: two to three years with the project taking approximately six months during or after this period.

This course is designed to train professionals for various sectors and occupations within the maritime and sea transport industries. It is open to graduates who have qualified in an appropriate discipline and to those serving at sea, offshore or inland-based organisations.

It focuses on maritime operations, management, law and technology and the related business environment.

There is also an emphasis on the fields of port and terminal management, insurance broking, offshore operations, and as technical and commercial superintendence, safety management.

Port and terminal management, insurance broking, offshore operations, and safety management, are technical and commercial superintendence roles.

Career opportunities
- Graduates have wide-ranging employment opportunities within the maritime sector. These include commercial and technical roles within the worldwide marine industry and senior management roles.
- Former students have taken up positions in the fields of ship and insurance broking, offshore operations, port and terminal management, shipping finance, surveying, ship superstintions, safety management and as technical and commercial managers and directors.

Find out more
- city.ac.uk/emog

Mechanical Engineering

Advanced Mechanical Engineering

Duration
- Full-time: one year
- Part-time: two years

This course offers a blend of theory and practice to help students develop the skills and knowledge required for advanced mechanical engineers, particularly in thermo-fluids applications. The course is designed in collaboration with industry and professional bodies.

Topics covered include advanced fluid mechanics, structural mechanics, mathematical modelling in CAD, renewable and sustainable energy, gas turbine engineering, IC engines and powertrain and advanced heat transfer.

Students gain an in-depth understanding of the fundamentals and acquire professional skills and appreciation of the latest engineering developments in the energy and transport sectors.

The dissertation provides an opportunity to apply knowledge and develop a deep understanding in a specialised topic of the student’s choice. The course has been accredited regularly by the Institution of Mechanical Engineers (IMeCHE), on behalf of the Engineering Council, as fully meeting the academic requirement for registration as a Chartered Engineer (CEng).

Career opportunities
- Graduates have wide-ranging employment opportunities, including commercial and technical roles within the worldwide marine industry.
- Former students have taken up positions in the fields of ship and insurance broking, offshore operations, port and terminal management, safety management, shipping finance and as technical and commercial managers and directors.

Economics

Energy and Environmental Technology and Economics

Duration
- Full-time: one year
- Part-time: two years

The drive towards increased efficiency and decarbonisation of power generation, transport, industry and domestic energy use will require professionals with the ability to see beyond traditional subject boundaries and understand the complex inter-relations between technological, economic, political and behavioural aspects of the energy sector.

Career opportunities
- Graduates are prepared for a wide range of career opportunities involving project management, risk management and financial planning. It is well suited to those pursuing a career managing complex projects, requiring the latest management tools and techniques.
- Past graduates have secured employment with companies such as Eurostar, Petronas, Southern Water and Bechtel Construction.

Find out more
- city.ac.uk/epemf

Project Management

Duration
- Full-time: one year
- Part-time: two years

This course provides students with a foundation in quantitative risk assessment and decision-making coupled with classical engineering economics and financial engineering.

Students unravel complex problems by applying scientific methods to real-world examples and discover how to measure risk on any scale.

Career opportunities
- Combining expertise from City, academic and visiting lecturers from industry, the course merges diverse and unique skill sets to solve complex problems.
- The course is suited to students with an technical or financial engineering background as the focus is on quantitative risk assessment, which requires an aptitude for problem-solving.

Choosing a postgraduate course at City is the beginning of your journey towards a rewarding career.

How to apply
Applications for the majority of postgraduate courses need to be made directly to City. To apply, visit the webpage of your intended course of study and click on the ‘How to apply’ tab to read more about the application process including any supporting documentation required and to access our online application system.

While some of our postgraduate courses have application deadlines as early as February, many do not have a fixed application deadline and operate on a rolling admission basis. Applications will close when the course is full, so you are encouraged to apply as early as possible.

Entry requirements
Applicants for postgraduate study should normally hold a university honours degree in an appropriate subject. However, if you don’t hold an honours degree (or an equivalent qualification) but have suitable experience or professional qualifications, you may still be accepted for a master’s course or Postgraduate Diploma at the discretion of the relevant school.

We also recognise several pre-master’s courses, in particular those provided by the INTO Centre at City and Kaplan International College London.

English language requirements
If English is not your first language, you are required to take an English language test. Refer to the individual course pages for more information.

These are the minimum Home Office requirements and in addition, there are course-specific English language requirements, which are likely to be higher.

Find out more
Further information can be found in the ‘How to apply’ section of the webpage of your intended course of study. Entry requirements vary for each course and are listed on the individual course webpages: www.city.ac.uk/courses

Postgraduate Open Evenings
At City, we offer a range of opportunities for you to visit and find out more about postgraduate study, including Open Evenings, online events and campus tours. At our Postgraduate Open Evenings, you will learn more about our postgraduate courses and discover all the benefits of studying at City.

You are welcome to attend the following Open Evenings at City, ahead of the 2020/21 entry:

- Wednesday 13th November 2019
- Wednesday 19th February 2020
- Wednesday 3rd June 2020
- Wednesday 11th November 2020

For more details, visit: www.city.ac.uk/study/visit-us
With a diverse student population drawn from over 160 countries, our vibrant atmosphere makes City a special place to live and study.

International advice and support

This is City.

A dedicated international team
We understand that choosing a university and studying overseas is one of the biggest decisions you will make, so we offer all the advice and support you will need on your journey.

Our International Student Recruitment team visits more than 50 countries every year. It meets the most able students interested in studying in the UK and our worldwide network of representatives are on hand to help students with their applications.

When you arrive in September, you can take part in our International Students Welcome Reception. This annual celebration of City’s global community is an opportunity to meet staff and fellow students.

Visa requirements
Students are responsible for obtaining any necessary visas and entry clearance into the UK, so we advise you to prepare well in advance by researching the requirements for students from your country. Information about applying for and extending visas to study is available on City’s website. A team of dedicated international student advisers can help you with your visa application process.

Tier 4 (General) student visa
If you have a Tier 4 (General) student visa, which was issued for study at another university, college or school in the UK, you will need to make a new Tier 4 application to the UK Home Office using a Confirmation of Acceptance for Studies (CAS) from City, before you will be allowed to enrol with us.

English language courses
As City’s courses are delivered in English, you will need to provide proof that you are competent in English before admission. Our partner INTO City runs pre-sessional English courses during the summer to help students improve their English before their courses start. See our website for the English language requirements of specific courses.

Tuition fees and living costs
Remember that your tuition fee does not include the cost of accommodation and you will need to budget for this along with flights, food, travel, books and personal items. Where necessary, our temping agency Unitemps is able to find suitable work for you.

Detailed information on tuition fees is available under individual courses on our website.

Our partners around the world
City’s International Office supports and strengthens our global profile by developing strategic links and activities in education and research. Through these links, we are able to create opportunities for students to study abroad and take up international internships while also benefiting from visiting academics and speakers.

Next steps
• For more information about the International Student Recruitment team and to find out when we might be visiting your country, visit: www.city.ac.uk/international
• Former City students are spread across the world and our network of alumni ambassadors is an invaluable source of advice. To find out more, go to: www.city.ac.uk/alumni/alumni-ambassadors

The UK Council for International Student Affairs (UKCISA) provides information and advice for international students planning to study in the UK. Visit www.ukcisa.org.uk for more information and to find out how fee statuses are assessed in the UK.

If you are interested in part-time work to support yourself, visit www.unitemps.com for more information.

EU students who register for the 20/21 intake at City (either as new or continuing students) will be liable for the same tuition fee as UK students for the duration of their course. Following the 2016 European Union Referendum in the UK, City has posted advice on its website for any students who might have concerns. To read the statement, visit: www.city.ac.uk/eu-statement
Funding your studies

Although you will usually have to pay for postgraduate study yourself, many sources of funding exist, including scholarships, studentships and loans. During your time at City, you can obtain financial advice and support from our award-winning Student Centre.

### Postgraduate scholarships
City has a wide range of scholarship opportunities available for students in all five of its Schools.

Find out more
www.city.ac.uk

### Research Council studentships
Research Councils may be able to provide financial assistance for UK, EU and overseas postgraduate students. It is best to contact the Council relevant to your area of study directly to enquire about eligibility and application.

### Charities and trusts
There may be funding for postgraduate study available from charities and trusts. The British Council has a scholarship search database that you might find useful.

Find out more
www.educationuk.org
www.britishcouncil.org

### US loans
City participates in the William D Ford Federal Direct Loan Program.

Find out more
www.city.ac.uk/study/postgraduate/funding-and-financial-support

### Disabled Students’ Allowances (DSAs)
You can apply for Disabled Students’ Allowances (DSAs) if you live in England and have a disability that affects your ability to study, such as a learning difficulty, mental health condition, physical disability or long-term health condition.

Find out more
www.gov.uk/disabled-students-allowances-dsas

### Professional and career development loans
City is listed on the Professional Career and Development Loan Register to provide loans for tuition fees and living costs for UK postgraduates.

Find out more
www.direct.gov.uk/pcdl

### Hardship Fund
The City, University of London Hardship Fund provides discretionary financial assistance for students experiencing unexpected financial hardship to help them remain in higher education. The Fund is administered by the Student Centre and is intended to act as a safety net for those in financial difficulty.

Find out more
www.city.ac.uk

### Postgraduate loans
A postgraduate loan is available from the Government to help cover the cost of postgraduate study. Students can apply for up to £10,906 to help pay tuition fees or living expenses; The loan is non-means tested and paid directly to the student.

If you are interested in undertaking a research degree at City, you can apply for a Postgraduate Doctoral Loan for up to £25,700, divided equally across each year of your course.

Find out more
www.gov.uk/masters-loan

This is City.
Reaching City from within London
The nearest Underground stations are Angel on the Northern line (Bank branch) and Barbican and Farringdon on the Metropolitan, Circle and Hammersmith & City lines.

Bus routes that pass close to City include the following: 4, 19, 30, 38, 43, 55, 56, 63, 73, 153, 205, 284, 243, 274, 341, 394, 476.

Secure parking for bicycles is available on campus.

Parking in central London is limited and can be expensive. There is metered parking available on the roads surrounding Northampton Square. Please also note that almost all of City’s sites are within the congestion charging zone and drivers are liable to pay a daily charge.

Reaching City from outside London
- Coach and train terminals in London link with Underground and bus networks
- Rail services connect Gatwick and Luton airports with Farringdon station
- Eurostar trains connect to Paris and Brussels directly and the rest of continental Europe indirectly from St Pancras station
- The Heathrow Express train service connects Heathrow Airport with Paddington station
- The Docklands Light Railway (DLR) connects London City Airport with Bank station
- The Stansted Express train service connects Stansted Airport with Liverpool Street station.

To plan your journey to City, visit our website: www.city.ac.uk/visit

The Transport for London website also provides up-to-date information on public transport: www.tfl.gov.uk
