Module outline and aims

The module provides you with an introduction to international business. Those who take this elective can then broaden their international business understanding by taking the second year elective in European Studies and the third year elective European Business Seminar.

This first year elective course is designed to introduce the cross-border issues that are faced in an increasingly globalised world. The course will examine in turn the cultural, political, legal and economic environments in different parts of the world and the way in which the world business architecture is configured. Issues relating to both trade and investment will be explored and you will examine the tools available for the selection of appropriate markets in which to operate and those tools that will help to do so effectively.
