Welcome

City, University of London is a special place. Turning the page is your first step on a path of personal growth and achievement.

For over a century, our academics and students have used education, research and enterprise to transform their lives, their communities and the world.

City, University of London is the university of the City of London. We have strong links with the City, not least because the Lord Mayor of London is our Rector.

The most recent Research Excellence Framework (REF2014) results showed that 40 per cent of our total academic staff were producing research that is world-leading or internationally excellent.

City joined the University of London on 1st September 2016, further strengthening the diverse, academically excellent environment that City provides. It’s a place for you to study alongside leading academics in one of the world’s most cosmopolitan, opportunity-filled cities: London.

Turn the page and take your first step.

This is City.

Professor Sir Paul Curran
President
Characterised by excellence, creativity, innovation and interdisciplinary collaboration, City’s research pedigree spans more than a century.

This is life-changing research
Professor Panicos Kyriacou  
RCBE Director, School of Mathematics, Computer Science & Engineering.

City is changing lives with groundbreaking research into alternative monitoring of arterial blood oxygen saturation in critically ill newborns, to reduce the risk of a lack of oxygen to the brain.

There is a need for more reliable, non-invasive monitoring of blood oxygen levels in critically ill newborns when there is the risk of cerebral hypoxia (lack of oxygen reaching the brain). There is no readily available technology even if babies don’t suffer from Hypoxic Ischaemic Encephalopathy (HIE), a condition in which the brain does not receive enough oxygen. HIE can be fatal; within as little as five minutes of oxygen deprivation, brain cells can begin dying.

To overcome this challenge, the anterior fontanelle (one of the ‘soft spots’ on an infant skull) is used as a measurement site; the theory being that blood circulation may be better preserved at this central site. New optical, non-invasive sensors have been custom-made and are being investigated in clinical trials at City.

Leading this research is Professor Panicos Kyriacou, Director of City’s Research Centre for Biomedical Engineering (RCBE). “Biomedical engineering contributions to healthcare, through research and development in the University and in the medical devices industries, have brought about a change in how healthcare is delivered,” says Professor Kyriacou.

“As new technologies for diagnosis, monitoring, treatment and the development of hospital laboratory facilities grow, the hospital has become the focal point for the delivery of healthcare, with an associated development of allied health specialities. The synthesis of a novel hypothesis (and the ability to test it) is best accomplished in an environment where creativity is valued.”

“Research in this most fascinating area is literally the act of creating knowledge where there once was none.

The RCBE was founded at City in the mid-1990s with the aim of pursuing research in the emerging field of biomedical engineering, a discipline that applies the principles of physics and engineering to the complex medical devices used in the diagnosis and treatment of the sick and injured.

Occupying state-of-the-art laboratories and having built an impressive global reputation, the RCBE offers world-class facilities and expertise to international academics including scientists, engineers and clinicians. Working in close partnership with leading hospitals and healthcare technology companies, the RCBE develops medical devices, biosensors and signal and image processing techniques with applications across a wide range of medical specialities.

Find out more
You can find out more about the RCBE’s research by visiting: www.city.ac.uk/rcbe
Dr Charitini Stavropoulou
Senior Lecturer in Health Management, School of Health Sciences.

Dr Charitini Stavropoulou is investigating the impact of recessions on healthcare and mortality rates. Her study of the 2008 financial crisis in Europe, published in the *British Medical Journal*, showed that the recession was associated with adverse health outcomes, linking it to an increase mainly in mental health problems.

A second study on mortality rates focused on one of the worst-affected countries, Greece. The study, published in *The Lancet Public Health*, found that mortality trends had been interrupted after the onset of the crisis, resulting in an extra 242 deaths a month. It also revealed some unexpected results, such as a decrease in the number of deaths due to road traffic accidents, likely caused by fewer people being able to afford car running costs.

Find out more
Learn more about Dr Stavropoulou’s research by visiting: www.city.ac.uk/cstavropoulou
Professor Andrew Choo
The City Law School

Professor Andrew Choo is a leading expert in the law of criminal evidence. In his research, he seeks to make sense of shifting patterns in the admissibility of evidence in contemporary courts.

Traditionally, a set of stringent rules has determined what evidence can and cannot be submitted during criminal trials. In recent years, however, there has been a worldwide shift towards a less prescriptive format. Professor Choo considers the decisions courts make and whether fixed rules are preferable to a more flexible model.

Building on his work in the field, Professor Choo also examines the influence of the European Convention on Human Rights on principles of criminal evidence. He explains that since the Human Rights Act came into force in England and Wales in 2000, certain rights are now directly enforceable in domestic courts and some of them are relevant to the admissibility of evidence in criminal cases.

He points to Article 6, The Right to a Fair Trial, as the Article that has changed the face of criminal evidence. A defendant can argue that his or her right to a fair trial has been violated because certain evidence is being allowed to be presented in court.

Professor Ajay Bhalla
Cass Business School

Professor Ajay Bhalla is Professor of Global Innovation and Family Business in the Faculty of Management at Cass. He comes from a family with generations of diversified interests. His research and advisory work sits largely in three areas: family business, employee ownership and global innovation.

In 2013, alongside academics from City and Northumbria University, Professor Bhalla won the Best Paper award at the 73rd Annual Meeting of the Academy of Management for his article ‘Test Driving the Future: How design competitions are changing innovation’ in Academy of Management Perspectives. The award was conferred for advancing the understanding of issues relevant to managers and executives.

In February 2014, this collaborative work was also recognised by the Chartered Management Institute (CMI) as one of the top five management articles of 2013. His research has also been widely cited in national newspapers and magazines.

Professor Bhalla’s work on employee ownership has provided the evidence base for the UK Government’s policy on promoting employee ownership.

Professor Miguel Mera
School of Arts & Social Sciences

Professor Miguel Mera is a composer of music for the moving image and a musicologist. He is interested in the combination of practice and theory within the context of contemporary culture and the creative industries.

His work has been screened at film festivals and cinemas around the world. He is also widely published in music and moving image studies including three books, several journal articles, book chapters and other papers.

Professor Mera serves on the editorial board of several leading music journals. His contribution to public understanding of the subject includes appearances on the BBC Proms and Radio 3 and numerous pre-concert talks and events. In 2017, Professor Mera won a City, University of London President’s Award for Excellence in Learning and Teaching.

A new book, co-edited by Professor Mera and titled The Routledge Companion to Screen Music and Sound, explores the ways in which music and sound interact with forms of narrative media such as television, video games and film.

City offers a wide range of taught and research postgraduate degrees, with every member of our postgraduate community benefiting from outstanding academic staff, comprehensive student support and tailored careers guidance.

This is investing in your future

A postgraduate degree, whether taught or research, will give you the opportunity to deepen your understanding of your chosen subject and explore particular areas of interest, while developing valuable transferable skills, including analytical thinking and research and presentation techniques.

Many students choose postgraduate study as a way of enhancing their employability in a particular industry or profession, as employers often seek the breadth of skills acquired through a postgraduate education. If you have already gained employment experience in your chosen field, a postgraduate degree can be an excellent way to accelerate your career development.

In keeping with City’s close links with business and the professions, many of our postgraduate degrees are offered on a part-time and flexible basis, allowing you to manage your study around employment commitments.
Doctoral study, which can lead to a PhD or an alternative research degree such as a professional doctorate, generally involves between three and four years (for full-time students) of original research on a specific topic, working under expert academic supervision. You will need to be organised, disciplined and above all fascinated by your field of research. Success at doctoral level requires a significant investment of time and there is strong competition for places and funding. A doctorate, recognised as a pinnacle of academic achievement, offers the chance to dedicate yourself to research that inspires you, while contributing to the development of knowledge in your subject.

Taught postgraduate degrees

City offers over 150 taught postgraduate degrees, each developed by academic staff who are experts in their fields and who possess an in-depth understanding of the graduate employment marketplace.

- Ninety-three per cent of City graduates are in work or further study within six months of graduating (Which? University, 2018)
- Four former British Prime Ministers are City alumni
- City’s diverse student population includes students from over 160 countries
- Forty-five per cent of City students are studying taught postgraduate courses

Most taught postgraduate degrees at City are designed to be completed by full-time students over the course of one academic year, or by part-time students (where a part-time option is available) over two years.

Taught postgraduate degrees at City allow you to study a subject in depth and tailor your module choices to your area of interest and future plans.

Course directors work closely with potential employers to ensure the relevance of City’s postgraduate courses, which are also shaped by feedback from former and current students. Many degrees are designed to meet particular industry standards, with a significant number accredited by professional bodies.

Find out more

For more information about taught postgraduate degrees at City, go to: www.city.ac.uk/courses/postgraduate

Research postgraduate degrees

Undertaking a research degree is both challenging and rewarding. At City, you will join a community of research students who share a desire to broaden their skills and push boundaries in their fields.

- Areas of academic activity where City’s research was assessed as being of a quality comparable with the best in the world by the 2014 Research Excellence Framework (REF)
- Seventy-five per cent of City’s REF 2014 submission was rated as ‘world-leading’ or ‘internationally excellent’
- There was a total of 521 research postgraduate students at City during 2016/17 (HESA Student Return 2016/17)
- Thirty-five per cent of City’s total students are aged 25 and above

Doctoral study, which can lead to a PhD or an alternative research degree such as a professional doctorate, generally involves between three and four years (for full-time students) of original research on a specific topic, working under expert academic supervision.

You will need to be organised, disciplined and above all fascinated by your field of research. Success at doctoral level requires a significant investment of time and there is strong competition for places and funding.

A doctorate, recognised as a pinnacle of academic achievement, offers the chance to dedicate yourself to research that inspires you, while contributing to the development of knowledge in your subject.

We are located between the City of London and Tech City, Europe’s largest cluster of digital and technology startups.

This is enterprise with impact.
Drawing on its heritage as a university established to provide academic excellence to business and the professions, City is committed to developing the next generation of entrepreneurial talent within the student and graduate community.

Today’s City students share knowledge and resources in a London-wide community of budding entrepreneurs, while also exploring opportunities to bring their expertise and ideas to a wider audience than ever before.

Our central London location enables us to offer wide-ranging support to enterprising students, during their studies and beyond. The benefits of being on the doorstep of Tech City include student employability, research relationships and business collaboration. EC1V (City’s postcode) and neighbouring postcode N1 are both among the top UK postcodes for starting a business (UHY Hacker Young research). For example, around 17,000 new businesses were started within the two postcodes during 2016.

Regardless of whether you want to start your own company, City’s focus on Enterprise Education is designed to help all students develop the entrepreneurial mind-set and skills needed to thrive in an increasingly competitive and challenging world.

CityStarters
The CityStarters team runs a wide range of extracurricular Enterprise Education events, programmes and activities that are free of charge and accessible to all students and graduates studying at City, regardless of their course.

Find out more
Go to: www.citystarters.co.uk/cityventures/start

CitySpark
This ‘business design and doing’ competition is an opportunity for City students to win up to £5,000 to develop a new business idea, test it with potential customers and then make it happen.

Find out more
Go to: www.city.ac.uk/cityspark

City Launch Lab
City Launch Lab is a specially designed incubation space that provides business mentoring support and access to an accelerator programme to kick-start your business as well as free desk space for student and graduate entrepreneurs from City.

Find out more
Go to: www.city.ac.uk/launchlab

Made@City
An end-of-year celebration to showcase and reward final-year student project work, Made@City brings together students, staff and alumni from City with members of the local Tech City community.

Find out more
Go to: www.citystarters.co.uk/made-at-city

Start-Ed
Start-Ed is a free walk-in centre offering advice on a range of business and legal matters to businesses and technology startups.

Cass Entrepreneurship Fund
The Cass Entrepreneurship Fund is a £10 million venture capital fund, providing growth equity to startup and early-stage companies.

Peter Cullum Centre of Entrepreneurship (PCCE)
The PCCE is a focal point for budding and established entrepreneurs. It brings together the skills, experience and networks of successful entrepreneurs, financiers and business leaders and offers a range of short courses and support services to entrepreneurs.
City is situated close to some of the capital’s most dynamic and exciting areas.

This is having London as your campus

City’s central London location places it at the heart of some of London’s most creative and rapidly evolving districts. From coffee houses, cocktail bars and cosy pubs to artists’ studios, shopping and green spaces, there’s something to inspire everyone in City’s surrounding neighbourhoods.

Exmouth Market
Tempting restaurants sit alongside relaxed bars and coffee shops. The weekday lunchtime food market is strongly recommended.
Clerkenwell
A leafy centre for architecture and design companies and technology startups, as well as a trendy haven for lovers of good food.

Angel and Islington
A lively, fun part of town with all the shopping, restaurants, bars and entertainment you could possibly wish for.

Dalston and Hackney
Located north east of Shoreditch, Dalston and Hackney are both brimming with artistic creativity and independent businesses.
Based in the heart of London, close to the capital’s leading financial, legal, media and healthcare institutions, you will benefit from all that this remarkable city has to offer.

This is an international perspective
Much of the City campus is located on the cusp of several of London’s most vibrant neighbourhoods. Tree-lined avenues and green spaces contrast with vibrant street life, bars and restaurants, while the nearby Barbican Centre is a world-famous architectural and cultural landmark.

Further afield, Cass Business School occupies a prime location in the City of London’s financial hub, making it the ideal postgraduate study base for professionals working in the Square Mile. And you may be surprised to learn that Senate House, which stands at the centre of the sprawling University of London campus, is just half an hour’s walk (or a short trip by bus or Underground) from City’s College Building, placing a host of resources within easy reach.

From shops, cafés and restaurants to museums, galleries and arts venues; from sports clubs to nightclubs; from cityscapes to public gardens; London is a city for everyone. Celebrated as a truly global destination, with a diverse cultural mix, iconic landmarks and a unique energy, it is an exuberant and exciting place to live.

But this is only half the story. Far-reaching connections and close ties with institutions around the world position City as a truly international university.

City’s location in the centre of one of the world’s most diverse and fast-paced cities, combined with its highly international community of students and staff, mean the institution has developed close links with an extensive network of global academic partners.

Along with our reputation for academic excellence and focus on business and the professions, we have strong relationships with international industries and organisations. These ties ensure that our students enjoy exceptional global employment prospects once they graduate.

City is one of the most popular universities in the UK for international students and staff: our students come from over 160 countries, while our academic staff span more than 75 nationalities. This international community makes City a vibrant and cosmopolitan place for postgraduate study.

Knowledge Quarter

City is a member of the Knowledge Quarter, an influential partnership of over 75 academic, cultural, research, scientific and media organisations located within a one-mile radius of King’s Cross station, all of whom have within their purpose the creation and dissemination of knowledge.

Find out more
Go to: www.city.ac.uk/about/international-partnerships

International partnerships

City’s International Office works to support and strengthen our global profile by developing strategic links and activities relating to education and research. These strong links allow us to create opportunities for students to study abroad and take up international internships and enable us to welcome visiting academics and speakers.

Find out more
Go to: www.city.ac.uk/about/international-partnerships
City is part of the University of London, having become one of its self-governing member institutions in 2016.

This is expanding your horizons
The University of London was founded by Royal Charter in 1836 and is one of the oldest, largest and most diverse universities in the UK. It is a collegiate university consisting of 18 self-governing member institutions and nine smaller specialist research institutes.

City joined the University of London on 1st September 2016. This landmark in City’s history presents many benefits and opportunities for our students.

City continues to set its entrance criteria and examinations, award its own degrees and offer independent services to students. It remains a chartered institution, autonomous and self-governing, with its own Council, Senate, Students’ Union and other bodies.

Joining the University of London marked a significant chapter in City’s history. It was a major opportunity and a signal of how far we had come as an institution. We retained our historic strengths, professional credibility and deep-rooted City of London heritage while strengthening our international profile and expanding our research and education capabilities.

“Joining the University of London marked a significant chapter in City’s history. It was a major opportunity and a signal of how far we had come as an institution. We retained our historic strengths, professional credibility and deep-rooted City of London heritage while strengthening our international profile and expanding our research and education capabilities.”

Professor Sir Paul Curran,
President of City, University of London

Making the most of membership

Being part of the University of London means that, as a City student, you are entitled to free membership of Student Central (the former University of London Union). Student Central is a resource shared by more than 120,000 students across London and offers a wide range of services and facilities, from special events, student discounts and training schemes to bars, gig venues and a swimming pool. Whether you want to increase your social circle or compete against other colleges in the sporting arena, Student Central has plenty to offer.

Go to: www.studentcentral.london

Find out more
Go to: www.city.ac.uk/university-of-london
At City, you will find everything you need to plan your career, build your skills and take the next step in your chosen field.

This is career enhancement

When it comes to finding a job after university, postgraduate students at City benefit from exceptional support and advice. From applying for jobs and attending interviews to gaining experience in your chosen field, City’s Careers Service can assist from the first day of your postgraduate studies.

City’s professionally accredited courses and close links with industry mean our students enjoy excellent prospects upon graduation.

Specialist careers advice
The friendly and helpful Careers Service staff are on hand to help you evaluate your life and career goals and plan the steps you need to take to achieve them. Discuss your plans at one-to-one appointments and discover our extensive careers resources, which include computer-aided guidance packages and aptitude testing systems.

Careers workshops and presentations
Find out about potential employers’ recruitment arrangements and polish your job search techniques. Major employers visit City regularly to give presentations, attend careers fairs and run skills sessions, while careers consultants and employers frequently hold workshops on subjects such as successful interviews and presentation skills.

Graduate, internship and placement opportunities
With City CareersHub, our specialist online service, you can discover internship opportunities available during your studies and identify graduate opportunities for life after City. All City students and graduates are registered on the site, along with more than 5,000 employers such as the BBC, Bloomberg, Deloitte, Goldman Sachs, HSBC, Macfarlanes LLP, PwC, Santander and The Times.
Industry insight panel events
The Careers Service regularly hosts panel events, giving students the opportunity to investigate the career options available to them. Each event consists of a series of talks followed by a networking reception with employers and recent graduates, often featuring City alumni.

Student volunteering
Improve your employment chances by developing new skills through volunteering. Recent volunteers have worked with a broad range of organisations, both on and off campus. Once you have completed a placement, the Careers Service will help you articulate your newly found skills through your CV and during interviews.

The School of Arts & Social Sciences has a world-class reputation for dynamic, inspiring and rigorous postgraduate education. Academic staff at the School are highly regarded in their fields and the research they undertake regularly informs academic debate and political policy at a regional, national and international level.

School of Arts & Social Sciences

The School’s strengths in research and education lie in the following disciplines: Economics; English (including Creative Writing and Publishing); History; International Politics; Journalism; Music; Psychology; and Sociology (including Food Policy, Media, Criminology and Cultural and Creative Industries). Over 1,000 postgraduate students from around the world join the School each year, creating a lively and stimulating environment for studying and socialising. Students undertaking both taught and research postgraduate degrees play a key role in the life of the School, through their participation in seminar series, their research activities, their contribution to student media and their involvement in student politics and representation.

Courses at the School of Arts & Social Sciences are renowned for their professional relevance. Academic staff enjoy close ties with industry and the professions, which means that when designing and updating courses, they ensure the needs of graduating students and their potential employers are met. These links and City’s central London location ensure that students benefit from regular lectures, seminars and networking opportunities led by prominent speakers and visiting lecturers. The School’s vibrant alumni network, which postgraduate students automatically join upon graduation, has among its members leading figures in the worlds of journalism, culture and creative practice and the social sciences.

City’s location, its outstanding academic staff and the professional orientation of its postgraduate degrees mean that graduates of the School of Arts & Social Sciences are successful in securing employment once they graduate. Many of the School’s graduates also move on to doctoral-level study, both within the School and at other leading institutions around the world.

## Economics

### Business Economics/International Business Economics
**MSc**

**Duration**
- Full-time: one year

On the MSc Business Economics/International Business Economics course students won’t be deriving equations. Instead, they use them to apply economics to current business and economic issues. The course is practice-based so students can apply their learning.

Students have access to first-class resources combining data banks from City’s Cass Business School and the School of Arts & Social Sciences. This means access to Datastream, Bloomberg, Thomson Reuters, Morningstar, Bankscope and Orbis.

MSc Business Economics/International Business Economics students benefit from City’s central London location. With high-profile guest lecturers such as Lord Jim O’Neill, former Chief Economist at Goldman Sachs, students gain insight straight from the City of London by studying in the heart of “the world’s biggest financial centre” (*The Economist*, 2012).

**Career opportunities**
When it comes to employer recognition, City has a strong reputation for quality. Graduates from this course have found employment in the financial sector, multinationals, consultancy, international organisations, academia and the Government Economic Service.

Our graduates include Yuliya Bashmakova, Senior Gas Control Scheduler for ExxonMobil and Youssef Intabli, who is now working as an Account Manager at Bloomberg.

**Find out more**
city.ac.uk/sbel

### Development Economics
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

This master’s course is designed to bridge the gap between economics and development, providing strong education in quantitative and policy analysis in development economics.

It provides students with an understanding of the key issues in economic development, using rigorous economic theory and statistical tools to enable them to analyse policies and assess their impact on economic and human development.

The course is led by a team of academic staff who are leading experts in their field of research.

All students must complete four core modules and either a literature survey or dissertation. Students who choose the literature survey can choose four electives. The dissertation option allows students a choice of two electives.

**Career opportunities**
Graduates of this course enjoy employment possibilities in both the public and private sectors, including consultancy and economic analysis.

In addition, this course provides students with the skills to work in consulting firms specialising in development, governmental bodies such as the Department for International Development (DFID) or in major international financial and development institutions. The MSc also provides a solid academic foundation for students wishing to pursue doctoral research in economics.

### Economic Evaluation in Healthcare
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

The demand for specialists in health economics continues to increase as more advanced and expensive healthcare puts pressure on policy decision-makers and industry managers. Health economists’ responsibilities range from assessing funding interventions to healthcare system expansions in developing countries.

The course is designed to meet demand by introducing students with quantitative, sciences or economics backgrounds to both the conceptual bases for economic evaluation and, in health economics, the advanced quantitative methods relevant to healthcare decision-making.

This course includes modules in economic evaluation, health economics, quantitative methods, economic evaluation workshops (modelling), welfare economics and epidemiology.

Students are also required to write a dissertation, often during a placement.

**Career opportunities**
Students will be prepared for career opportunities in economic consultancies, think-tanks and the pharmaceutical industry; professional associations, government bodies and NGOs; and research positions.

Graduate destinations include: Abacus International, NICE, Optum, IMS Health, the NHS, Kvis, Eli Lilly, OHE, United Nations, Fidelity, Johnson & Johnson, Novo Nordisk, Synovate and Tomtah.

city.ac.uk/seeh
Economics MSc

Duration
Full-time: one year
Part-time: two years

This course is designed to give students a solid foundation in microeconomics, macroeconomics and econometrics while allowing them to undertake modules across different specialisations.

This combination creates a range of career options in fields including industry, finance, government and academia.

The course is led by a team of academic staff who are leading experts in their field of research.

All students must complete either an economics literature survey or an economics dissertation. Students who choose to complete the literature survey must take eight modules (three core modules and five elective modules). Students who choose the dissertation must take six modules (four core modules and two elective modules).

Career opportunities
Graduates of this course enjoy a wide range of employment possibilities in both the public and private sectors, including consultancy and financial analysis. Recent graduate destinations for this course include: Economic Analyst, BlackRock; Assistant Economist, Department for Transport; Cash Funding Analyst, Mizuho International; Policy and Evaluation, Ipsos MORI; researcher; and economist. The course has also served as a stepping stone to economics PhD courses both in Europe and the US.

Financial Economics MSc

Duration
Full-time: one year
Part-time: two years

In a steadily globalising world, the demand for specialists in finance and economics continues to grow. This demand exists across a host of institutions, ranging from policymaking authorities such as central banks and international organisations to commercial banks and brokerages.

This course is designed to meet such increasing demand by incorporating both a solid education in economic theory and exposure to the field of finance through several specialised options. Most exciting is the unique opportunity to combine exposure to regulatory and policy aspects of finance with a thorough education in theory and quantitative methods.

All students must complete either a financial economics literature survey or a financial economics dissertation, which will affect the amount of elective modules they can take.

Career opportunities
Graduates of this course enjoy a wide range of employment possibilities in both the public and private sectors, including consultancy and financial analysis. The course also serves as a stepping stone to an economics or finance PhD. Recent graduate destinations for this course include: Economic Analyst, BlackRock; Cash Funding Analyst, Mizuho International; and Quantitative Analyst, BNP Paribas.

Health Economics MSc

Duration
Full-time: one year
Part-time: two years

This course is designed to meet the demand for quantitative and microeconomics analytical skills in decision-making in the healthcare sector, both in developed and developing countries.

It is intended for those who have a background in economics and are looking to specialise, although we also offer provision to those who are new to economics.

There is a Research path and a Literature Review path. For the former, students take six modules and write a dissertation. For the latter, students take eight modules and produce a literature review. Core modules include economic evaluation, health economics, microeconomics and econometrics. Elective modules can be taken from across the department and include economic evaluation, epidemiology and regulation and competition.

Career opportunities
This MSc prepares students for career opportunities in areas such as economic consultancies and think-tanks, teaching and research positions, professional associations and governmental bodies, NGOs and policy analysis for the pharma industry.

Recent graduation destinations include: Abacus International, NICE, Eli Lilly, Oxford Outcomes, Gallaher, IMS Health, Office of Health Economics and PhD positions at Oxford, Warwick, Sheffield and UCL.

English

Creative Writing and Publishing
MA

Duration
Full-time: one year
Part-time: two years

This master’s course is ideal for students who want to have a grounding in the business of publishing while fostering their creative ambitions.

Attracting a diverse group of students with a wide range of backgrounds, the course attracts both experienced and aspiring writers, and will appeal to anyone writing in the genres of literary fiction, fantasy, young adult, dystopian fiction and crime. Students gain the knowledge and skills relevant to professional practice in commercial publishing settings which produce creative content for both print and digital formats. Delivered by industry professionals and leading published authors, this course has a strong track record in students winning literary prizes, gaining representation and publishing contracts.

Career opportunities
Aspiring writers enjoy exposure to publishers and our alumni successes include Sonya Lalli’s *The Arrangement* (Orion) and Carlie Sorosiak’s *If Birds Fly Back* (HarperTeen). Students on the course have won the Orwell Society’s Dystopian Fiction Prize for three years running. The industry placement option also provides students with invaluable work experience in a wide range of London-based trade, academic and children’s publishers.

English
MA

Duration
Full-time: one year
Part-time: two years

This distinctive course approaches English as an academic subject that makes a significant contribution to cultural and social life. The course aims to enable students to develop a range of subject-specific, transferable and employability skills.

The MA English allows students to focus solely on English literature, or to combine literary scholarship with elective modules in Creative Writing and/or Publishing. The course’s varied, innovative assessment regime develops a range of academic and transferable skills.

The course’s predominantly contemporary curriculum explores questions of identity and genre. Students will benefit from advanced theoretical and research training and from access to London’s outstanding cultural and research facilities. Elective modules in Publishing and Creative Writing will enable the development of additional, aligned skill-sets.

Career opportunities
The MA English develops key transferable skills in research, critical analysis and oral and written communication relevant to a range of graduate careers. English graduates work in publishing, advertising and marketing, library science, digital media, charities and the heritage industry, teaching and journalism. The MA English also prepares students for further MPhil/PhD research and expedites their access to such courses.

Publishing/International Publishing
MA

Duration
Full-time: one year
Part-time: two years

City’s Publishing MAs cover all types of publishing, from trade and specialist publications to novels and non-fiction. Students complete core modules in term one, with options in term two including commercial and creative publishing projects, an interactive media module, a libraries and publishing module and a digital culture option. The MAs provide a thorough grounding in the drivers of commercial success for print and digital media, with a focus on the evolving implications of digital content and e-delivery. Students are educated both by expert scholars with up-to-date industry knowledge and publishing practitioners. Together, they support students to develop confidence and skills in the critical analysis of current global publishing conditions.

MA Publishers are encouraged to complete a 15-credit professional placement option and all of the MA International Publishing case studies relate directly to current publishing practice projects.

Career opportunities
Current industry knowledge and industry-focused projects are an integral part of these courses, providing experience, contacts and enhanced publishing skills.

Recent graduate job destinations include: Head of Operations and Digital, Fleet Street Publications, USA; Associate Editor, Aleph Book Company, New Delhi; Editorial and Production Assistant, Thames River Press; Digital Publishing Executive, Blackwell’s UK; and Account Executive, Faber Factory.

## International Politics

### Diplomacy and Foreign Policy MA

**Duration**
- Full-time: one year
- Part-time: two years

This degree explores issues and problems in the study of foreign policy through an engagement with the theoretical and real-world dimensions of foreign policy analysis, a salient strand of International Relations Theory. It focuses on traditions and techniques in the areas of strategy, diplomacy and decision-making, in the context of foreign policy and economic diplomacy.

The course deals with a range of topics relating to the economic, political and professional dimensions of diplomacy and foreign policy with reference to key regions. It provides students with a research-led education in this dynamic field.

Students explore professional approaches to policy formulation, decision-making and negotiation within organisations and between competing parties.

Through exercises, debates and simulations students experiment with different ways of defining problems, reconciling competing agendas, facilitating dialogue and mitigating risk.

**Career opportunities**
The MA in Diplomacy and Foreign Policy is designed for those planning, or already engaged in, a career in the diplomatic service, journalism, international organisations (such as the UN or the EU) or NGOs (such as Amnesty International or Oxfam). It also prepares students for a career in political risk, international finance and think-tanks.

---

### Global Political Economy MA

**Duration**
- Full-time: one year
- Part-time: two years

City’s MA in Global Political Economy (GPE) provides a cutting-edge perspective on global economic and financial relations, inter-state competition, mechanisms of global governance and processes of transformation and change.

The course consists of core modules on the history of global capitalism and contending approaches from across the political economy traditions. Students then develop specialist knowledge through elective modules, which cover issues such as economic and financial crises, international organisations and economic diplomacy, poverty and inequality, regionalisation and globalisation, states and sovereignty and the rise of new economic powers.

Students benefit from our internationally renowned expertise in the field of global political economy, exemplified by the leading academic staff who deliver the course, the vibrant research culture centred around the City Political Economy Research Centre and City’s central London location.

**Career opportunities**
This is a specialised degree enabling graduates with and without prior knowledge of economics to engage competently and confidently with economic and financial developments and pursue professional careers in the public and private sectors, international organisations or the media. The degree also provides a solid foundation for students wishing to pursue doctoral research in politics and political economy.

### International Politics MA

**Duration**
- Full-time: one year
- Part-time: two years

At the heart of contemporary international politics are new challenges to enduring problems. Increasing concerns such as poverty, terrorism, conflict, human rights, economic development, displacement and the global environment make the study of international politics a unique and exciting challenge. City’s MA in International Politics provides students with an opportunity to examine and critically evaluate issues of the contemporary world. It focuses on the study of global policymaking using theoretical and real-world approaches. In the core module students are introduced to the critical and theoretical study of international politics. Students are then able to choose elective modules covering their interests, including modules on development and inequality, security, foreign policy and diplomacy, religion, global economics and financial crises, migration, human rights and more.

**Career opportunities**
The skills, knowledge and expertise students develop during their time on this course open up several career opportunities for them. Whether students are looking to work at an NGO supporting developing nations or work closer to home as part of the civil service or media, they will develop enviable skills that are highly prized in several industries.

city.ac.uk/sinp
International Politics and Human Rights
MA

Duration
Full-time: one year
Part-time: two years

This is a course where students challenge their own point of view. The course unpicks the idea of human rights and how it structures the way we understand the world, so that students can identify how those understandings shape global events. Students then focus on developing the critical intellectual skills to challenge conventional views of international politics and how those views may be ethically problematic. International Politics and Human Rights is an evolving subject so students explore unique specialisms backed by real-world research. The department’s academics are actively affecting policy, conducting research that has shaped World Bank, UNHCR and European governments’ responses to the resettlement of refugees and other displaced persons, hosting talks on the right to employment in the UK and engaging in study groups around the Trump presidency.

Career opportunities
The skills students learn on this course (research, analysis and presentation) are highly valued by employers. The course gives students the perfect foundation for a career in a range of fields, from human rights organisations and NGOs to government agencies. Students graduate with the ability to undertake in-depth research, challenge received explanations of topics in social and political life and to critically evaluate the complex structure of contemporary international politics.

Broadcast Journalism
MA

Duration
Full-time: ten months

MA Broadcast Journalism is the keystone broadcasting course at City, highly rated by employers and with a national and international reputation. Students benefit from a diverse cohort of 50 with great networking/peer support. On news days, students work in groups of 15, covering news, sport and current affairs. The Final Project is a short documentary for television or radio, made individually or in pairs. Tutors include talkRADIO’s award-winning journalist Sandy Warr, former BBC/ITV producer-director Sally Webb, former BBC TV reporter Colette Cooney, APTN journalist George Negas and BBC World Service’s Dr Abdullahi Tasiu Abubakar. Visiting lecturers include former Reuters editor Lloyd Watson and former editor of The Andrew Marr Show, Professor Barney Jones. Other modules are taught with MA Television Journalism.

Career opportunities
Our Broadcast alumni have some of the most important jobs in production and management in the UK. Work experience days during the course are vital and owe a lot to City’s industry contacts. These are undertaken over 15 days, usually within the Christmas break. By learning to be an all-round broadcast news reporter with both television and radio skills, students will join an alumni that covers all parts of the broadcast industry from conventional television news to Buzzfeed and Vice. On-air alumni include the BBC’s Sophie Raworth and Chris Mason; Sky News’ Dermot Murnaghan, Isabel Webster and Darren McCaffrey; ITN’s Minnie Stephenson and many more.

Erasmus Mundus
MA: Journalism, Media and Globalisation

Duration
Full-time: two years

This is a unique two-year master’s course and part of the prestigious Erasmus Mundus programme (www.mundusjournalism.com). Students study as part of a diverse cohort of individuals from around the world.

Because this course brings together five leading European institutions in journalism and media education there is a wealth of international guest lecturers and academics. The first year is spent in Aarhus University, Denmark, the second at City, University of London or at Swansea University (Wales), University of Hamburg (Germany) or University of Amsterdam (Netherlands).

The course also offers exchange opportunities for students to travel to one of the following three institutions in the spring of the first year: University of California, Berkeley, USA; Pontificia Universidad Católica de Chile; or University of Technology Sydney, Australia.

Career opportunities
Students from the course have gone on to work for The Wall Street Journal/Dow Jones, the BBC, Reuters, China Daily, Danish Broadcasting Corporation, Helsingin Sanomat, TV 2 Norway, Xinhua News Agency, Bangkok Post, Associated Press and Platts. Other students are working for international organisations, including the Organisation of Petroleum Exporting Companies and the European Commission or for international corporations including Morgan Stanley.

Financial Journalism

MA

**Duration**
Full-time: ten months

This exciting and contemporary course continues to develop in response to the rapidly changing environment of digital journalism in the UK and internationally, with a focus on social media, multimedia storytelling and data journalism. Video and audio work are also geared to online.

Students are encouraged to undertake work placements to develop further the skills they learn on the course. In addition to online specialisms, students learn the journalism essentials of writing, reporting, newsgathering, interviewing and feature writing: core elements of our renowned MA course.

The Interactive Journalism course has a strong reputation for preparing students for specialist jobs, such as data journalism, social media and audience development, as well as broader roles in digital journalism. Learning from current journalists ensures up-to-date skills and relevant industry contacts.

Career opportunities
Graduates of the course have gone on to work for Bloomberg, the Financial Times, the BBC, The Wall Street Journal/Dow Jones, CNBC and The New York Times. Other students have been employed by specialised business publications such as Citywire and Interactive Investor. Outside London, students are working as financial journalists in other major financial centres such as Hong Kong, Paris, New York, Tokyo, Dubai and Mumbai.

Interactive Journalism

MA

**Duration**
Full-time: ten months

The MA in Financial Journalism is a unique course that offers students the chance to specialise as a journalist with professional knowledge and skills, reporting on important international issues including global economics, the financial markets and the latest trends in fintech. Students have the opportunity to visit China and New York on study trips supported by the Marjorie Deane Foundation, to learn first-hand about these major global superpower economies. The course is truly distinct in its international reach and breadth of opportunity, giving the opportunity to develop the professional skills and knowledge needed to work in a multimedia environment. By the end of the course, students will have an extensive education in the best professional practice of reporting business and financial news, using state-of-the-art Bloomberg and Reuters terminals, to produce unique coverage of the UK budget and a business television show.

International Journalism

MA

**Duration**
Full-time: one year

The International Journalism course was started in 1982 and has built a worldwide reputation with well over 1,000 alumni working all over the world. Students become adept at broadcast, print and online journalism in a global context. They study international news and obtain a profound understanding of international journalism from a UK perspective.

Students practise all platforms of journalism (broadcast, print and online) and also explore theory and reflect on their practice. Students come from all over the world and have the benefit of being in one of the world’s most significant media cities with access to thousands of international journalists and sources.

On this course students benefit from using both traditional and contemporary journalism tools and acquire comprehensive skills.

Career opportunities
Typically, more than 92 per cent of graduates from this course are in employment six months after completing it. Some go on to further study. Graduates work in both global and national media and in allied occupations around the world. Most recently, these have included roles from researchers to editors in media such as the BBC World Service, Al Jazeera, Deutsche Welle, CNN, France 24, Bloomberg, Sky, Fox, Thomson Reuters, AP and Dow Jones and major newspapers and magazines including The New York Times, Financial Times, The Hindu, Politiken, GQ, Euronews, Radio France Internationale (RFI) and The Times.

Investigative Journalism  
MA

The pioneering course is an intense, challenging degree designed to equip students with the reporting and research skills needed to produce investigations that matter. Basic reporting leads quickly to advanced methods including working with data, building sources and using public records and access laws.

Case studies of high-profile investigations help students understand how to investigate companies, organisations and individuals for issues of public concern, miscarriages of justice or abuse of power, within an ethical and legal framework. Small groups help focus on producing high-quality narrative writing, while students also learn professional multimedia skills including audio and film. Students will complete several complex and ambitious investigative projects under the tutelage of some of the most experienced professionals in the field including course leader Professor Heather Brooke, who exposed the MPs’ expenses scandal.

Career opportunities
Graduates move into employment across print, online and broadcast media, from The Times, The Daily Telegraph, The Guardian and Buzzfeed and quality regionals, trade and current affairs magazines including The Spectator and New Statesman, to BBC Panorama, Sky News, Bloomberg TV, regional BBC TV, CNN, independent production companies and the Bureau of Investigative Journalism. Graduates also find work with non-profit organisations such as Greenpeace or for media organisations overseas and for charities.

city.ac.uk/aivj

Magazine Journalism  
MA

This hugely successful and well-established course prepares students for a wide range of careers in magazine and features journalism, both in print and online, from glossy consumer titles to international news journals. Skills learnt include: writing long-form investigative features to arts and culture reviews; polished profile pieces to podcasts and video editing for online; designing and subbing print and online pages and picture editing. There is a strong entrepreneurial angle to the course and students learn how to research, create and launch new media products and to engage audiences.

Accredited by the Professional Publishers Association, students learn from magazine and specialist journalists and around 30 visiting editors, commissioning editors and editorial directors from the UK’s leading publishing houses.

Career opportunities
Graduates occupy top positions in magazines, newspaper supplements and digital content providers, including Harper’s Bazaar, The Guardian Weekend, The Week, BlueJam Media, Stylist, Esquire, New Statesman, The London Magazine; B2B magazines such as Architects’ Journal, Estates Gazette, Chemist & Druggist, Travel Weekly; customer magazines such as BA’s High Life; and major newspapers including London Evening Standard, The Observer and The Sunday Times.

city.ac.uk/amjo

Newspaper Journalism  
MA

This fast-paced, exciting degree is designed to train the future reporters, correspondents and editors of the world’s leading media organisations. The course was established in 1982 and has an exceptional reputation for helping aspiring journalists gain employment. Students benefit from a central London location, unrivalled industry contacts and a thorough grounding in the best practices of professional journalism.

The course combines education in reporting, interviewing, writing, editing, research and newspaper production (in print and online) with a concern for professional standards and critical and ethical reflection. Multimedia work is geared to online. Students are encouraged to undertake work placements to put into practice the skills they learn at City. There is scope for students to develop specialist areas and topics on which they wish to concentrate.

Career opportunities
Graduates have gone on to work for a wide range of news organisations, including national newspapers (The Guardian, The Daily Telegraph, Daily Mail, The Times, Daily Mirror, The Sun, The Sunday Times, Financial Times, Metro); broadcasters (BBC, Sky, CNBC); online/news agencies (Press Association, Bloomberg, Huffington Post, BuzzFeed); magazines (New Statesman, Prospect, Newsweek); regional press (London Evening Standard, City AM, Manchester Evening News); and international newspapers (The Daily Star, Beirut; South China Morning Post, Hong Kong).

Sophia Pathak
(MA Magazine Journalism)
Television Journalism
MA

**Duration**
Full-time: ten months

This course is uniquely well connected to excellent contacts within the industry and provides 20 work experience days for every student. Approximately 30 students work in groups of 15 on news days, covering news, sport and current affairs. The Final Project is a 28-minute television documentary made in teams of three; these have won awards including The Guardian Young Journalist of the Year and the BJTC documentary award. Tutors include former BBC/ITV producer-director Sally Webb, ABC news producer Mike Trew, talkRADIO’s award-winning journalist Sandy Warr, APTN journalist George Negas and BBC World Service’s Dr Abdullahi Tasiu Abubakar. Visiting lecturers include former Reuters editor Lloyd Watson and former editor of The Andrew Marr Show, Professor Barney Jones. Other modules are taught with MA Broadcast Journalism.

**Career opportunities**
Our employment rate is exceptionally high. Our alumni have gained great jobs on- and off-screen including: Alistair Bunkall, Reporter, Sky News; Osama Bin Javaid, News Anchor, Dawn News Pakistan and Al Jazeera; Claire Burton, News Presenter, BBC Channel Islands; Rose Hughes, Reporter, Sky News; Annabel Archer, Producer, CNN; Warren Nettleford, Reporter, ITN 5 News; and many more. Work experience days are undertaken each Wednesday in terms one and two and owe a lot to City’s industry contacts. Students go to one company or broadcaster for around ten consecutive weeks and build relationships with employers.

Music

Composition
MA

**Duration**
Full-time: one year
Part-time: two years

The MA in Composition develops skills in the broad field of contemporary composition, encompassing notated and digital music, sound art, improvisation and interdisciplinary practices. The course also provides a critical context for exploring key topics and issues in contemporary composition.

Engagement with professional creative practice lies at the core of the course. There are opportunities to work with performers and other collaborators on innovative new projects and to present compositional work to an audience of peers. Students have the opportunity to engage with world-renowned composers external to the department, as well as with City’s professional ensembles in-residence, Plus Minus and Exaudi. The department regularly hosts visiting composers and sound artists.

The course provides ideal education for those wishing to enter the professional world of composition and/or proceed to a research degree.

**Career opportunities**
The MA Composition has excellent employment statistics. Students have gone on to teach, compose and perform in a wide variety of settings and are also employed in areas such as music publishing, broadcasting, music management, arts administration and further musical study at MPhil or PhD level. Our alumni include award-winning composer Nico Casal (Best Short Film at the 2016 Oscars), composer Javier Alvarez and film sound designer Chris Reading.

Psychology

Behavioural Economics
MSc

**Duration**
Full-time: one year
Part-time: two years

Behavioural economics applies psychological insights to human behaviour to investigate how people make economic decisions under various conditions of constraint (e.g., time and knowledge) and influence (e.g., social pressure). This is an important field in modern economics and the social sciences more generally.

Commercial organisations have long known the limitations of individual decision-making and they routinely use this knowledge in their commercial practices (e.g., the anchoring effect of minimum payment on credit cards). The real-world implications of behavioural economics are varied and significant and acknowledged to provide a powerful and cost-effective approach to improving human welfare.

This MSc is the only one of its type in central London. Unlike other courses, Behavioural Economics at City is based in both the Economics and Psychology departments, offering students a good balance of both disciplines.

**Career opportunities**
Behavioural economists use data to understand human behaviour better. These highly valuable skills can be applied in a range of professions, for example to formulate policies or to analyse consumer behaviour. There is increasing demand for behavioural economists in a range of sectors, including financial trading and risk assessment, consumer psychology and marketing, consulting and public policy. The research focus of the MSc also allows graduates to succeed in PhD courses in Economics or Psychology.

city.ac.uk/sbec
Clinical, Social and Cognitive Neuroscience
MSc

**Duration**
Full-time: one year
Part-time: two years

The aim of this course is to provide students with a thorough grounding in clinical, social and cognitive neuroscience. Students gain a deep understanding of how different brain functions contribute to cognition, mediate social interaction and determine mental health, wellbeing and psychiatric illness. Students learn about the latest advances in clinical, social and cognitive neuroscience and develop an appreciation of the reciprocal nature of research and practice in these domains.

The Department of Psychology strives to provide a supportive, vibrant research environment and excellent research-led education, delivered by internationally recognised experts.

The Centre for Psychological Wellbeing and Neuroscience has close links to the community mental health services, like City & Hackney Mind, while providing opportunities for some students to gain experience in clinical settings.

**Career opportunities**
This MSc provides a gateway to the clinical professions. Students will also be well placed should they wish to undertake further professional training in clinical psychology, or a related discipline. For students wishing to continue their PhD studies this MSc is an ideal platform from which to progress, particularly in Cognitive or Social Neuroscience.

The knowledge and skills students will acquire are sought after in many sectors (neuro-marketing, media and the arts, business and education).

Counselling Psychology
GradCert

**Duration**
Part-time: one year

The Graduate Certificate in Counselling Psychology provides an excellent foundation for students who wish to extend their knowledge and experience prior to undertaking more advanced professional training in counselling psychology or related disciplines. The course gives students the opportunity to learn about the interpersonal and therapeutic skills which are the foundation of the counselling process and also provides a range of theoretical frameworks, linking psychological theory and counselling technique and acting as a template for model-based counselling practice. Experiential learning and skills practice are central to this course. The course may also be of interest to healthcare professionals, teachers, social workers, managers and others who wish to enhance their psychological knowledge and counselling skills and apply them within their professional practice.

The Centre for Psychological Wellbeing and Neuroscience has close links to the community mental health services, like City & Hackney Mind, while providing opportunities for some students to gain experience in clinical settings.

**Career opportunities**
This MSc provides a gateway to the clinical professions. Students will also be well placed should they wish to undertake further professional training in clinical psychology, or a related discipline. Counselling Psychology
DPsych

**Duration**
Full-time: three years

The Professional Doctorate in Counselling Psychology is a professional course, approved by the Health and Care Professions Council (HCPC) and accredited by the British Psychological Society (BPS).

Counselling Psychology at City has a long-established tradition and was one of the first courses to be accredited by the BPS in 1995. We have retained our accreditation since then, constantly keeping pace with developments both nationally and internationally and maintaining our reputation for innovation and excellence.

Students learn to work with a wide range of complex presenting issues; with individual adults and children; couples; families; groups and organisations; short- and long-term; in single- and multi-professional contexts; and through transferring psychological skills to others in multidisciplinary teams.

**Career opportunities**
This professional and academic course enables students to work in a broad range of settings, including the NHS, forensic settings, third sector (voluntary), industry, government, private practice, academic and research settings. Recent graduate job titles include: consultant psychologist, counselling psychologist, high intensity therapist, lecturer and practitioner psychologist.

Organisational Psychology
MSc

Duration
Full-time: one year
Part-time: two years

This course incorporates: organisational development and change; improving employees’ wellbeing; occupational choice; coaching psychology; selection and assessment; mindfulness; leadership; learning and training.

City’s long-standing and award-winning MSc in Organisational Psychology provides students with in-depth theoretical and research knowledge in these and related areas. Students have opportunities to develop a range of organisational consulting skills such as managing client relationships, facilitating participative decision-making, negotiating access into organisations, facilitating employee focus groups and providing feedback.

The course covers the five knowledge areas for occupational psychology, as outlined by the British Psychological Society (BPS). The course is delivered by a dedicated team of research-active and chartered occupational psychologists.

Career opportunities
This course has high levels of employability, with many of our students securing roles within the field, within public and private sector organisations including BIS, HSBC, KPMG and Ministry of Defence, large and small occupational/business psychology consultancies and human resources departments. The high-quality research focus means some graduates also go on to complete PhDs.

Research Methods with Psychology
MSc

Duration
Full-time: one year

This course provides education in psychological research methods, including research design, statistical methods and relevant software. It comprises seminars, lectures, computing and statistics classes and an individual research project/dissertation.

The course draws on our other MSc courses, especially the MSc in Behavioural Economics (particularly for generalised linear model training, undertaken using ‘R’ software), the MSc in Clinical, Social and Cognitive Neuroscience (particularly for programming and computational modelling training, undertaken using Matlab software) and our School-wide MSc Research Methods course (particularly for qualitative methods training).

Optional modules introduce psychological content with a less methodological focus in order to provide a broader context for the methods being taught.

Career opportunities
Possible career paths for graduates of this course include academic research (usually following a PhD) or work involving central and local government agencies, public health, the voluntary sector, market/media research, or management consultancy.

city.ac.uk/srwp

Research Methods
MSc

Duration
Full-time: one year
Part-time: two years

The MSc in Research Methods offers theoretical and applied education in research methods and analysis for the social sciences. It is designed to provide students with an understanding and appreciation of qualitative and quantitative research methods over a range of disciplines. It is also designed to equip students with real-world skills in collecting and analysing empirical data and reporting research findings.

The course is a School-wide master’s degree, offered by the School of Arts & Social Sciences, whose staff cover a diverse range of substantive research interests. Staff are experts in a plethora of methodologies, from personal interviewing to large-scale survey research. The course consists of modules from interdisciplinary core subjects, department-specific elective modules and a dissertation comprising a piece of original empirical research.

Career opportunities
There is a high demand for Research Methods graduates and there are excellent employment opportunities to work in several sectors, including academic research, central and local government agencies, public health, the voluntary sector, market and media research. The course is also an ideal foundation for students who wish to pursue doctoral research in social sciences.

### Sociology

#### Criminology and Criminal Justice
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

Understanding criminality and crime control in the 21st century requires researchers and professionals who are able to think globally and work across disciplines. This MSc enables students to develop the theoretical understandings and methodological skills to navigate this ever-changing policy field.

The MSc in Criminology and Criminal Justice develops students' ability to use criminological knowledge to analyse the problem of crime and crime control strategies, equipping them with the skills they require to become experts in their field.

The MSc is delivered by internationally recognised criminologists who work closely with students throughout their studies. We have particular expertise in policing and surveillance studies, victimology, feminist criminology, youth cultural studies, penology, criminal justice policy, theoretical criminology and media criminology.

**Career opportunities**
Graduates pursue careers in criminal justice and related professions, both nationally and internationally. These include careers in the police, the prison service, probation or one of the many criminal justice charities based in London. Others may wish to pursue a career in research, policy development, campaigning or advocacy work.

Whatever a student’s career choice, the course team will work with them to develop the specialist skills that they require.

**Find out more**
city.ac.uk/sccj

#### Culture, Policy and Management
**MA**

**Duration**
- Full-time: one year
- Part-time: two years

With an MA in Culture, Policy and Management, students can shape the cultural and creative sector and gain experience inside leading arts organisations (London-based or international).

We have 13 elective modules to choose from, meaning students can customise their learning so they can become a competent professional ready to start, continue or change their career. On completion of the course students are able to evaluate and integrate the theories and practices of culture, policy and management.

The student experience runs through everything we do on the course. The curriculum was developed in consultation with senior creative industry figures so students’ learning is attuned to the latest insights from the sector.

**Career opportunities**
Launched in 1974, this pioneering course has over 3,000 alumni including key figures such as Tate Britain Director Alex Farquharson and UN World Tourism Organisation Culture Adviser Jin Yung Woo.

Our graduates find employment in creative industries globally, from orchestras to film, fashion, events or museums; from marketing to policy or management. Examples include: Ullens Art Centre, Beijing; Royal Opera, London; and Christian Dior, Paris.

**Find out more**
city.ac.uk/scpm

#### Food Policy
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

Students gain in-depth knowledge of policies that affect activities related to producing, processing, distributing, marketing, preparing and consuming food. This holistic approach makes the course unique.

Students gain a critical understanding of the social, nutritional, health and environmental implications of all these different elements of the food system, at local, national and international levels.

The course is interdisciplinary, drawing on disciplines including sociology, politics, economics, geography, epidemiology and health sciences. The aim of the course is to enable students to consider how food policy could better address the totality of the challenges posed by modern food systems and to empower them to formulate solutions. It addresses the major food questions of our time: How can policy be used to feed people healthily, sustainably, equitably and affordably? Why is this not happening?

**Career opportunities**
This course has been running for 20 years and has a thriving community of alumni working in very diverse sectors. Some work for governmental departments in the UK and abroad, or international organisations such as the FAO. Many work for (and often lead) civil society organisations campaigning for change in the food system. Others have established their own companies as food entrepreneurs. Students may also continue to a PhD.

**Find out more**
city.ac.uk/sfop
**International Communications and Development MA**

**Duration**
- Full-time: one year
- Part-time: two years

Communication is integral to development programmes. At a time when ideas about freedom of expression, democracy, human rights and access to natural and material resources guide development projects across the world, the question about the role of media and communications for social change becomes ever more pertinent.

The MA in International Communications and Development provides an interdisciplinary framework to understand and critically assess the role of communications for and in development projects.

Development is taken as a contested concept that translates into courses for advocating democratic forms of participation, policy initiatives and training activities in media and communications sectors in different geographical regions.

**Career opportunities**
Graduates have entered a wide variety of careers in broadcasting, press and telecommunications networks, NGOs, the development sector and consultancies, advertising, marketing, politics, journalism, PR, media management and regulatory agencies.

**Find out more**
city.ac.uk/sicd

---

**Media and Communications MA**

**Duration**
- Full-time: one year
- Part-time: two years

This course provides a thorough grounding in the social and political context of communications sociology and an advanced understanding of recent developments and current debates in media and communications. The methodological approaches and research tools learned can be professionally applied to working in the field. These are employed in students’ individual research projects.

The extensive range of elective modules allows students to specialise their degree to their own area of interest and view broader social issues through the lens of communications.

Students receive a top-class education and our research-led learning in communications and sociology keeps students’ degrees contemporary.

**Career opportunities**
The Media and Communications MA and International Communications and Development MA have an outstanding record for graduate employability.

Graduates have entered a wide variety of careers, recent job titles include: marketing manager, business development and relationship manager, communication and advocacy officer, HR advisor and communications consultant.

(MSc Economics)
Sir John Cass Business School has been at the forefront of business education for over 50 years. Located in the heart of one of the world’s leading financial centres, Cass is part of an elite group of business schools to have been awarded triple accreditation by the Association to Advance Collegiate Schools of Business (AACSB), the Association of MBAs (AMBA) and the European Quality Improvement System (EQUIS).

Cass Business School

Academic staff at Cass are world-leading experts in their fields of academic and applied research: they are highly sought-after by companies, governments and international bodies for their specialist knowledge. Their work shapes policy, debate and business practice at the highest levels. The Faculty of Finance at Cass is one of the largest and most respected in the world and is renowned for its expertise in accounting, asset pricing, banking, corporate finance, financial markets and regulation, international finance and shipping finance. Academic staff in the Faculty of Management specialise in all areas of management studies, including strategy, entrepreneurship, corporate social responsibility, marketing, information management, organisational behaviour and human resource management.

The Faculty of Actuarial Science and Insurance, one of the leading departments of its kind, undertakes theoretical and applied research into pensions, life and general insurance and healthcare.

The Research Excellence Framework (REF) 2014 rated 84 per cent of the research submitted by Cass as within the top two categories of ‘world-leading’ (4*) or ‘internationally excellent’ (3*). This placed Cass in the top six in the UK. The outcome of this independent review highlights the world-class quality of Cass research and recognises the impact it has on business, the professions and policymakers. Postgraduate students at Cass benefit from the instruction and supervision of these pre-eminent academics, who make great contributions in advancing their specialist fields.

The master’s, MBA and PhD courses offered at Cass are consistently ranked among the best in the UK and the world. Courses are academically rigorous and characterised by a real-world approach that ensures graduates are prepared for top-flight careers in their chosen fields, whether business, finance, entrepreneurship or academia. Each year, around 2,000 students from all over the world choose Cass for their postgraduate courses, creating a uniquely international environment in which to study, socialise and build networks that remain in place beyond graduation.

Cass blends academic excellence with, extraordinary experiences and career progression to foster lifelong learning.

### Actuarial Management
**MSc**

**Duration**
- Full-time: one year
- Part-time: two years

This course is aimed at those who wish to study material relevant to the examinations of the Institute and Faculty of Actuaries.

It has been designed to meet the needs of actuarial employers and employers from other sectors requiring financial risk managers. Emphasis is placed on skills in the areas of life and non-life insurance, pensions, finance and investment.

The course is accredited by the Institute and Faculty of Actuaries, enabling students to study the key areas of actuarial practice and gain exemptions from some subjects of the Institute and Faculty of Actuaries.

**Career opportunities**
There is a strong demand for graduates educated to a postgraduate degree level in Actuarial Management and members of the actuarial profession are among the highest paid in the UK. They work in fields including insurance, consulting, government, banking and investment and academia.

Recent graduates have gone on to work at Aon Hewitt, Barnett Waddingham, Reliance General Insurance and Willis Towers Watson.

**Find out more**
city.ac.uk/cacm

### Actuarial Science
**MSc**

**Duration**
- Full-time: one year

An actuary is a professional who applies mathematical and statistical techniques to financial problems. This course is aimed at highly numerate students who wish to pursue actuarial careers in insurance, pensions, finance, investment, financial risk management, consultancy and related areas. This fast-track study route allows students to gain professional qualifications before embarking upon their career.

The course is also aimed at actuarial trainees and associates. Up to eight exemptions from core technical subjects can be gained from the current system of professional examinations of the Institute and Faculty of Actuaries. This is just over half the examinations required for Fellowship, so saves several years of study.

**Career opportunties**
The actuarial profession is a small but highly respected body whose members are among the highest paid in the UK. Cass graduates work for a range of employers, including insurance companies, investment and retail banks, actuarial consultancies and government and non-government organisations.

Recent graduates have gone on to work at Aon Hewitt, ICBC Standard Bank, PwC, Royal London Group, and Zurich.

### Banking and International Finance
**MSc**

**Duration**
- Full-time: one year

This course reflects the wide and sophisticated range of activities within banking, a sector which has experienced dramatic development and change in recent years.

The MSc in Banking and International Finance is designed to equip students for a wide range of careers in the banking and international finance sector.

Around 35 nationalities are represented in a typical intake, with the global dimension of the course further enhanced by the diverse backgrounds of the permanent and visiting academic faculty. This international perspective adds range and depth to the student experience, while generating worldwide networking opportunities after graduation.

The course is a Chartered Financial Analyst Institute (CFA) Partner Programme.

**Career opportunities**
Graduates move into a very wide range of careers in banks, as portfolio managers, in finance departments of industrial and service companies, as consultants, in central banks and as auditors in multinational financial organisations.

Recent graduates have gone on to work at BNP Paribas, Citibank, EY, Grant Thornton International Ltd, Goldman Sachs and KPMG.

## Business Analytics
### MSc

**Duration**
Full-time: one year

The MSc in Business Analytics combines academic rigour with authentic experience, supporting the career progression of students aiming to generate and capture greater competitiveness in data-driven businesses.

Essential analytical skills and business knowledge are sought to improve the operational efficiency, business performance and strategic management of an organisation. This course aims to bridge the gap between the computing function and business leaders.

The main purpose of the course is to develop a comprehensive set of skills and encourage attributes that are essential to becoming a successful business analyst. Besides promoting effective and persuasive communication, the module leaders draw attention to ethics-related issues, which are key to responsible leadership.

**Career opportunities**
Graduates are trained to participate in the strategic management process, improve financial performance and advise on designing effective measures of organisational performance, for which evidence-based data is a strategic asset in the decision-making process. The aim is to provide a foundation for those who will determine the scope and direction of data analytics research within an organisation.

[city.ac.uk/buan](http://city.ac.uk/buan)

## Corporate Finance
### MSc

**Duration**
Full-time: one year

The MSc in Corporate Finance is an exciting and ‘hands-on’ course that develops students' financial expertise in the area of corporate finance, which is one of the largest, most popular and vibrant sectors of financial services.

The degree equips students with the knowledge to successfully navigate the rapidly changing global landscape of corporate finance. It focuses on topics such as: how firms make investment decisions, what sources of financing are available to businesses, how to create value through mergers and acquisitions and IPOs, investment banking services, valuation, stock market performance and more.

The course is a Chartered Financial Analyst Institute (CFA) Partner Programme and is also accredited by the Chartered Institute of Management Accountants (CIMA) and the Association of Chartered Certified Accountants (ACCA).

**Career opportunities**
Graduates move into a diverse range of financial sector careers, including top finance and managerial positions at family and global firms, investment banking, commercial banking, securities sales and trading, hedge funds, private banking, asset management, credit products, financial and credit risk management and consultancy.

Recent graduates have gone on to work at Accenture, Arma Partners, Bloomberg, EY, Macquarie, Nomura Holdings, UniCredit and Vodafone.

**Find out more**
[city.ac.uk/ccof](http://city.ac.uk/ccof)

## Energy, Trade and Finance
### MSc

**Duration**
Full-time: one year

This course offers a unique approach to global business. Students are equipped with key skills in the areas of energy and commodity economics, trading, transportation, finance and risk management.

The MSc in Energy, Trade and Finance was launched in September 2003 and was the culmination of talks between Charles Daly (Chairman and CEO at Channoil Consulting) and Cass about the need to provide postgraduate education to top-quality recent graduates interested in a career in the energy and commodities sector and to young professionals who wanted to consolidate their industry experience with a focused and professional master’s qualification.

The course is validated by the Energy Institute and students can become members after graduating.

**Career opportunities**
Graduates from the MSc in Energy, Trade and Finance hold key positions and have eminent careers in over 70 countries in fields such as commercial banking, commodity trading, government, investment banking, law, logistics management, management consultancy, manufacturing, shipping, finance, shipping operations, stockbroking and university research and teaching.

Recent graduates have gone on to work at BearingPoint, Cargill, Gerald UK Ltd, Macquarie, Mercuria Energy Group, Shell and Wood Mackenzie.

**Find out more**
[city.ac.uk/cetf](http://city.ac.uk/cetf)
Entrepreneurship
MSc

Duration
Full-time: one year

Created and delivered by leading academics and entrepreneurs, this degree equips aspiring entrepreneurs with the toolkit and experience necessary to successfully launch new ventures and make a significant impact in their sector.

The course is equally valuable for professionals who wish to take their career to the next level by learning how to be more entrepreneurial and creative within a large corporation.

Can entrepreneurship be taught? Yes. Just as we can educate people to become doctors, engineers and lawyers, we can train people to become entrepreneurs.

Throughout the course students are encouraged to develop an attitude towards learning from failure and taking calculated risks. We cover challenges and risks that entrepreneurs face and ways to recover from failure.

Career opportunities
Depending on the student’s sphere of interest and expertise, potential opportunities after graduation include continuing as the founder or CEO of the venture created during their studies. This may be in a range of sectors, including IT and e-commerce, banking and finance, consulting, professional services, engineering, manufacturing and retail.

Recent graduates have gone on to work at China Merchants Bank, EY, Hays, Prism Sport & Entertainment and Square.

city.ac.uk/cent

Finance
MSc

Duration
Full-time: one year

Grounded in research that shows that medical leadership improves healthcare system performance, this advanced leadership degree is distinct in targeting doctors. It aims to develop medical leaders who can transform healthcare systems in ways that ultimately help people live longer, healthier lives.

A key feature of the course is its dual focus on personal development and research-based conceptual knowledge. The course combines master’s-level learning about people, innovation and change in healthcare with students’ own development as effective leaders in a medical environment, drawing on Cass’s world-class research capabilities and experience of executive development.

This degree enables students to meet the Faculty of Medical Leadership and Management’s leadership and management standards for medical professionals.

Career opportunities
Outstanding doctors with leadership skills are sought after in many sectors globally. These include healthcare providers, pharmaceuticals, NGOs, social and private enterprises, insurance, medical devices, biotechnologies, health policy and regulatory organisations and management consultancy firms. Clinical consultants may migrate into senior leadership positions, GPs may progress to become practice partners and junior doctors will be primed for management.

Jiahui Wang
(MSc Investment Management)
**Global Finance**

**MSc**

**Duration**

Online, part-time: two years

At Cass, we are committed to offering high-quality MSc courses to the widest possible audience, including students who prefer not to relocate to London to continue their studies. Choosing the online MSc in Global Finance allows students to continue working and experience the benefits of a Cass master’s, combined with the convenience and flexibility of studying online from home or on the move anywhere in the world.

Developing students’ financial expertise to the highest level, the course provides a comprehensive grasp of the principles and theories of finance and their application to real-life corporate situations. It is set in the context of the wider global economic environment and encourages students to critically analyse contemporary theories and real-world case studies.

**Career opportunities**

The world of international finance, with its many career opportunities and continuous demand for sharper, brighter and more adaptable employees, is an attractive choice for many top-calibre candidates. The course has the potential to open up global career opportunities for students in a rapidly changing and ever more complex business environment, equipping them with a combination of high-level interpersonal skills, in-depth knowledge and analytical skills.

city.ac.uk/cgfi

**Global Supply Chain Management**

**MSc**

**Duration**

Full-time: one year

This course combines a 360-degree perspective of global supply chains, based on the most recent academic research and examples of innovative current business practices, with strategic and analytical tools to manage them.

The course is designed to produce confident professionals, who have the knowledge and skills to tackle supply chain opportunities and challenges. It explores supply chain management topics within all contexts of decision-making, including procurement, operations, logistics, corporate social responsibility (CSR), finance, analytics and consulting skills.

Applying theory through various learning tools and live cases enables students to understand the complexity of managing global supply chains and develop the necessary critical thinking and communication skills.

**Career opportunities**

The aim of this course is to develop graduates with strong strategic supply chain knowledge and advanced analytical and consulting skills. For this reason, students can continue their careers in a diverse set of sectors from retail to consulting to production to logistics.

Recent graduates have gone on to work at AB InBev, Bosch, Danone Waters China, KPMG, Innocent Drinks, SkylogistiX.

city.ac.uk/cgsc

---

**Financial Mathematics**

**MSc**

**Duration**

Full-time: one year

This course concentrates on the mathematical and financial theory required to develop new products for hedging and risk management. It provides the tools necessary to undertake high-quality research in financial and academic institutions.

Students acquire an in-depth knowledge of financial mathematics. This includes financial theory and stochastics, along with probability theory and programming. These are then applied for asset pricing, interest rates modelling and risk management.

Graduates are suited for jobs in investment houses involved in derivatives valuation and portfolio management, research departments within banks and consultancy firms. They are also equipped for careers involving the development of pricing and risk management models and their testing, or as risk analysts or quantitative analysts.

**Career opportunities**

Alumni are typically working in one of two fields: derivatives valuation and portfolio management within investment houses or research departments within banks and consultancy firms.

Recent graduates have gone on to work at Npower, PwC, SS&C Technologies and Total UK Ltd.

Cass Business School
**International Business**
MSc

**Duration**
Full-time: one year

The course will equip students with relevant tools for international business career success by offering specialisations in core functional areas of their choice. Delivery of courses has a strong experiential element, including study tours abroad.

Students will also appreciate the social impact that business has in society. This is especially pertinent in the backdrop of the current anti-globalisation drivers and the accelerating digital transformation of business.

The course offers core modules in term one and options to customise your intellectual journey in terms two and three. In term three students have a large range of international electives to choose from and an internationally focused business research project.

**Career opportunities**
Recent Cass business graduates have found roles in a variety of industries including creative, high technology, hospitality, finance, fast-moving consumer goods, media and entertainment, luxury goods and real estate.

[city.ac.uk/inbu](http://city.ac.uk/inbu)

---

**Investment Management**
MSc

**Duration**
Full-time: one year

The MSc in Investment Management is founded on three principles: academic rigour, relevant knowledge and a professional orientation. Students acquire a sound knowledge of the foundations that underpin modern investment and risk management techniques.

These principles are applied in practice through case studies and the use of online databases such as Bloomberg and portfolio management simulation exercises. The professionally orientated aspect of the course is delivered by academics with significant industry experience as well as leading industry practitioners, providing a vital link between theory and practice.

The course is a Chartered Financial Analyst Institute (CFA) Programme Partner and is accredited by the Chartered Institute for Securities & Investment (CISI), the Chartered Insurance Institute (CII) and the Chartered Alternative Investment Analyst Association (CAIA).

**Career opportunities**
Graduates work as traders, fund managers, risk managers, security analysts, brokers and corporate treasurers.

Recent graduates have gone on to work at Barclays, Citi, Grant Thornton, Invesco PowerShares, Liberty Specialty Markets and Terra Capital Advisory.

[city.ac.uk/cinm](http://city.ac.uk/cinm)

---

**Management**
MSc

**Duration**
Full-time: one year

This course is academically rigorous and professionally orientated, giving graduates the opportunity to develop knowledge and skills in key areas of modern management.

It is based on an MBA-style curriculum and is academically demanding without neglecting the applied, real-world aspects of management education. Students come from a range of backgrounds to experience the unique Cass environment of learning, teamwork and collaboration.

The course equips students with the foundations of business management and the most advanced tools and theories and outstanding professional skills. These often come directly from the research carried out by Cass’s world-renowned faculty.

Students have the option of an international trip/business plan competition and a range of international electives.

**Career opportunities**
Graduates move into a diverse range of careers, including consulting, marketing, advertising, luxury goods, wealth management, working for a family business or setting up their own business.

Recent graduates have gone on to work at Arthur D Little, Bloomberg, Capgemini Consulting, GEP, Marriott Hotels International and Morgan Stanley.

[city.ac.uk/cman](http://city.ac.uk/cman)
## Marketing Strategy and Innovation
**MSc**

**Duration**
- Full-time: one year

This course equips students with the analytical capabilities needed to deal with complex marketing issues.

The MSc in Marketing Strategy and Innovation also instils essential ‘soft’ skills – including creativity, initiative, persistence, team working, communication and leadership – required to influence people and organisations.

Providing an academically rigorous and professionally relevant education, this course combines sound theoretical foundations in marketing and innovation with a deeper examination of key topics such as brand management, digital marketing and consumer behaviour.

Crucially, the course enables students to harness the latest digital technology in the pursuit of effective solutions. A strong professional dimension includes opportunities to tackle real-world marketing problems, enter competitions and the possibility to undertake an international trip.

This course comprises core modules in terms one and two followed by two core modules and a Business Research Project or three electives in term three.

**Career opportunities**
Recent graduates have gone on to work at Intercontinental Hotels Group, Lazada Group, LOKimedia, Simon-Kucher & Partners and Sky.

**Find out more**
city.ac.uk/cmsi

## Mathematical Trading and Finance
**MSc**

**Duration**
- Full-time: one year

This course offers students who already have good mathematical skills a solid foundation in financial mathematical theory and practice.

The degree combines academic rigour with strong professional application. This enables students to participate fully in the ever-changing derivatives market, where financial innovation and globalisation have created new investment opportunities, risks and instruments.

Students acquire a sound knowledge of mathematical finance, stochastic calculus, derivatives valuation, financial engineering, quantitative risk modelling, numerical methods and econometrics.

**Career opportunities**
This course equips students with all the skills required in front- and middle-office roles. Asset management, risk management and analyst roles are well suited. Some students also take on trading positions.

Recent graduates have gone on to work at Crédit Agricole, Dromeus Capital Management (UK), HSBC, Global Market Solutions and VTB Capital.

## Quantitative Finance
**MSc**

**Duration**
- Full-time: one year

This course is designed to give students a sound understanding of the quantitative aspects of finance used both by practitioners and academics.

It focuses on topics such as econometrics, forecasting and risk modelling and covers the financial instruments and the financial theory from a mathematical and professional point of view. It also provides students with knowledge of computer software and programming languages such as Matlab, as well as an introduction to stochastics.

**Career opportunities**
Students from this MSc are well suited for many roles in the financial industry requiring extensive and in-depth market analysis, or for a career in asset management including hedge funds. Graduates are also equipped to continue their postgraduate studies with a PhD in any area of quantitative finance.

Recent graduates have gone on to work at Deloitte, Fitch Ratings, Green Street Advisors, INTL FCStone and Petroineos Trading Ltd.

Real Estate
MSc

Duration
Full-time: one year

Facilitating entry into a wide variety of career paths, this course is ideal for students who wish to develop a career in the real estate industry but may be unsure of the direction they wish to take.

It is designed to provide a broad background in real estate investment, appraisal and development, with the core modules encompassing a broad range of areas in real estate, including real estate finance, valuation, development, market analysis and economics.

The course is accredited by the Royal Institution of Chartered Surveyors (RICS) and enables graduates to begin the RICS Assessment of Professional Competence (APC) qualification.

Career opportunities
Alumni have gone on to senior roles in a range of real estate and consultancy businesses, and financial institutions.

Recent graduates have gone on to work at BNP Paribas Real Estate, Cushman & Wakefield, Eastdil Secured, Langham Properties, Knight Frank and Savills.

Shipping, Trade and Finance
MSc

Duration
Full-time: one year

This course offers a unique approach to global business. Students are equipped with key skills in the areas of shipping, ship finance, commodity finance, logistics and supply chain management, commodity trade, financial and commodity risk modelling and management.

The course is offered under the auspices of the Costas Grammenos Centre for Shipping, Trade and Finance at Cass, which was established in 1983, introducing a unique, integrated approach to global business.

Recognised internationally for its educational excellence, the Centre demonstrates its commitment to the global business community and to its students by organising conferences, symposia and seminars featuring leading figures in commerce, finance, industry, government and international organisations.

The course is validated by the Institute of Chartered Shipbrokers. Students successful in certain modules on the MSc may apply for exemption from examinations of the Institute.

Career opportunities
Graduates go on to work within the banking, investment and shipping industries and are employed in a range of different roles, including ship broking, chartering and operation and marine insurance. Many also work in financial services.

Recent graduates have gone on to work at Barry Rogliano Salles, Gerald Group, Moore Stephens, Petronas, Trafignura and Zodiac Maritime Ltd.

Charities courses

**Charity Accounting and Financial Management**
PGDip/MSc

**Duration**

Postgraduate Diploma (Exemption route, April intake only)
Part-time: nine months

Postgraduate Diploma
Part-time: one year

MSc conversion
Part-time: six to eight months

This is one of five postgraduate courses offered in the Charities master’s programme, which covers a unique breadth of specialist areas primarily for those working within the sector. This postgraduate qualification aims to equip students with knowledge of specialist charity finance issues, including tax, SORP and distinctive financial management practice.

The two-year, part-time structure allows students the flexibility of choosing the level of qualification.

Attendance is required on a set Friday and Saturday per month, with additional time for action learning and the assessments completed by examination.

On successful completion of the relevant modules students are eligible for the ICAEW Diploma in Charity Accounting (DChA).

**Career opportunities**

Students who apply for the courses in the Charities master’s programme are already working in the sector or in a related role in the commercial sector. Others have gained significant experience as volunteers. Our students undertake this postgraduate degree in order to gain a recognised, sector-specific qualification, formalise their experience or prepare for a more senior role in their organisation.

Full-time MBA
MBA

Duration
Full-time: one year

The Full-time MBA is an intensive 12-month journey transforming the way students approach business, preparing them for organisational leadership and effective decision-making.

Delivered by a leading international faculty, the course provides an immersive real-world learning experience designed to develop business knowledge. The course is a shared journey, where students learn from and collaborate alongside a talented international cohort of business professionals.

Throughout the year students encounter challenges and unique learning experiences through core modules, electives and projects. International electives provide the opportunity to make powerful connections, while putting the theory learnt in the lecture theatre into practice.

Our Full-time MBA is ranked the top one-year MBA in London by the Financial Times in 2018.

Career opportunities
Cass’s employability experts help Cass MBA students to pursue and achieve their individual career goals based on their desired career direction. Graduates of the MBA find career success across many different industries, as well as gaining tools to start their own businesses. MBA graduates have established successful careers within senior roles at Accenture, Capco, Framestore and Google.

city.ac.uk/cftm

Executive MBA
MBA

Duration
Part-time: two years

The Executive MBA is one of the top ranked EMBA courses in Europe. It offers academic excellence and outstanding connections with international businesses.

Delivered by a leading faculty, the Executive MBA is offered over two years with twice-weekly classes during the evening. The structure delivers core business skills with the flexibility to concentrate on electives in a specialised area or pursue a broad set of business interests.

The first year comprises core modules which provide students with the fundamentals of business and management. During the second year, students select elective modules from a range of options and undertake a business mastery project.

Designed for ambitious working professionals, the course focuses on real-world business. From day one, students encounter stimulating challenges and unique learning experiences. What students learn in the lecture theatre can be applied to their work environment almost immediately.

Career opportunities
Our Careers team offers professional training and guidance in employability skills, enabling students to make the most of their Executive MBA. Executive MBA graduates have been placed in senior roles at Coller Capital, Smart Currency Exchange and Sylvania.

Find out more
city.ac.uk/ceem

www.city.ac.uk
The Modular Executive MBA is a flexible course for busy professionals seeking to maximise their leadership potential and accelerate their careers. Taking place over one long weekend each month (Fri–Mon), students undergo a personal transition in the way they approach and think about business while studying alongside a group of talented international peers.

The first year consists of core modules in the different business functions. In the second year, Modular Executive MBA students are able to concentrate on electives in a specialised area or pursue a broad set of business interests.

The added professional development is an important part of the course with coaching and workshop sessions for students. A significant portion of the class travel in from mainland Europe and further afield, lending to the diverse nature of the course.

**Career opportunities**

Modular Executive MBA graduates have gone on to work in senior executive roles at Barclays, GSK, Landsec, SAP Solutions and Tullow Oil.

---

The Cass Executive MBA in Dubai is designed to meet the needs of business executives in the Middle East and surrounding regions.

It is a two-year course delivered in a monthly block weekend format (Thu–Sun) to accommodate busy working professionals from the region. As such, it has the advantage of allowing students to work and study at the same time, enabling them to add to their qualifications without stepping back from the business world. The Cass Executive MBA in Dubai offers the choice of building a general management MBA with several elective modules.

Our world-leading EMBA course is ideal for anyone wishing to develop a career in the Middle Eastern and North African region.

**Career opportunities**

Throughout students’ time in Dubai as an Executive MBA student, they will have access to several professional development and Careers Service workshops and continued support from the Cass Careers team.

Our Careers team offers professional training and guidance in employability skills, enabling students to make the most of their EMBA. Executive MBA in Dubai graduates have forged successful careers at Dell, EY, Daman Investments and Lloyds Banking Group.

Executive PhD
PhD

Duration
Part-time: four years

The Cass Executive PhD focuses on research that makes an impact on professional practice and broader business and society issues.

This course combines expertise in a range of business topics, including management, finance, accounting and actuarial science.

Candidates explore a wide range of subjects, including the latest scientific insights, theoretical frameworks and professional applications, all set in an international context.

The course comprises ten 40-hour residential weeks, held in London at Cass, with additional private study. It includes a thesis presentation in year four.

Career opportunities
The Executive PhD supports the career development of high-profile, research-orientated business professionals who use research to enhance the understanding of the organisations and processes they manage.

The course is for individuals who are at a critical point in their career, by helping them to change course or secure more senior positions.

Find out more
city.ac.uk/cerd

PhD
MPhil/PhD

Duration
Full-time: four years

The Cass PhD is designed for students who want to conduct their research in a world-class business school and an intellectually stimulating environment.

In year one, students attend a PhD-level education programme assessed by coursework, examinations and a thesis.

On completion of the first year of education and successful pass of their transfer panel at the end of the second year, students are registered for a PhD.

During years three and four, students deepen their research, finish research articles and present them at workshops and conferences. Studies conclude with submission of the thesis and attendance at a viva voce examination.

Career opportunities
A common route into academic research is a postdoctoral research post or fellowship after completing the doctorate. While some PhD recipients go on to permanent academic positions, others pursue a career in industry research.

city.ac.uk/crds
The School of Health Sciences is a leading provider of postgraduate education in healthcare and health and social care policy and practice. Postgraduate students learn with academic staff who are clinical practitioners and engaged in interdisciplinary research across the fields of nursing, midwifery, health policy, psychology, management and research, optometry, public health, radiography and language and communication science. Their work is transforming the provision of healthcare services in the UK and internationally.

School of Health Sciences

The School of Health Sciences provides a range of MSc degrees in Advanced Practice in Health and Social Care, allowing healthcare professionals to develop their research skills, evidence-based practice and leadership alongside practitioners from various professional backgrounds within the healthcare sector. We offer master’s courses providing an opportunity for graduates and practitioners to develop their skills and advance their careers within their area of expertise. We also offer research degrees at master’s and PhD level, enabling graduates to have a direct impact on healthcare policy, services and practice.

Graduate entry courses include pre-registration MSc degrees for students who have previously gained an undergraduate degree, while the Midwifery, Primary Care (Practice Nursing) and Public Health (School Nursing, Health Visiting and District Nursing) courses allow registered nurses to gain a second registration.

Scholarships for both home and international students are available for our master’s courses, including the Dean’s Scholarship for Academic Excellence and the SHS International Excellence Scholarship. More details can be found on our website: www.city.ac.uk/health

The School delivers world-leading research in healthcare that impacts policy, service delivery, practice and education in the UK and overseas. In the 2014 Research Excellence Framework (REF) 82 per cent of its submitted research activity, 100 per cent of its research environment and 100 per cent of its research impact case studies were rated as either ‘world-leading’ (4*) or ‘internationally excellent’ (3*).

Research is often multidisciplinary and involves partnerships with service users, NHS Trusts, local authorities, government bodies, non-governmental and third-sector organisations. Examples of the School’s research include nursing and midwifery investigations into reform in maternity and women’s health and service user involvement in mental healthcare. In health services research, academic staff are engaged in implementation research, studies looking at complex interventions, technology-enabled healthcare, care of the elderly and long-term conditions such as dementia. Research within the area of optometry and visual science includes the early detection of glaucoma and age-related macular degeneration, occupational vision assessment and ophthalmic public health, as well as more fundamental studies in visual psychophysics, neurobiology and visual optics. Within language and communication sciences staff have conducted groundbreaking research into new forms of therapy for people with aphasia, innovative collaborative work in education with adolescents with language and communication difficulties and have developed language and communication skills among deaf and hearing-impaired children.

We are ranked first in London for Nursing and Medical Technology (including Radiography) by the Complete University Guide 2019.

Graduate entry courses

**Adult Nursing (Pre-Registration)**
* MSc

**Duration**
Full-time: two years

This course is designed to enable students to lead, manage and support evidence-based care for people of all ages with predominantly physical health needs or disabilities using appropriate assessment, diagnostic and decision-making skills. Their focus is on managing the care of adults with particular attention to the needs of an ageing population. Students will learn to practice autonomously and demonstrate professional integrity by working within recognised professional, ethical and legal frameworks.

**Career opportunities**
Graduates have excellent career prospects and frequently secure employment in hospital and community settings including: Barts Health NHS Trust, Homerton University Hospital NHS Foundation Trust, University College London Hospitals NHS Foundation Trust and the North Middlesex University NHS Trust. Nursing is a lifelong career where students can develop their skills and interests within a range of specialisms.

*At the time of printing (August 2018) this course was subject to University and Nursing and Midwifery Council approval after significant changes in national educational standards. Please visit our website to ensure it is available for 2019/20.*

Find out more
city.ac.uk/hanu

**Adult and Mental Health Nursing (Pre-Registration)**
* MSc

**Duration**
Full-time: three years

Mental illness has a huge impact on physical health of an individual. People with a mental health condition are at a higher risk of experiencing physical health problems, such as diabetes and heart conditions. In addition, people with long-term physical health conditions are more likely to suffer from mental health issues, particularly depression.

This is a combined course, where on successful completion students are eligible to register with the Nursing and Midwifery Council (NMC) as a registered nurse in the mental health and adult field of nursing. Students graduate with the skills and knowledge needed to equip them to support the delivery of quality healthcare in a contemporary health service.

**Career opportunities**
This course accelerates student career progression and opens up a range of fascinating career opportunities across both adult and mental health fields of practice.

It ideally positions students to pursue an accelerated career pathway and to become a future leader, clinical expert or researcher within the nursing profession.

Students will also be given opportunities to prepare for interviews and develop Personal Development Plans during the course.

*At the time of printing (August 2018) this course was subject to University and Nursing and Midwifery Council approval after significant changes in national educational standards. Please visit our website to ensure it is available for 2019/20.*

Find out more
city.ac.uk/hamn

**Children’s Nursing (Pre-Registration)**
* MSc

**Duration**
Full-time: two years

Children’s nurses must be flexible and resilient with excellent communication skills as they care for children and young people with acute or long-term health problems, mental ill-health, special needs or terminal illness. This care extends to supporting families and the wider community to promote health and wellbeing.

Students combine theoretical study (50%) with clinical experience (50%), working with diverse populations in hospitals and community settings.

Students learn through lectures, facilitated group work, simulated practice, inter-professional learning and enquiry-based learning opportunities. Practice is assessed through partnership working between the student, the student supervisor, the practice and academic assessors.

**Career opportunities**
Graduates have excellent career prospects in NHS and independent sector hospitals and community settings. These include Barts Health and North Middlesex University Hospital NHS Trusts, Homerton University Hospital and Great Ormond Street Hospital for Children NHS Foundation Trusts. Children’s nursing is a lifelong career; qualified children’s nurses can develop their skills and interests in a range of specialisms.

*At the time of printing (August 2018) this course was subject to University and Nursing and Midwifery Council approval after significant changes in national educational standards. Please visit our website to ensure it is available for 2019/20.*

### Mental Health Nursing (Pre-Registration)*
**MSc**

**Duration**
Full-time: two years

The course is tailored to enable students to develop appropriate assessment and decision-making skills to meet the physical and mental health needs of those diagnosed with mental health issues. There is a clear focus on promoting social inclusion, human rights and recovery, while developing competence in a range of psychological and psychosocial interventions.

Students learn skills to work in partnership with service users, their carers and families to support and promote health and wellbeing. Students gain appropriate communication and self-awareness skills to develop therapeutic relationships and to promote person-centred care.

**Career opportunities**
Graduates have excellent career prospects and frequently secure employment in NHS and independent sector hospitals and community settings including the East London NHS Foundation Trust with its diverse areas of City and Hackney, Newham and Tower Hamlets. Nursing is a lifelong career where students can develop their skills and interests within a range of specialisms.

*At the time of printing (August 2018) this course was subject to University and Nursing and Midwifery Council approval after significant changes in national educational standards. Please visit our website to ensure it is available for 2019/20.*

### Midwifery
**RM/PGDip**

**Duration**
Full-time: 90 weeks

The Postgraduate Diploma in Midwifery offers a fast-track route to a rewarding and challenging career as a midwife. The course prepares qualified adult nurses who have at least six months’ practice experience to become qualified midwives.

Our staff are at the forefront of the latest healthcare developments through their academic, clinical and research activity. Students prepare for the clinical environment in City’s state-of-the-art simulated ward, while clinical placements take place in some of the busiest and most diverse maternity units in the country.

Students are allocated to a clinical area, where they take on a small caseload of women and are supported by qualified mentors. Clinical placements are based in all areas of maternity services, including community clinics, birthing centres, antenatal clinics, delivery suites, antenatal/postnatal wards and women’s homes.

**Career opportunities**
Midwives enjoy excellent career opportunities within the NHS and private organisations both in the UK and overseas.

Graduates can work within the NHS in the community, birth centres or hospitals, or independently.

Students can upgrade the Postgraduate Diploma to an MSc following their final year.

Find out more  
city.ac.uk/hmid

---

### Primary Care (Practice Nursing)
**MSc**

**Duration**
Full-time: two years  
Part-time: three years

Primary care is experiencing an unprecedented cycle of change. Developments in structure, administration and roles all have implications for practitioners employed within this sector. Health policies have led to the need for increasing numbers of general practice nurses (GPN) to meet the service needs of clients. It is the diversity of services now available within primary care that has led to increasing educational and training needs for the GPN.

By undertaking this course, students develop a systematic, inquiring and in-depth knowledge of their discipline. They are able to develop competence and expertise for their practice, drawing on research and contemporary sources of evidence to underpin their clinical engagement as a GPN.

**Career opportunities**
Completion of the MSc will enable those GPNs to develop higher-order critical skills, which will enhance their clinical practice, underpinned by a strong evidence base. Upon completion of the course GPNs may choose to specialise in specific clinical areas, especially the care and management of long-term conditions.

Find out more  
city.ac.uk/pcpn
Primary Care (Practice Nursing)
PGDip

Duration
Full-time: one year
Part-time: two years

The Postgraduate Diploma Primary Care (Practice Nursing) has been developed for registered nurses who are currently on the Nursing and Midwifery Council register, are currently employed as practice nurses and who have a degree at either a first or 2:1. This course equips students with contemporary theoretical and evidence-based skills and knowledge to enhance and develop their professional practice within the general practice setting.

A unique feature of this course is the option for students to exit with a Postgraduate Certificate (PGCert) Primary Care (Practice Nursing).

Students can also undertake a dissertation module to obtain their MSc Primary Care (Practice Nursing), after completion of the PGDip Primary Care (Practice Nursing) course.

Career opportunities
Completion of this course enables practice nurses to begin to develop higher-order critical and enhanced clinical skills, which will enhance their clinical practice, underpinned by a strong contemporary evidence base. Furthermore, this will enable those practice nurses who have completed the PGDip to negotiate a higher salary in their current post by extending their leadership and clinical skills.

Find out more
city.ac.uk/hpcp

Public Health (School Nursing, Health Visiting and District Nursing)
PGDip/MSc

Duration
Full-time: one year
Part-time: two years

The course enables registered nurses and midwives to enhance their knowledge and broaden their skills to improve health within communities.

School and district nurses and health visitors all need the skills and knowledge to effectively lead, manage, plan and evaluate care. They lead a team and develop effective, enduring relationships with groups, communities and individuals, work in partnership with many agencies and deal with conflicting priorities and complex situations.

The course meets these requirements through practice- and campus-based learning. Students undertake a public health trajectory which considers health attainment, promotion and illness prevention in the context of local, national and international public health and primary care policy and practice.

Career opportunities
Completion of School Nursing and Health Visiting routes make graduates eligible to apply for second registration on the Specialist Community Public Health Nurse part of the Nursing and Midwifery Council (NMC) register. Completion of the District Nursing route makes graduates eligible to apply for a record of a Specialist Practice (District Nursing) qualification with the NMC. Successful students work for various healthcare providers; many later move into education, management and research.

Speech and Language Therapy
MSc

Duration
Full-time: two years

This intensive course is suited to students who are committed to a career in speech and language therapy and who have already completed an undergraduate degree. Students learn a range of subjects that inform their understanding of typical speech, language, communication and swallowing and of pathologies in these areas. Students integrate theoretical and real-world knowledge in considering approaches to the assessment and management of clients with communication and swallowing problems and in taking a holistic approach to clients’ needs. Clinical placements within a range of settings constitute an integral part of the course.

The MSc in Speech and Language Therapy is accredited by the Royal College of Speech and Language Therapists (RCSLT) and the Health and Care Professions Council (HCPC), which is the UK-wide regulatory body for healthcare professions.

Career opportunities
On successfully completing the MSc in Speech and Language Therapy graduates are eligible to register with the Health and Care Professions Council and practise their profession within the NHS or in a range of other settings, including schools, hospitals, community clinics and charities. Increasingly many graduates also work in the private sector as independent speech and language therapists.

Health Management, Policy, Psychology, Research and Public Health

Clinical Research
MRes

Duration
Full-time: one year
Part-time: two years

Knowledge and critical understanding of clinical research methods is becoming increasingly important for all professionals in the health and social care sector, where an evidence-based approach, supported by academic rigour, is crucial to decision-making, clinical practice and guidance.

The course provides students with education in quantitative and qualitative research methods and applied data analysis from basic to advanced levels.

It aims to enable students to independently design, develop and conduct research relevant to clinical practice, appraise current research, apply findings to the delivery of health services in clinical practice and develop a collaborative, interdisciplinary and ethical approach to research and practice.

The course is suitable for healthcare professionals from primary care or allied health disciplines working in clinical research and students aspiring to work in this field.

Career opportunities
The course gives students the research and academic education to become a clinical academic researcher across all health and social care settings. Graduates gain vital transferable skills which are applicable to all health- and medical-related careers.

Health Management
MSc

Duration
Full-time: one year
Part-time: two years

The MSc in Health Management has a three-decade track record developing leaders in management and consulting roles, in healthcare and pharmaceutical companies.

Learning emphasises enterprise, innovation, consultancy and builds on the opportunities London offers as a leading global health centre. The approach is international in outlook. Academics include leaders from health industries and scientific communities who share their experiences of change and innovation and insights on future trends.

Collaborative projects put into practice organisational leadership and influencing skills to create value in a range of health sectors. These include a management consultancy project with business clients.

The course develops inspirational leaders who can ensure decisions are translated quickly into action and achieve the exceptional from the everyday.

Career opportunities
With health and healthcare recognised as such high priorities around the world, health policy specialists continue to be in high demand.

Graduates have gone on to a range of policy, campaigning/advocacy and research roles within the public sector (such as the NHS), NGOs and third-sector organisations and the private sector.

Health Policy
MSc

Duration
Full-time: one year
Part-time: two years

Health and healthcare have risen to the top of political agendas around the world. People are living longer and expecting more from their health services. Medical technology is advancing rapidly, creating ever-increasing demand for the latest treatments. Health policy affects (and is affected by) all of these factors.

This course gives students the knowledge and tools they need to understand and influence the health policy process and to operate within an increasingly complex policy environment. They analyse the social, political and economic factors that affect policy, how policy is made and who the key players are.

The course combines an international focus and academic rigour with the development of skills which can be applied in a wide range of health policy, planning and management settings.

Career opportunities
With health and healthcare recognised as such high priorities around the world, health policy specialists continue to be in high demand.

Graduates have gone on to a range of policy, campaigning/advocacy and research roles within the public sector (such as the NHS), NGOs and third-sector organisations and the private sector.

Health Psychology/ Psychology and Health
MSc

Duration
Full-time: one year
Part-time: two years

The MSc in Health Psychology is a British Psychological Society-accredited course and the first stage in becoming a qualified health psychologist.

Health psychology is the study of psychological and behavioural processes in health, illness and healthcare. It is concerned with understanding how psychological, behavioural and cultural factors contribute to physical health and illness. Chartered health psychologists use their knowledge of theory and practice to promote wellbeing and understand physical illness, while promoting healthier lifestyles.

The MSc Health Psychology course aims to provide students with in-depth knowledge and understanding of health psychology, informed by current scholarship and research, including a critical awareness of current issues and developments in the field.

Career opportunities
This MSc constitutes the first stage in becoming an academic or practitioner health psychologist. Upon successful completion of the course, graduates are eligible to apply for stage two training in health psychology.

Graduates have gone on to complete PhDs in Health Psychology and take positions as academic research assistants, assistant psychologists in an applied setting, smoking cessation officers, public health and health promotion practitioners in the NHS and third-sector organisations.

Health Services Research
MSc

Duration
Full-time: one year
Part-time: two years

The MSc in Health Services Research offers advanced research education to enable graduates to conduct and evaluate research to understand and improve service delivery, quality of care and patient outcomes.

Health services research explores the multifactorial causes of healthcare outcomes to develop and evaluate complex interventions to improve these outcomes. The course addresses questions such as: Why are there still quality gaps in care? How can we speed up the translation of evidence into healthcare practice? How can we apply evidence to improve patients’ self-management of long-term conditions?

The MSc in Health Services Research equips students with the research knowledge, skills and experience to consume and generate primary and secondary research which addresses these questions.

Career opportunities
The course gives students a thorough grounding in professionally orientated research and statistical skills enabling them to work in management, service provision and practice roles. Students can go on to develop their careers across a range of health service settings, including the NHS, charities, industry, government, private practice and academic and research environments.

Master in Public Health
MPH

Duration
Full-time: one year
Part-time: two years

The Master in Public Health (MPH) provides cutting-edge knowledge of evidence-based practice and research methods for leading public health initiatives.

This unique course combines study in public health research methods, applied epidemiology and the identification and assessment of the challenges in public health from a global perspective. It also provides students with an understanding of the processes through which the social environment influences health.

The course provides a thorough professional and theoretical grounding in public health sciences, enabling students to further the protection and improvement of population health at the local, national and international level.

Students gain the skills and confidence to independently lead public health projects and investigations in public or private sector settings.

Career opportunities
The MPH is the most widely recognised professional qualification for leadership in public health. Our graduates work globally in both private and public sectors including the NHS, international agencies, charities, government and academic environments.

Students gain vital transferable skills which are applicable to all health-related careers where attention to detail, conducting research and evaluation for evidence-based practice and report writing are an advantage.

## Interprofessional courses

### Advanced Clinical Practice*  
**PGDip/MSc**

**Duration**
- Part-time: two to four years (PGDip), three to five years (MSc)

This course aims to develop experienced healthcare professionals working in primary, secondary and tertiary healthcare settings who are training to become an Advanced Clinical Practitioner. It prepares students to work at an advanced level of practice with practitioners from a range of professional backgrounds.

Students will gain the knowledge, skills, competencies and professional behaviours to meet the requirements of the HEE Multi-Professional Framework for Advanced Clinical Practice (2017) and will provide students with a sound evidence base for leadership and management, education, research and clinical practice.

Students will develop the skills to safely assess, diagnose and treat or refer patients presenting with complex problems within their scope of practice. This will include the prescription or administration of medication. For nurses, the course is accredited by the Royal College of Nursing.

**Career opportunities**
Graduates will be eligible for a non-medical advanced clinical practitioner role within their specialist field such as midwifery, mental health, critical care and primary care. Graduates of Advanced Practice programmes have gone on to a range of senior clinical and managerial positions.

*At the time of printing (August 2018) this course was subject to approval. Please visit our website to ensure it is available for 2019/20.*

### Advanced Practice Health and Social Care  
**MSc**

**Duration**
- Full-time: one year taught course plus up to one year for the dissertation  
- Part-time: two years taught course plus up to one year for the dissertation

This course is flexible and professionally orientated for all health and social care professionals. It seeks to prepare a research-focused workforce that will help revolutionise health and social care to meet society’s changing health needs by using new technologies and more innovative and creative working practices.

The course prepares students for new, efficient and ethical ways of working that will offer better quality management by placing service users and carers at the centre of the service. Compulsory modules are kept to a minimum, enabling students to tailor the course to meet their professional goals.

The course offers education in the latest theoretical developments and enhances research and critical thinking skills. It provides the opportunity to conduct research under expert supervision, laying the foundations for independent practice and research in the future.

**Career opportunities**
Graduates gain an understanding and knowledge of mental health and the ability to work effectively and collaboratively across professional agencies. Graduates have gone on to secure roles in mental health, social care, the voluntary sector and health policy and management. Graduates can also apply for research posts and undertake research.

### Adult Mental Health (Advanced Practice Health and Social Care)  
**MSc**

**Duration**
- Full-time: one year taught course plus up to one year for the dissertation  
- Part-time: two years taught course plus up to one year for the dissertation

This course provides skills, knowledge and awareness in the assessment and formulation of mental health problems, evidence-based psychosocial interventions and of contemporary issues in mental health. Two optional modules offer an opportunity for students to meet their individual professional goals.

The course is for all healthcare professionals working in mental health services, including nurses, social workers, psychologists and practitioners from a range of allied statutory and voluntary agencies.

It enables practitioners to work effectively with colleagues from a range of professional backgrounds and to critically explore the dynamics and challenges of working in this context, considering innovative ways of meeting the mental health needs of individuals and communities.

**Career opportunities**
Graduates gain an understanding and knowledge of mental health and the ability to work effectively and collaboratively across professional agencies. Graduates have gone on to secure roles in mental health, social care, the voluntary sector and health policy and management. Graduates can also apply for research posts and undertake research.

School of Health Sciences
Child and Adolescent Mental Health (Advanced Practice Health and Social Care) MSc

Duration
Full-time: one year taught course plus up to one year for the dissertation
Part-time: two years taught course plus up to one year for the dissertation

This MSc has been developed in consultation with the national charity YoungMinds. It provides skills, knowledge and awareness in early identification and psychological development, managing risk and identifying resilience, therapeutic approaches and the evidence base focused on child and adolescent mental health. Two optional modules offer an opportunity for students to meet their individual professional goals.

The course uses a sound evidence base to prepare students to participate in a specialist workforce with core values including the development of ethical and culturally sensitive practice and the placement of the service user and carer at the centre of decision-making and service re-design. Students enhance their ability to critically evaluate their work or the work of others who care for individuals and families where there are significant concerns and vulnerability.

Career opportunities
Graduates have gone on to influence the mental health of children and young people at a direct and indirect level through the development of services and the application of interprofessional practice and research.

Professional Practice PGCert

Duration
Full-time: one year
Part-time: two years

The course has been designed for professional practitioners who have completed the preceptorship period (or similar) and who have a commitment to the enhancement of personal and professional development in their own area of professional and/or clinical practice. For those working in areas of specialism (neonatal, cardiac, intensive care and midwifery), the course allows for subject-specific modules to be taken as part of this Postgraduate Certificate.

The course enables practitioners, from a wide range of backgrounds, to work together to develop the skills and knowledge required to become competent practitioners and leaders in professional practice and to develop professional skills, knowledge and understanding though work.

Career opportunities
This course enhances skills and knowledge in leadership and professional practice and can lead to posts in administration, management and clinical practice in a variety of different public and private settings. Specialist routes can strengthen both career prospects and employability in the area of specialism.

On successful completion of the PGCert students have the option of progressing on to a relevant PGDip or MSc.

### Midwifery

**Midwifery (Advanced Practice Health and Social Care)**

**MSc**

**Duration**
- Full-time: one year taught course plus up to one year for the dissertation
- Part-time: two years taught course plus up to one year for the dissertation

Students on this course learn about the latest theoretical policy and clinical developments relating to midwifery. They also develop research, applied data analysis and critical thinking skills and have the opportunity to conduct a research project under expert supervision. Graduates are well prepared for leading roles as evidence-based practitioners.

The course is designed for qualified midwives who have at least one year of experience in clinical midwifery practice.

The MSc provides the opportunity to create a challenging and rewarding course of study tailored to students’ personal development needs. Compulsory modules are kept to a minimum, with a wide range of optional modules allowing students to personalise their learning.

**Career opportunities**
This course allows practitioners flexibility in developing specialist skills and knowledge at a highly demanding academic and professional level. The course prepares students for a range of roles, including midwife consultant and jobs in clinical leadership.

### Speech, Language and Communication (Advanced Practice Health and Social Care)

**MSc**

**Duration**
- Full-time: one year taught course plus up to one year for the dissertation
- Part-time: two years taught course plus up to one year for the dissertation

This MSc offers a flexible, professionally orientated course for speech and language therapists and other graduates from related fields.

Students gain specialist knowledge about disorders of communication and swallowing and develop skills in research methods and critical appraisal. Optional modules integrate learning from allied disciplines such as mental health.

All learning draws on the latest research and makes strong connections with clinical practice. Students learn from clinical and research leaders and service users.

Students can study for the full MSc, a Postgraduate Diploma (omitting the dissertation) or a Postgraduate Certificate (four modules).

**Career opportunities**
This course is for qualified speech and language therapists who wish to enhance their careers or progress into research. The MSc qualifies students for posts in the UK and abroad that require a master’s degree and for specialist clinical positions. The course is ideal for other graduates seeking a research career in the field of communication disorders. Alumni have progressed into senior clinical roles, doctoral study and research posts.

### Speech, Language and Communication Needs in Schools: Advanced Practice

**MSc**

**Duration**
- Full-time: one year taught course plus up to one year for the research dissertation
- Part-time: two years taught course plus up to one year for the research dissertation

This MSc is run jointly by City, University of London and University College London Institute of Education. It brings together speech and language therapists, teachers and other graduate school-based practitioners for collaborative study. Taught modules cover educational contexts and children’s language, social, emotional and behavioural development and needs, as well as research methods, preparing students to undertake a research project in their chosen area.

Learning is through lectures, workshops and seminars, led by international researchers and senior clinical/academic professionals. As well as advancing students’ knowledge and skills, this course is a springboard for fresh stimulation and reflection, in a community of fellow students, practitioners and research experts.

**Career opportunities**
This MSc qualification raises a graduate’s profile as a specialist and leader in speech and language and communication needs in the school setting. It is an advantage for teachers and clinicians seeking higher-grade specialist and managerial posts.

Please note this MSc does not lead to professional qualification as a speech and language therapist or teacher.

Nursing

Advanced Ophthalmic Nurse Practitioner (Advanced Practice Health and Social Care) MSc

Duration
Full-time: one year taught course plus up to one year for the dissertation
Part-time: two years taught course plus up to one year for the dissertation

This MSc is a flexible and professionally orientated course for nurses working in ophthalmic health and eye care.

Changes in healthcare needs have led to the use of new technologies and more innovative and creative working practices. This course prepares a specialist research-focused workforce to help revolutionise health and social care provision.

The course gives new, efficient and ethical ways of working that will offer better quality of life and quality of care by placing service users and carers at the centre of decision-making and service redesign. It enables students to respond to the increasing pressures within the current healthcare system.

Learning concentrates on the latest theoretical and clinical developments relating to ophthalmic nursing, as well as developing students’ research skills and critical thinking and provides the opportunity to conduct a research project under expert supervision.

Career opportunities
This course enhances skills in practice, teaching and research and can lead to posts in nurse management, health research, student support and as clinical nurse specialists in a range of different settings (public and private). The flexible nature of the course makes it particularly suitable for nurses with highly specific requirements in professional development. Advice is available on the course options, so that students can maximise the opportunities open to them.

Optometry

Clinical Optometry MSc

Duration
Full-time: one year taught course plus one year for dissertation
Part-time: maximum of five years

Preparing optometrists to provide enhanced clinical care to patients, this MSc emphasises the co-management of patients and the expansion of the optometrist’s role in ocular therapeutics.

The MSc has an international reputation for quality and is at the forefront of professional clinical optometry education. Students acquire skills and knowledge from leading UK experts in a dynamic learning environment.

The course is accredited for the General Optical Council’s Continuing Education and Training (CET) points and includes the College of Optometrists’ Professional Certificates in Glaucoma, Medical Retina, Paediatric Eye Care, Low Vision and the Professional Higher Certificate in Contact Lenses. Prescribing modules are accredited by the General Optical Council with content forming the theory for the College of Optometrists’ Common Final Assessment in Independent Prescribing.

Career opportunities
Optometrists are equipped to provide enhanced clinical care to patients, particularly in the field of ocular therapeutics – they can choose to become an additional supply or an independent prescribing optometrist as part of the MSc training. Students opt to complete the College of Optometrists’ Professional Certificates in Glaucoma, Medical Retina, Paediatric Eye Care, Low Vision and/or the Professional Higher Certificate in Contact Lenses.

Radiography

Medical Ultrasound
PGCert/PGDip/MSc

Duration
Postgraduate Certificate
Part-time: one year
Postgraduate Diploma
Part-time: 18 months to two years
MSc
Part-time: maximum of five years

The MSc in Medical Ultrasound offers flexible study for professionals undertaking obstetrics, gynaecology and abdominal ultrasound training.

Students learn a range of subjects to enable them to explore the underpinning knowledge of safe, effective and evidence-based ultrasound practice, with which to help them develop clinical skills in their own department.

Our expert staff provide a supportive environment for students to develop their academic abilities and advanced practice skills. City’s Clinical Skills Suite is equipped with a real-time ultrasound machine and simulators.

The course is for practitioners working in radiography, nursing, midwifery or other related professions, who want to gain a professional qualification to practise ultrasound. This course is accredited by the Consortium for the Accreditation of Sonographic Education (CASE).

Career opportunities
Graduates can pursue a career in ultrasound working in a range of healthcare settings within the NHS or private practice. Others choose to enhance their skills to help them work towards advanced and consultant-level practice. Recent graduates have developed their careers as superintendent sonographers, managers, clinical application specialists and lecturers.

Radiography (Computed Tomography)
PGCert/PGDip/MSc

Duration
Postgraduate Certificate
Part-time: up to one year
Postgraduate Diploma
Part-time: up to two years
MSc
Part-time: up to three years

The Computed Tomography courses enable students to apply scientific, research, professional and technical knowledge to their role within this cross-sectional modality. The courses allow students to build on the knowledge and clinical experience gained from their professional work by complementing the experiences they already have and allowing them to enhance their professional development and make a greater contribution to the investigatory healthcare process.

The courses cover subjects including clinical applications of computed tomography and the science and instrumentation involved in this form of radiography.

Career opportunities
The postgraduate courses in Computed Tomography will enable students to work towards advancing their practice and support a rationale for more senior roles in the profession, including specialist clinical practice, management and research.

Research degrees

MPhil/PhD

Duration

Full-time: three years
Part-time: six years

The School of Health Sciences provides a supportive and well-resourced environment for individuals wishing to pursue a postgraduate research degree (MPhil/PhD), linked with one of our five Research Centres: Centre for Applied Vision Research; Centre for Health Services Research; Centre for Language and Communication Science Research; Centre for Maternal and Child Health Research; and Centre for Mental Health Research.

There are three routes to an MPhil/PhD degree within the School:

- Traditional MPhil/PhD: students undertake a significant piece of original research and write a thesis based on that research. A majority of students take this route.

- MPhil/PhD by Prospective Publication: students base their submission on a series of peer-reviewed research papers which they publish during the course of their MPhil/PhD and incorporate this into an overarching thesis that reflects the work.

- MPhil/PhD by Prior Publication: students who have published several significant peer-reviewed research papers spend between one and two years writing an extended treatise which draws this research together with analysis of previously published work by others into the context of a single overarching thesis.

The City Law School is one of London’s major law schools and offers an impressive range of academic and professional courses. Located in the heart of legal London, the School was the first in London to educate students and practitioners at all stages of legal education. At the postgraduate level, the School’s high-quality courses for law and non-law graduates are highly regarded by the profession.

The City Law School

Postgraduate students at all levels benefit from the research expertise and practice experience of the School’s academic staff, many of whom are leading experts in their fields. The Graduate Diploma in Law and the Graduate Entry LLB allow graduates who have completed a non-law degree to begin studying for a career in law. The Bar Professional Training Course (BPTC) and Legal Practice Course (LPC), offered at City’s Gray’s Inn campus, have a worldwide reputation for excellence and equip students with the skills and knowledge required for legal practice. Finally, LLM, MPhil and PhD courses allow students to deepen their understanding of particular areas of law while retaining the practice focus that is one of the hallmarks of the School’s approach.

The City Law School Plan, in support of City’s Vision & Strategy 2026, builds upon ongoing success in advancing City’s previous Vision for 2016. Those achievements have given the School the confidence to set ourselves an ambitious goal: to be recognised indisputably as a leading law school of the United Kingdom by 2026. This objective was enhanced further when City joined the University of London federation in 2016. For The City Law School, this brings practical and reputational benefits both now and in the future.

For example, the Distance Learning LLM in International Business Law has allowed us to develop our expertise in new modes of delivery. The LLB in Legal Practice, also delivered largely by distance learning, represents the successful outcome of a strategic partnership with CILEx Law School and is an undergraduate course aimed at those currently in employment as legal executives and as an apprenticeship route to legal qualification (visit [www.city.ac.uk](http://www.city.ac.uk) for more information on this course).

The City Law School is working hard to achieve the aforementioned vision of becoming a truly leading law school within a decade, with help from its extended community of stakeholders.

Graduate courses

Graduate Diploma in Law (GDL)

Duration
Full-time: one year

The GDL comprises the seven core foundation subjects normally covered within a qualifying law degree and which are prerequisites for taking the professional legal courses. City’s GDL course has an unrivalled reputation within the profession for the quality of education, the ability of its students and the preparation it provides for students seeking pupillage or a training contract.

The course, which is for non-law graduates, is delivered by The City Law School’s own academics and by visiting academics from other prestigious universities. In addition to the foundation subjects, students take another academic law subject unique to City: Introduction to legal ethics. This subject directs students’ attention towards the ethical challenges which lawyers might face in practice and to the values which characterise the profession.

Students have the option to convert their GDL to an LLB degree by taking further law modules.

Career opportunities
Successful completion of the GDL qualifies students to progress to one of the two professional courses all UK lawyers are required to take: the LPC for solicitors or the BPTC for barristers. As with the qualifying law degree, the GDL can prepare students for a range of non-legal career paths within the civil service, financial companies and more. Expert advice is available from personal tutors and City’s Careers Service. This service can provide support for applications, organise mock interviews and give advice on job-searching techniques.

Find out more
city.ac.uk/lgdl

Graduate Entry LLB

Duration
Full-time: two years

This is a senior status law degree which allows non-law graduates to achieve an LLB law degree in just two years.

Students have the opportunity to gain skills and knowledge in core legal subjects as well as specialist areas of law.

In year one, candidates study four of the seven core foundation subjects usually covered in an undergraduate law degree. In year two, students take the remaining three core subjects and have the opportunity to enhance their knowledge of particular areas of law by choosing six elective modules.

This degree attracts international students from around the world, Canada in particular. Canadian law-specific electives can be chosen in year two.

There are opportunities for students to develop legal skills in mooting, legal research and legal writing and take part in various pro bono projects.

Career opportunities
Successful completion of this course qualifies students to progress on to the LPC for intending solicitors or the BPTC for intending barristers. As with the qualifying law degree, the GDL can prepare students for a range of non-legal career paths within the civil service, financial companies and more. Expert advice is available from personal tutors and City’s Careers Service. This service can provide support for applications, organise mock interviews and give advice on job-searching techniques.

Professional legal training

Bar Professional Training Course (BPTC)

Duration
Full-time: one year

Our well-established professional course is a rigorous programme designed to reflect the working Bar. This is an internationally renowned and highly skills-focused course delivered in London’s prime legal location, surrounded by the Inns of Court and barristers’ chambers.

The BPTC focuses on advocacy, written and oral advice and case settlement analysis, underpinned by a foundation of legal research as well as knowledge of court procedure, evidence and professional ethics. The skills and knowledge gained on the BPTC can be applied at the Bar and in a range of other professions and careers.

There are two City BPTC routes: the first leads to a Postgraduate Diploma and eligibility for Call to the Bar of England and Wales through successful completion of the BPTC assessments; the second leads to an LLM and eligibility for Call to the Bar of England and Wales by successful completion of the BPTC assessments and a dissertation.

Career opportunities
On successful completion of the course students will receive the Postgraduate Diploma in Professional Legal Skills, which is required in order to be called to the Bar and take the first steps into practice as a barrister.

Students are offered guidance and support if applying for pupillage via our Pupillage Advisory Service. This service is available (during term time) as soon as a place on the City BPTC is accepted.

Master’s courses

Legal Practice Course (LPC)
LLM/PGDip/PGCert (Stage One only)

Duration
Full-time: one year

The LPC is designed to ensure students are fully prepared to meet the demands of the modern legal profession. There are two City LPC routes. If students successfully complete the compulsory taught element of the course they will be awarded the Postgraduate Diploma and be certified as having completed Stages One and Two of the Legal Practice Course. This is the compulsory vocational qualification required as part of students’ training to become a solicitor and to be eligible to be admitted to the Roll of Solicitors of England and Wales. Alternatively, students may choose to complete both the LPC and an additional practice-focused dissertation in order to achieve a master’s degree.

Delivered by experienced legal practitioners, City’s LPC comprises two stages: Stage One provides students with essential skills and knowledge; Stage Two allows students to enhance their knowledge in three specialist areas.

Students can participate in a wide variety of pro bono schemes and be part of the LPC Mentor Programme.

Career opportunities
Students progress to a wide variety of firms both in London and beyond. They are assisted by the Training Contract Advisory Service who help with CV, covering letters and interviews.

There are opportunities for students to enhance their CV through pro bono schemes and external competitions.

city.ac.uk/lpc

International Business Law (Distance Learning)
LLM

Duration
Part-time: two years
This course is distance learning

This flexible, part-time LLM is designed to provide students with specialist knowledge and will help to broaden existing knowledge of the legal rules which impact on international business. Students acquire legal and research skills to help enhance career prospects as international business professionals or legal practitioners.

As the course is delivered online, students have freedom to study in their own working environment and at their individual pace. Technology-enhanced learning environments support the student experience alongside City’s extensive range of legal databases, including e-journals and e-books.

Students receive access to study materials and are encouraged to explore and identify areas for research and reflection, with the course typically being completed over six consecutive terms (two calendar years). An accelerated route is also available, with students studying the course over four terms.

Career opportunities
By the end of the course, students will have gained specialist knowledge in key areas of law from an international business perspective and acquired transferable skills essential to develop a career in international business or law.

Students who complete the LLM may wish to continue their advanced legal studies on the PhD or MPhil courses offered by The City Law School.

Find out more
city.ac.uk/libl

Legal Practice LLM

Duration
Full-time: six months
Part-time: 12 to 18 months

Students who studied the Legal Practice Course (LPC) prior to 2018 at City can convert their LPC into an LLM in Legal Practice. City’s LPC is delivered at master’s level rather than degree level, allowing students to gain an LLM by completing an additional dissertation after their LPC.

This LLM satisfies all the requirements of a traditional LLM, with a focus on professional practice. The course gives students the opportunity to strengthen their knowledge and understanding of a specific area of professional legal practice.

Students make a written proposal for their dissertation and undertake research in an area of choice related to legal practice, procedure or skills.

Please note that the LLM in Legal Practice is also included in the LPC course fee and the dissertation must be undertaken after students have completed the LPC. This LLM is only available for those who studied their LPC at City prior to 2017/18. It must be completed within five years of completing the course.

Career opportunities
This course has been developed to enhance the employability of its graduates. Students who have a training contract can use the dissertation to demonstrate commitment to an area of practice. Students seeking a training contract or pursuing an alternative legal career can use the qualification to strengthen their CV and improve employability prospects.

city.ac.uk/llpl
Maritime Law (Dubai)
LLM

**Duration**
- Full-time: one year
- Part-time: two years

This LLM (Master of Maritime Law) course, now being offered in Dubai, is designed to benefit experienced professionals involved in the shipping sector and those companies that provide services to the shipping industries.

The LLM will give shipping professionals exposure to international maritime and trade law, while legally qualified professionals will benefit from the specialist nature of the course. Non-legal professionals involved in the maritime sector will gain deep insights into the practical workings of maritime and trade law.

The course is delivered in intensive block format by our own UK-based faculty and by scheduled weekend classes. The course welcomes applicants who have a good degree in any related discipline and/or relevant work experience.

**Career opportunities**
A specialist qualification in international maritime law will undoubtedly enhance career prospects. With this LLM you will be equipped to work in and/or enhance your career prospects in a variety of sectors and job roles, including the civil service or government, insurance companies, law firms, maritime regulators, ports and terminals, shipbrokers, shipping companies and more.

---

Maritime Law (Greece)
LLM

**Duration**
- Full-time: one year
- Part-time: two years

This LLM is an academically demanding course and beneficial for anyone working in the shipping industry.

The course gives a detailed understanding of maritime law and issues relating to the shipping market, allowing students to build on existing knowledge and enhance their career prospects.

Delivered in the Lloyd’s Register building in Piraeus, Greece, with access to the Laskaridou Library, the course is taught in English in weekend blocks by British academics, legal practitioners and specialist maritime lecturers from around the world.

**Career opportunities**
The LLM in Maritime Law provides students with a sound basis for developing a career in shipping and maritime law, whether it is with a national or international firm or in-house.

Students who complete the LLM may wish to continue their academic studies by enrolling in a PhD or MPhil offered by The City Law School.

Find out more
city.ac.uk/lmlg

---

Master of Laws
LLM

**Duration**
- Full-time: one year
- Part-time: two years

The Master of Laws (LLM) has a flexible, professional and global focus designed to deepen students’ knowledge and fulfil career aspirations.

The course showcases current legal debates, exposing students to legal practitioners and leading academics. Students gain the skills needed to tackle complex legal problems within chosen subjects, with a unique chance to specialise in cutting-edge legal areas.

The Master of Laws offers extensive choice when it comes to student learning. Students can opt for a general Master of Laws degree by selecting courses from the wide-ranging list of modules, or pursue one of several specialisms such as International Commercial Law, International Banking and Finance Law, International Energy Law and Regulation, Public International Law and more. Students can build their learning around their academic and professional goals.

**Career opportunities**
City LLM graduates are well placed to pursue careers in legal practice as well as business, management, banking and finance, government, NGOs, charities, academia and research. Lawyers in practice support the LLM through a series of talks over the duration of the course. Expert careers advice is available from personal tutors and City’s Careers Service.

LLM graduates can continue their academic studies by enrolling in a PhD or MPhil offered by The City Law School.

city.ac.uk/lmol
Professional Legal Skills

LLM

Duration
Full-time: six months
Part-time: one year

Students undertaking the Bar Professional Training Course (BPTC) can convert their BPTC into an LLM in Professional Legal Skills. City’s BPTC is delivered at master’s level, allowing students to gain an LLM by completing an additional dissertation after the BPTC. Students are asked to put forward a proposal for their dissertation upon application for this LLM.

Please note that the LLM in Professional Legal Skills is only available for those who studied the BPTC prior to 2017/18. It must be completed within five years of completing the BPTC.

This LLM satisfies the requirements of a traditional LLM but has a primary focus on practice. In addition to the taught classes on the BPTC the LLM gives students the chance to focus on an area of professional legal practice of their choice, while strengthening their knowledge and understanding of legal professional practice. This can be linked to pupillage to underline a commitment to a particular area, or can be used more generally.

Career opportunities
This course has been developed specifically to assist students in achieving their career aspirations. Students who have pupillage can use work on their dissertation to show their commitment to a specific area of practice. Students seeking pupillage or going into other areas of legal work can use the dissertation to strengthen their CV.

Research degrees

Research degrees

MPhil/PhD

Duration
Full-time: minimum period of registration is two years; maximum four years
Part-time: minimum period of registration is three years; maximum seven years

PhD students are assigned two supervisors to support them throughout their research. They also benefit from the School’s Research Training Programme which focuses on research skills and methodologies, employability skills, career management and personal development.

PhD students become part of a stimulating research environment by participating in the activities of the School’s Research Centres, institutes and groups.

The award of a PhD requires the submission of a thesis for examination at a viva voce (oral examination) by two examiners, at least one of whom is external to City. A PhD thesis (up to 100,000 words) must be an original and substantial piece of work which makes a contribution to the relevant literature. All students are initially registered for an MPhil degree. Those students who wish to proceed to a PhD must upgrade within 18 months (30 months for part-time students).

city.ac.uk/lrds
The School of Mathematics, Computer Science & Engineering has offered outstanding courses tailored to the needs of the professions for more than 100 years. Postgraduate students are led by academics who are at the forefront of research and enterprise activity in their fields.

School of Mathematics, Computer Science & Engineering

The School comprises six departments. In the Department of Civil Engineering, academics work in the fields of structural and geotechnical engineering and hydrodynamics, in partnership with leading design consultancies and building contractors (for example, Arup, Skanska, WSP, Thornton Tomasetti and Pell Frischmann). The Department of Electrical & Electronic Engineering is renowned for its expertise in developing sensors and instrumentation (particularly in the field of biomedical engineering), its work on managing systems complexity in design and confronting the challenges of cyber security. The Department of Mechanical Engineering & Aeronautics has outstanding facilities for applied research and is particularly strong in the field of experimental and computational fluid dynamics.

The department was the first in the United Kingdom to offer courses in Aeronautical Engineering. In the Department of Mathematics, academic staff undertake fundamental research in pure and applied mathematics in the areas of representation theory, mathematical physics and mathematical biology.

Academics in the Department of Computer Science work across three broad areas. In software and systems engineering, research examines fundamental theories, methods and technologies related to the development, assessment and verification of complex sociotechnical and software-intensive systems. In the field of human-computer interaction, academics focus on the accessibility and usability of interactive systems supporting human-computer activities and the development of novel interfaces and devices for such systems. Finally, research on data-intensive systems explores the development of novel methods and frameworks to support the modelling, search, analysis, consumption and evolution of massive text and rich media, including images and sound. The Department of Library & Information Science builds on City’s long tradition of research in information science. Academics in the department are experts in the history of information sciences, the organisation and communication of information in a digital environment and the information behaviour of individuals and groups within society.

**Aviation Management**

**Air Safety Management**

**MSc**

**Duration**

Part-time: average three, maximum five years

With the MSc in Air Safety Management, an industry-approved global course, students can study in several locations and align, develop or transform their career.

The objective of air safety management is to achieve and maintain an acceptable level of safety within the context of increasing air traffic, wider commercial competition and a greater focus on cost consciousness. Students learn the latest safety management techniques, freshen their current knowledge and build a network of peers.

The course is suited to those with at least two years’ work experience within the aviation industry and who want to study an Executive MBA-style qualification. Current students include pilots, air traffic controllers, maintenance staff and engineers, the majority of whom possess a licence or professional education. Students with a military background are also welcomed.

**Career opportunities**

This professional MSc course is recognised by the aviation industry and approved by the Royal Aeronautical Society. Our alumni network includes high-ranking individuals such as the COO of Oman Air, the CEO of Jet Time, the Air Safety Director of ICAO and the Vice-President of Safety and Quality at Copenhagen Airport.

Graduates may change or transform their careers as a result of the MSc. An RAF air traffic controller immediately moved into a senior training position at Eurocontrol in Brussels after completing the course. A network of over 1,400 alumni provides lifelong support.

**Find out more**

city.ac.uk/easm

---

**Air Transport Management**

**MSc**

**Duration**

Part-time: average three, maximum five years

This MSc is designed for the working aviation employee who wishes to align, develop or transform their career and who aims to move into a position carrying greater managerial responsibility.

Delivered by experts from industry, the objective of the course is to improve the contributions that experienced professionals, including air crew, engineers and air traffic controllers, can make to their organisations. Students learn the latest management techniques, freshen their current knowledge and build a network of peers.

The course is suited to those with at least two years’ work experience within the aviation industry who want to study an Executive MBA-style qualification. Students with a military background are also welcomed.

**Career opportunities**

This professional MSc course is recognised by the aviation industry and approved by the Royal Aeronautical Society. Graduates have taken up roles such as safety manager, training captain, quality manager, flight safety officer, safety inspector, safety consultant and accident investigator in civil aviation authorities, airlines and other aircraft operators and defence forces worldwide.

Graduates will be prepared for positions of responsibility within airlines, aviation authorities and defence forces. Graduate destinations include chief engineer, head of safety, senior investigator and other senior management positions.

**Find out more**

---

**Aircraft Maintenance Management**

**MSc**

**Duration**

Part-time: average three, maximum five years

With the MSc in Airline Maintenance Management, a Royal Aeronautical Society-approved course, students can study in several locations to align, develop or transform their career.

This MSc allows experienced aviation industry personnel to improve their knowledge of the complex disciplines required to enable full understanding of the technical, operational and financial pressures impacting aircraft maintenance and flight operations.

The demand for airline maintenance management knowledge is growing. This course gives students the opportunity to freshen their current knowledge, learn the latest airline maintenance management techniques and build a network of peers.

The course is suited to those with at least two years’ work experience within the aviation industry who want to study an Executive MBA-style qualification. Students with a military background are also welcomed.

**Career opportunities**

The airline industry requires half a million new aircraft engineers in the next 20 years. As such, the industry is in need of maintenance managers and leaders.

Graduates will be prepared for positions of responsibility within airlines, aviation authorities and defence forces. Graduate destinations include chief engineer, head of safety, senior investigator and other senior management positions.

**Find out more**

city.ac.uk/eamm
**Civil Engineering**

**Civil Engineering Structures**

**MSc**

**Duration**
Full-time: one year
Part-time: either two or three years

This is an established and accredited technical MSc for those who wish to expand their specialist knowledge and skills in structural analysis and design. It offers a mixture of theory and practice to enhance the employment prospects of both recent graduates and mid-career engineers.

The course focuses on advanced analytical techniques, use of current design standards and development of creative and specialist solutions. It also provides scope for use of state-of-the-art technology, as excellent experimental facilities and extensive software are available.

The Department of Civil Engineering boasts structural engineering academic staff with diverse research interests and opportunities for professional engagement. Professional institutions and well-known consulting engineers are also located in the vicinity. Industry experts regularly provide insight into structural engineering practice and research.

**Career opportunities**
Graduates have been successful in securing employment with leading construction consultants, such as Ramboll, AECOM, AKT II, Grimshaw Architects, Costain and Skanska. Many have found employment with research institutes and government agencies or pursued doctoral studies in the UK and internationally. Graduates are working in the UK, the USA, China, Iran, Turkey, the Middle East and other countries.

city.ac.uk/eces

---

**Civil Engineering Structures (Nuclear Power Plants)**

**MSc**

**Duration**
Full-time: one year
Part-time: two years

The UK has committed to a long-term nuclear new-build programme that is forecast to generate more than 40,000 jobs, yet there is little specialised education in this area. The MSc in Civil Engineering Structures (Nuclear Power Plants) is designed to respond to the skills shortage reported by employers currently working in the area. This master's course enables students to study how to design, evaluate and analyse structural systems, with a special focus on nuclear power plants. Students learn all the principles used for the design of buildings, bridges, special structures and, in particular, nuclear containment structures.

This course is offered on either a one-year full-time or two-year part-time basis to allow students maximum flexibility. It is supported by the Royal Academy of Engineering.

**Career opportunities**
On successful completion of this course, students will be equipped to enhance their careers as on-site or design engineers. They may also be involved in building, designing or constructing new plants, evaluating and maintaining existing plants or decommissioning plants at the end of their life cycle.

**Find out more**
city.ac.uk/enpp

---

**Airport Management**

**MSc**

**Duration**
Part-time: average three, maximum five years

This MSc has been established following increasing demand from industry and professional bodies. It is designed for the working airport employee who wishes to align, develop or transform their career and who aims to move into a position carrying greater managerial responsibility.

Delivered by experts from industry, the objective of the course is to improve the contributions that experienced professionals (including airport engineers, airport ground staff managers, airport environmental, logistics and IT staff and airport business staff) can make to their organisations. Students learn the latest management techniques, freshen their current knowledge and build a network of peers.

The course is suited to those with at least two years’ work experience within the airport industry who want to study an Executive MBA-style qualification. Students with a military background are also welcomed.

**Career opportunities**
This is a new professional course recognised by the airport industry, supported by Airports Council International and due to be approved by the Royal Aeronautical Society. Our alumni network of all MSc Aviation courses includes high-ranking individuals such as the COO of Oman Air, the CEO of Jet Time and the Vice-President of Safety and Quality at Copenhagen Airport.

Construction Management
MSc

**Duration**
Full-time: one year
(two days learning per week)
Part-time: two years
(one day learning per week)

The Construction Management MSc degree is aimed at technically competent construction professionals who want to move into managerial roles within the construction sector or develop their own businesses.

The course prepares students for a management career in major construction projects. It combines both business and construction modules to provide a construction-focused balance in business education. Course modules are delivered by academic experts as well as highly experienced practising professionals, which ensures content is directly applicable to future jobs.

This MSc is accredited by the Joint Board of Moderators as part of the personal development needed to achieve professional chartered status within the major engineering institutions.

**Career opportunities**
This degree leads to management roles within all parts of construction delivery, from project supervision and engineering roles through to consultancy in multinational companies.

Graduates use this degree to add a business competence perspective to their professional expertise.

Find out more
city.ac.uk/ecma

Temporary Works and Construction Method Engineering
MSc

**Duration**
Full-time: one year
Part-time: two years

This MSc is a specialist qualification for those involved in the design and construction of temporary works. Aimed at graduates with at least two years of professional experience in construction, it also suits recent graduates with a good appreciation of construction processes.

The course allows those who have a solid understanding of engineering principles to understand the particular and unusual challenges posed by temporary works, enabling them to produce robust design solutions for safe and economic construction.

The course, delivered by both academic and industry experts, addresses the regulatory background to temporary works, the design of geotechnical, structural and marine temporary works, demolition, plant and access works. Students gain the skills to undertake safe but cost-effective designs and an understanding of the range of plant and techniques that can be employed.

The Temporary Works Forum (TWf) has designated City as a Centre of Excellence in Temporary Works and Construction Method Engineering and has collaborated in the development and delivery of this new degree.

**Career opportunities**
A qualification in temporary works has widespread application across all civil engineering disciplines. Students can also enter the research arena, contributing to innovation in temporary works.

city.ac.uk/etwc

Computer Science

Artificial Intelligence
MSc

**Duration**
Full-time: 12 months
(15 months with internship)

This professionally orientated MSc trains students in cutting-edge, nature-inspired artificial intelligence, skills sought after by industry, government and academia.

Students study and apply advanced methods and techniques in artificial intelligence. The particular emphasis is on dynamic, responsive ‘deep learning’, based on neural networks and its applications, from health to finance, as well as computational modelling of learning and behaviour in neuroscience. Students explore explainable artificial intelligence and how to address issues of ethics, legality and accountability.

Learning is hands-on in our new, world-class AI Lab. It provides the latest computers, tools and technologies and the computational power needed for deep learning.

The course is led by recognised experts in applying artificial intelligence and machine learning to real-life problems.

**Career opportunities**
Students are in demand for roles with artificial intelligence institutions, government and industries ranging from health and energy to finance and gaming.

City’s Professional Liaison Unit helps students to find internships for their final project with organisations in nearby Tech City UK and London’s Knowledge Quarter.

The course also prepares students for entry into doctoral research.

city.ac.uk/arin
Business Systems Analysis and Design
MSc

Duration
Full-time: 12 months
(15 months with internship)
Part-time: 28 months

This MSc equips students with specialist knowledge of subjects such as business systems requirements analysis and design, data modelling, business intelligence and business engineering with Enterprise Resource Planning (ERP).

This course is designed to produce hybrid IT/business professionals who understand the role IT systems play in supporting organisations, to ensure that such systems can help businesses achieve their objectives. Making key decisions on what the right system is to meet these organisational objectives is the focus of the course.

The course is accredited by BCS, The Chartered Institute for IT, for the purposes of partially meeting the academic requirement for registration as a Chartered IT Professional.

Career opportunities
Graduates are prepared for employment in roles including business analyst, systems analyst and IT consultant.

Recent graduates are employed in consultancy companies and major software users such as banks, public services, telecommunications, multinational manufacturers and large retailers. Graduates have also secured employment in some of the most prestigious companies in the world, including Accenture, PwC, Barclays, Credit Suisse and IBM.

Computer Games Technology
MSc

Duration
Full-time: 12 months
(15 months with internship)
Part-time: 28 months

This MSc is designed for graduates of computing-related degrees who want to further specialise their undergraduate education and develop their careers in the games industry. It is also for those who wish to update their skills after time spent in industry as a computing professional and for those with equivalent experience.

Students develop strong technical skills and specialist knowledge in computer graphics, AI, physics and audio, in addition to developing the ability to design and build game engines from scratch in industry standard languages, including C++.

Students develop knowledge of the games development process, including the pitch, design and prototyping to build a demo. Through an individual project, students experience the planning, management and execution of a major games technology project.

Career opportunities
Graduates are equipped with advanced knowledge and skills in a range of topics in preparation for a career in computer games development.

Professional roles include programmer positions in 3D graphics, audio, physics, artificial intelligence, game engines, tools and networking.

Destinations of recent graduates include Sony Interactive Entertainment Europe, Rockstar Games, Codemasters and Marmalade.

city.ac.uk/ccgt

Cyber Security
MSc

Duration
Full-time: 12 months
(15 months with internship)

This MSc is aimed at graduate students and IT/ICT professionals and is intended to provide the skills needed to become cyber security professionals.

Students specialise in many aspects of cyber security, including cryptography, network security, information security management and security audit, and engage with researchers to develop their scientific knowledge and skills. Students are also offered the option to specialise in the sociotechnical aspects of security, cybercrime and digital forensics.

The course includes a cyber security challenge, which aims to provide students with tangible experience that extends across all the security-specific core modules. Featuring real-life scenarios, this cyber security challenge ensures hands-on experience in testing and analysing computing systems.

Career opportunities
Graduates move into a range of careers in the IT/ICT sector and the telecommunications and banking industries. Careers in information security are particularly popular.

Graduate roles include security analyst, cyber security manager/architect, cyber security consultant and information security officer.

Students who do well in the taught part of the course may also be considered for an internship programme, in which companies sponsor them during their research project.

city.ac.uk/ccys
Data Science MSc

Duration
Full-time: 12 months
(15 months with internship)
Part-time: 28 months

This MSc prepares students for successful careers as data scientists. One of the first degrees of its kind in the UK, it covers the intersection of computer science and statistics, machine learning and professional applications.

The course focuses on machine learning as the most exciting technology around data and our own graduates confirm this is highly valued in employment. Students also explore areas like data visualization to generate insight from data and communicate it in practice.

Students can benefit from our expertise in machine learning and the excellent facilities we offer to students studying the technical aspects of data analysis. We have a world-leading centre for data visualization, where students are exposed to the latest developments in presenting and communicating their results – a highly sought-after skill.

Career opportunities
The course prepares students for a successful career in industries from health to retail, from technology to government. Students can undertake their final project as an internship with organisations such as Google, Unilever or the Home Office.

Graduates have found employment in major domestic and international companies. Some students may pursue doctoral studies after completing the MSc.

city.ac.uk/cdas

Human-Computer Interaction Design MSc

Duration
Full-time: 12 months
(15 months with internship)
Part-time: 28 months

This MSc provides students with advanced knowledge, industry-desired skills and new perspectives on design, thoroughly preparing them for a career in user-centred design or user research.

It equips students with the latest academic research, theories and techniques in human-computer interaction (HCI), user experience (UX), usability and interaction design. It encourages students to think about design in new ways, recognising that there are many ‘right’ ways to design.

Students gain a combination of theoretical and real-world knowledge, along with the necessary skills and experience to create engaging user experiences. They study modules that cover the entire user-centred design and evaluation process, from understanding user needs, to designing interactive systems that meet those needs, to evaluating the usability of those (and existing systems) through user research.

Career opportunities
This course empowers students to succeed in UX roles in leading digital agencies, business consultancies, IT companies and government. Job titles include UX designer/consultant, user researcher, information architect and accessibility specialist.

This course is highly respected by industry, with high employability prospects. Graduate destinations have included Samsung, Tesco, Thomson Reuters and Google.

city.ac.uk/chci

Software Engineering MSc

Duration
Full-time: 12 months
(15 months with internship)
Part-time: 28 months

This industry-focused MSc is for computer science graduates and experienced professional programmers interested in developing high-quality, complex software systems.

The course develops skills in analysing system requirements and designing appropriate software solutions, as well as evaluating and using advanced software engineering environments, design methods and programming languages.

The course offers an up-to-the-minute curriculum with a robust professional core. There is a strong focus on key industrial technologies, including object-oriented programming languages (Java, C++), design patterns, service-oriented architecture, cloud computing, big data and mainstream standards.

City has one of the largest groups of academics in London specialising in research in the areas of systems and software engineering. Students are exposed to leading-edge technologies delivered by experts in their field.

Career opportunities
The MSc aims to meet the significant demand for graduates with a good knowledge of software engineering. This demand arises from consultancies, software houses, major software users such as banks, retailers and the public services, defence, aerospace and telecommunications companies.

Graduate destinations have included Ceridian, Galatea Associates, GForces, Oracle and Thomson Reuters.

city.ac.uk/swen
Internet of Things with Entrepreneurship MSc

Duration
Full-time: one year

This is a professionally oriented MSc course to prepare graduate students for a successful career in the broad Internet of Things (IoT) field. It is among the first IoT courses in the UK and unique in its emphasis on industry-linked design and training in entrepreneurship.

The course covers engineering subjects important to IoT, including electronics, sensors, communications, data analytics and security, leading up to group and individual design projects that are guided by IoT companies. The course provides top laboratory facilities and engineering expertise to support design activities.

For aspiring entrepreneurs, training in new ventures and product development is delivered by City’s world-leading Cass Business School.

Career opportunities
The course prepares students for successful careers in IoT across a range of sectors, including electronics, informatics, telecommunications and computing. Entrepreneurial students gain skills to work for one of many IoT startups or create their own. Students may be considered for competitive industry placements, subject to availability.

Project Management, Finance and Risk MSc

Duration
Full-time: one year
Part-time: two years

This MSc provides students with a foundation in quantitative risk assessment and decision-making under uncertain conditions, coupled with classical engineering economics and financial engineering.

Students unravel complex problems by applying scientific methods to real-world examples and discover how to measure risk on any scale.

From analysing indecision within games theory to rebuilding a country’s infrastructure, students explore the drivers in which businesses operate and the challenges and opportunities that project managers face.

Combining expertise from Cass Business School with specialists from industry and the banking sector, the course merges diverse and unique skill sets to solve complex problems.

The course is suited to students with a scientific or financial engineering background as the focus is on quantitative risk assessment, which requires an aptitude for problem-solving.

Career opportunities
Students are prepared for careers that encompass a range of roles in the power industry, from technical aspects to management roles. Graduates have found jobs as engineers, managers and analysts in the power sector, with companies such as Ofgem, National Grid, UK Power Networks, E.ON, EDF Energy, Vattenfall, Caterpillar and the transport sector.

Students may also wish to further their research in the energy field by undertaking a PhD.

Find out more
city.ac.uk/epmf

Renewable Energy and Power Systems Management MSc

Duration
Full-time: one year
Part-time: two years

This MSc, suitable for both practising engineers and those considering a career in engineering, has been designed to provide an in-depth insight into the technical workings, management and economics of the electrical power industry.

Due to the introduction of tough environmental laws, the use and integration of renewable energy schemes are now of paramount importance, in order for nations to meet strict low-pollution targets. Knowledge of the impact of such schemes on the existing electrical grid structure is covered in great detail.

In addition to this, modules covering power electronics, power systems protection, modelling, simulation and design are all addressed on the course, as well as economic and market factors.

The course has been developed for graduates with electrical/electronic or related engineering or scientific backgrounds to meet the increasing demand from the energy and power industry.

Career opportunities
Students are prepared for careers that encompass a range of roles in the power industry, from technical aspects to management roles. Graduates have found jobs as engineers, managers and analysts in the power sector, with companies such as Ofgem, National Grid, UK Power Networks, E.ON, EDF Energy, Vattenfall, Caterpillar and the transport sector.

Students may also wish to further their research in the energy field by undertaking a PhD.

Library and Information Science

Information Science

MSc

Duration
Full-time: one year
Part-time: two years

This course, accredited by CILIP, is designed for career progression in the information professions.

The syllabus, based on historical and philosophical principles of library and information science, takes a unique technological perspective in the management of information in the 21st century.

The combination of research-active staff, key practitioners and pioneering thinkers within the field allows students to develop the theoretical insights and real-world skills needed to gain employment and to manage and shape today’s constantly shifting information landscape.

The course benefits from City’s central London location, close to many important institutions including the British Library and Turing Institute. An optional programme of workshops widens the impact of learning and networking with the sector.

Career opportunities
The course prepares students for employment in roles such as information officer, information manager, research data manager, knowledge manager, subject librarian, library data analyst, user experience librarian, information architect, taxonomist, metadata specialist and roles within information policy. The course also prepares students for entry into doctoral research.

MA/MSc

Duration
Full-time: one year
Part-time: two years

The MA/MSc in Library Science, accredited by CILIP, is designed for career development in the library and collections professions.

The syllabus, based on the historical and philosophical principles of library and information science, takes a unique technological perspective on the management of information in the 21st century.

The combination of research-active staff, key practitioners and pioneering thinkers within the field allows students to develop the theoretical insights and real-world skills needed to gain employment and to manage and shape today’s information landscape.

The course benefits from City’s central London location, which is close to many important collections including the British Library, British Museum, Victoria and Albert Museum and the National Archives. An associated, optional programme of workshops, seminars and visits widens the impact of learning and networking within the sector.

Career opportunities
The course prepares students for employment in roles such as library assistant, senior library assistant, assistant librarian, librarian or library manager. Broader employment opportunities include roles in publishing, web design, web content provision, information organisation and architecture, analytics, teaching and user experience. The course also prepares students for entry into doctoral research.

Maritime Operations Management

Maritime Operations and Management
MSc

Duration
Full-time: one year, with the project taking approximately three months during this period
Part-time: two to three years, with the project taking approximately six months during or after this period

This MSc is designed to train professionals for various sectors and occupations within the maritime and sea transport industries. It is open to graduates who have qualified in an appropriate discipline and to those serving at sea, offshore or inland-based organisations.

The course focuses on maritime operations, management, law and technology and the related business environment. There is also an emphasis on the fields of port security and risk management, marine environmental and offshore studies, marketing and selected aspects of conceptual ship design.

It makes use of prestigious visiting speakers and takes advantage of the importance of London as an international maritime hub.

Career opportunities
Graduates have wide-ranging employment opportunities within the marine sector. These include commercial and technical roles within the worldwide marine industry and senior management roles.

Former students have taken up positions in the fields of ship and insurance broking, offshore operations, port and terminal management, shipping finance, surveying, ship superintendence, safety management and as technical and commercial managers and directors.

Maritime Operations and Management in Greece
MSc

Duration
Full-time: 18 months, with the project taking approximately five months during this period

This MSc is designed to train professionals for various sectors and occupations within the maritime and sea transport industries. It is suitable for existing professionals serving both at sea and onshore and for those seeking a career in the maritime and sea transport industries.

The course makes use of prestigious visiting speakers and takes advantage of the importance of Piraeus, Greece, as an international maritime hub, with a focus on maritime operations, management, law, technology and the related business environment. It also emphasises the fields of port security and risk management, marine environmental and offshore studies, marketing and aspects of conceptual ship design.

Students develop leadership and management skills in a wide range of maritime activities on a modular basis, at suitably spaced weekends over the duration of the course.

Career opportunities
Graduates have wide-ranging employment opportunities, including commercial and technical roles within the worldwide marine industry.

Former students have taken up positions in the fields of ship and insurance broking, offshore operations, port and terminal management, safety management, shipping finance and as technical and commercial managers and directors.

Mechanical Engineering

Advanced Mechanical Engineering
MSc

Duration
Full-time: one year
Part-time: two years

This MSc offers a blend of theory and practice to help students develop the skills and knowledge required for advanced mechanical engineers, particularly in thermo-fluids applications. This course is designed in collaboration with industry and professional bodies.

Topics covered include advanced fluid mechanics, structural mechanics, mathematical modelling in CAD, renewable and sustainable energy, gas turbine engineering, IC engines and powertrain and advanced heat transfer.

Students gain an in-depth understanding of the fundamentals and acquire professional skills and appreciation of the latest engineering developments in the energy and transport sectors.

The dissertation provides an opportunity to apply knowledge and develop a deep understanding in a specialised topic of the student’s choice. The course has been accredited regularly by the Institution of Mechanical Engineers (IMechE), on behalf of the Engineering Council, as fully meeting the academic requirement for registration as a Chartered Engineer.

Career opportunities
Graduates have wide-ranging employment opportunities, including Ford, Rolls Royce, Lotus, BP, Howden, Shell, Helix, Bühler Sortex, Transport for London, Jaguar, Delphi and Holroyd.

Energy and Environmental Technology and Economics
MSc

**Duration**

Full-time: one year  
Part-time: two years

This MSc has been designed to provide students with the knowledge to analyse and forecast the future of energy, environmental technology and economics.

Students develop knowledge and skills in cost-effective management and regulation of the rapidly changing energy sector. The course maintains strong links with industry, which provides students with an understanding of current real-world energy use problems.

By engaging with practising businesses and trade associations, students analyse a wide variety of perspectives, from regulation and government funding to behavioural psychology and emerging technologies.

The course is accredited by the Energy Institute and fulfils the learning requirement for Chartered Engineer status.

**Career opportunities**

With strong industry links, expert lecturers and a diverse range of modules on offer, the course equips graduates to become leaders and entrepreneurs in their chosen area of specialisation, whether it be energy management, supply or policymaking.

Past employment destinations of our graduates include AK Home Energy, Enelco Environmental Technology, Energy Institute, Equinore Services Ltd, Log Tech Consultancy, Ofgem, RWE Innogy and SCFG.

Research degrees

**MPhil/PhD**

**Duration**

Full-time: three years  
Part-time: five to six years

The School of Mathematics, Computer Science & Engineering has a vibrant community of research students and welcomes applications from candidates who are interested in studying for a research degree to address an exciting unsolved problem and advance their career.

The School offers the following types of research degree: PhD by Major Thesis; PhD by Prospective Publication; PhD by Prior Publication; and MPhil.

The School is home to the following Research Centres, comprising teams of academic staff with international reputations in their fields: Adaptive Computing Systems; Biomedical Engineering; Civil Engineering Structures; Compressor Technology; Fluids; giCentre (data visualization); Human-Computer Interaction Design; Information Science; Machine Learning; Mathematics; Multi-scale Geotechnical Engineering; Photonics and Instrumentation; Software Reliability; Systems and Control; Temporary Works and Construction Method Engineering.

All doctoral students are initially registered as MPhil students, except in those circumstances where a student has transferred from another institution and has provided suitable and appropriate evidence that permits direct registration as a PhD student.

A research degree provides a superb opportunity for able students to dig deep into a specialist area in order to advance knowledge for the benefit of many. It is a remarkably satisfying and rewarding venture.

Research degrees

School of Mathematics, Computer Science & Engineering
With central London as your campus and excellent support for postgraduate students, City offers everything you need.

This is an outstanding student experience

Kagowa Kuruneri (PGDip Legal Practice Course; pictured left) and Lydia Suprathivan (MSc Actuarial Management)
Eating and socialising
There is a range of places to eat and meet friends at City, including coffee shops and sandwich bars, the student refectory and the University's social venue, CityBar. During the day, CityBar is a great place to eat or relax. In the evening it becomes a vibrant social space, hosting a range of events organised by the Students’ Union and student clubs and societies.

Students’ Union
City, University of London Students’ Union (CULSU) works to improve the experience of City students by providing independent advice on academic issues, supporting student clubs and societies, organising events and ensuring that your voice is heard on key student issues.

Find out more
For information about CULSU, visit: www.culsu.co.uk

Finding a place to live
City’s Accommodation team, based in the Student Centre, can help you to find suitable accommodation in halls of residence or the private sector.

At City, we offer accommodation specifically for postgraduate students in halls of residence, contracted for the University’s use through independent housing providers. City’s postgraduate halls of residence are self-catered facilities within easy travelling distance of the main University buildings. We have some accommodation suitable for students with mobility difficulties.

Find out more
Go to: www.city.ac.uk/study/postgraduate/accommodation

Student Centre
If you are considering applying to City, have been accepted onto one of our courses or you are a current student, our award-winning Student Centre exists to answer your questions. From practical assistance with your finances, finding somewhere to live and travelling around London, to course advice, medical support and just about anything else, the Student Centre can help.

Find out more
For information or to contact us, go to: www.city.ac.uk/student-centre

CitySport
CitySport, our leading-edge sports centre, is the largest student sports facility in central London. One hundred stations of gym equipment spread over two floors, including the latest consoles with tablet-style screens, internet access and device connectivity are available at the touch of a finger. For those who prefer group exercise, there are purpose-built studios for mind and body classes, indoor studio cycling, martial arts and student team sports.

At the heart of the centre is the Saddlers Sports Hall, an elite, Olympic-standard competition space adapted to Sport England standards and able to accommodate several court sports.

With prices starting at just £26.50 per month for students, CitySport membership grants you free access to our fitness classes and state-of-the-art facilities*.

Find out more
For information and to take a virtual tour, go to: www.citysport.org.uk

To find out about competitive sport, the campus physical activity programme and how TeamCity can support you in whatever sport you are passionate about, visit: www.city.ac.uk/sport

* Does not include court hire or wellbeing and dance classes
With a diverse student population drawn from over 160 countries, our vibrant, cosmopolitan atmosphere makes City a special place to live and study.

This is international advice and support

Meet us and find out more
City’s International Office works tirelessly to attract the most able students from around the world. Every year, we visit more than 50 countries to meet people interested in coming to study in the UK. We also have an extensive worldwide network of representatives to help you with your application.

Tier 4 (General) student visa
If you have a Tier 4 (General) student visa, which was issued for study at another university, college or school in the UK, you will need to make a new Tier 4 application to the UK Home Office using a Confirmation of Acceptance for Studies from City, before you will be allowed to enrol with us.

Visa requirements
Students are responsible for obtaining any necessary visas and entry clearance into the UK, so we advise you to prepare well in advance by researching the requirements for students from your country. Information about applying for and extending visas to study is available on City’s website. A team of dedicated immigration officers can help you with your visa application process.

English language courses
As City’s courses are taught in English, you will need to provide proof that you are competent in English before admission. We run full-time courses in English during the summer to help students improve their English before their courses start. See our website for the English language requirements of specific courses.

Tuition fees
Detailed information on tuition fees will be available on our website in early 2019.

We understand that choosing a university and studying overseas is one of the biggest decisions you will make, so we offer all the advice and support you will need during your time here.
When you arrive

Studying overseas can be a daunting prospect, even for postgraduate students, so we provide a range of services designed to help you adjust to life at City. The International Students Welcome Reception at Mansion House in September is a celebration of our global community and an opportunity to get to know staff and fellow students. Our support services, media channels and student ambassadors will ensure you get the information and reassurance you need.

Living costs and accommodation

For more information on accommodation, see page 85. Remember that your tuition fee does not include the cost of accommodation, so you will need to budget for this, along with flights, food, travel, books and personal items.

Next steps

- For more information about the International Office and to find out when we might be visiting your country, visit: www.city.ac.uk/international
- Former City students are spread across the world and our network of alumni ambassadors are an invaluable source of advice. To find out more, go to: www.city.ac.uk/alumni/alumni-ambassadors
- The UK Council for International Student Affairs (UKCISA) provides information and advice for international students planning to study in the UK. Visit www.ukcisa.org.uk for more information and to find out how fee statuses are assessed in the UK.
- If you are in the UK on a student visa and wish to work during term time or holidays, City’s internal temping agency can help you find work. For more information, visit: www.unitemps.com
- EU students who register at City in 2019/20 (either as new or continuing students) will be liable for the same tuition fee as UK students for the duration of their course. Following the 2016 European Union Referendum in the UK, City has posted advice on its website for any students who might have concerns. To read the statement, visit: www.city.ac.uk/eu-statement
Postgraduate study at City is an affordable option for students from a wide range of backgrounds.

This is your studies funding

Above left to right: Dingfan Chen (MSc International Accounting and Finance), Mafruha Murphy (PGDip Legal Practice Course), Mehdi Karim (MSc Economics)
Although you will usually have to pay for postgraduate study yourself, many sources of funding exist, including scholarships, studentships and professional and career development loans. During your time at City, you can obtain financial advice and support from our award-winning Student Centre.

**Postgraduate scholarships**  
City has a wide range of scholarship opportunities available for students in all five of its Schools.  
**Find out more**  
Visit www.city.ac.uk for more information.

**Research Council studentships**  
Research Councils may be able to provide financial assistance for UK, EU and overseas postgraduate students. It is best to contact the Council relevant to your area of study directly to enquire about eligibility and application.

**Charities and trusts**  
There may be funding for postgraduate study available from charities and trusts. The British Council has a scholarship search database that you might find useful.

**US loans**  
City participates in the William D Ford Federal Direct Loan Program.  
**Find out more**  
For information, visit: www.city.ac.uk/study/postgraduate/funding-and-financial-support

**Disabled Students’ Allowances (DSAs)**  
DSAs are available to UK students who are studying a course that lasts for at least one year and leads to a master’s degree, doctorate, postgraduate diploma or postgraduate certificate and who incur additional study-related costs as a direct result of a disability, mental health condition or specific learning difficulty.  
**Find out more**  
For information about DSAs, visit: www.direct.gov.uk/studentfinance

**Professional and career development loans**  
City is listed on the Professional Career and Development Loan Register to provide loans for tuition fees and living costs for UK postgraduates.  
**Find out more**  
For information, visit: www.direct.gov.uk/pcdl

**Hardship fund**  
The City, University of London Hardship Fund provides discretionary financial assistance for students experiencing unexpected financial hardship to help them remain in higher education. The fund is administered by the Student Centre and is intended to act as a safety net for those in financial difficulty, rather than a main source of income.

**Postgraduate loans**  
A postgraduate loan is available from the government to help cover the cost of postgraduate study. Students can apply for up to £10,000 to help pay tuition fees or living expenses. The loan is non-means tested and paid directly to the student.

- To be eligible, you need to be under the age of 60, studying for your first master’s level degree and a UK national, or meet certain other criteria related to nationality.
- Nearly all subjects are eligible, provided they award a master’s degree, such as MA, MSc, MBA, LLM, MRes or MPhil.
- Loans are for a maximum of £10,000 and are paid directly to you. You are allowed to borrow the full amount, even if your course costs less. You can borrow less than £10,000.
- You are eligible to start repaying in the April after graduation, but if you start a master’s in 2019, you won’t need to begin repayments until 2022.
- Repayments are set at 6% of your earnings above £21,000 and interest will accrue at a rate of RPI+3% – generally much lower than from a commercial lender.

If you are interested in undertaking a research degree at City, you can apply for a Postgraduate Doctoral Loan for up to £25,000, divided equally across each year of the course.

You can find out more about the new postgraduate loan and other funding sources available at City by visiting: www.city.ac.uk/pg-funding
Choosing a postgraduate course at City is the beginning of your journey towards a rewarding career.

This is how to apply

Applicants for all postgraduate degrees should normally hold a university honours degree in an appropriate subject. If you don’t hold an honours degree (or an equivalent qualification) but you have suitable experience or professional qualifications, you may still be accepted for a master’s or postgraduate diploma at the discretion of the relevant department.

In addition, we recognise several pre-master’s courses, in particular those provided by the INTO Centre at City, University of London and Kaplan International College London.

How to apply

Applications for the majority of postgraduate courses need to be made directly to City, University of London. To apply, please visit the webpage of your intended course of study and click on the ‘How to Apply’ tab to read more about the application process (including any supporting documentation required) and access our online application system.

While some of our postgraduate courses have application deadlines as early as February, many do not have a fixed application deadline and operate on a rolling admission basis. Applications will close when the course is full, so you are encouraged to apply as early as possible because competition for places on many courses is extremely strong and they may be fully subscribed as offers are made upon receipt of applications.

English language requirements

If English is not your first language, you are required to take an English language test. Please refer to the individual course pages on www.city.ac.uk for more information.

All applicants that require a Tier 4 visa must meet the minimum Home Office English language ability requirements before City can issue the Certificate of Acceptance for Study (CAS) needed to apply for a Tier 4 visa.

Please note these are the minimum Home Office requirements and in addition there are course-specific English language requirements which are likely to be higher. Details can be found on the individual course pages on the website.
Postgraduate Open Evenings

At City, we offer a range of opportunities for you to visit and find out more about postgraduate study, including Open Evenings, online events and campus tours. During Postgraduate Open Evenings, you will learn more about our postgraduate courses and discover all the benefits of studying at City, University of London.

You are welcome to attend the following Postgraduate Open Evenings at City, ahead of 2019/20 entry:

• Wednesday 14th November 2018
• Wednesday 6th February 2019.

For more details, visit:
www.city.ac.uk/study/visit-us

Find out more
Further information can be found in the ‘How to Apply’ section of the webpage of your intended course of study. Entry requirements vary for each course and are listed on the individual course webpages:
www.city.ac.uk/courses
Information

A central London location
Maps, addresses and transport links

The address for City’s main campus is:

City, University of London
Northampton Square
London
EC1V 0HB
United Kingdom

CityNav

CityNav is a mobile app to help you find your way around campus, even inside buildings. Search for ‘CityNav’ on Google Play or in the App Store.

Reaching City from within London

The nearest Underground stations are Angel on the Northern line (Bank branch) and Barbican and Farringdon on the Metropolitan, Circle and Hammersmith & City lines.

Bus routes that pass close to City include the following: 4, 19, 30, 38, 43, 55, 63, 73, 153, 205, 214, 243, 274, 341, 394, 476.

Secure parking for bicycles is available on campus.

Parking in central London is limited and can be expensive. There is metered parking available on the roads surrounding Northampton Square. Please also note that almost all of City’s sites are within the congestion charging zone and drivers are liable to pay a daily charge.

Reaching City from outside London

• Coach and train terminals in London link with Underground and bus networks
• Rail services connect Gatwick and Luton airports with Farringdon station
• Eurostar trains connect to Paris and Brussels directly and the rest of continental Europe indirectly from St Pancras station
• The Heathrow Express train service connects Heathrow Airport with Paddington station
• The Docklands Light Railway (DLR) connects London City Airport with Bank station
• The Stansted Express train service connects Stansted Airport with Liverpool Street station.

To plan your journey to City, visit our website: www.city.ac.uk/visit

The Transport for London website also provides up-to-date information on public transport: www.tfl.gov.uk
