PROGRAMME SUMMARY

Aims

The aim of the masters in Library Science is to prepare students to enter a professional career in some aspect of information work, or to develop an established career in the area. This involves the development of the knowledge, skills and attitudes required for reflective professional practice, and for continuing professional development. Two important general aims are the encouragement of a positive attitude to lifelong learning, and of the appreciation of the important of links between research and practice. The specific focus of this course is the management of collections in many contexts, not just the library sector.

PG Certificate

On completing the PG Certificate in Library Science you will have an appreciation of underlying concepts and principles of the discipline, and will be able to interpret these in a practitioner context.

PG Diploma

On completing the PG Diploma in Library Science you will have extended previous knowledge and developed skills of critical enquiry and a variety of approaches to problem-solving.

Masters Degree

On completing the Masters degree you will have developed a coherent, systematic, detailed knowledge of your discipline. You will be able to develop techniques for practice drawing on research and scholarship, demonstrating your role as a reflective practitioner.

WHAT WILL I BE EXPECTED TO ACHIEVE?

On successful completion of this programme, you will be expected to be able to:

Knowledge and understanding:

- Demonstrate a detailed, critical understanding of the fundamental principles of library science, and how such principles inform the design, implementation and evaluation
of library systems and services; demonstrate a critical awareness of current problems, issues and solutions in the operations of library and information services; on this basis make sound professional judgements in the complex and rapidly changing environment of modern library and information services.

- Critically evaluate how library systems and services contribute to organisational objectives and the needs of users; be able to use such an understanding to develop policies and strategies for improved information provision.

- Demonstrate a critical understanding of the needs of information users in a variety of environments and more detailed insights into the needs of a specific professional user community; have developed relevant skills of user needs analysis, and resource evaluation.

Skills:

- Demonstrate a broad appreciation of the roles of various types of libraries, their place in society, and the legal, ethical and policy-related issues which influence them; on this basis, make sound professional judgements in the complex and rapidly changing environment of the modern library/information service.

- Demonstrate professional attitudes and skills sufficient to constantly assess the need for, and to plan and carry out without direction, original research and evaluation projects in an operational setting: including devising hypotheses and research questions, and selecting, justifying and implementing appropriate research methodologies.

- Be critically aware of relevant information technologies and their application to library and information service delivery; understand and evaluate the significance of new trends and developments in technology.

- Demonstrate highly developed skills in information organisation and retrieval.

- Demonstrate highly developed skills in the analysis, evaluation, presentation and communication of information.

- Have a critical awareness of resources, and be able to apply collection management to a variety of relevant circumstances.

- Critically appreciate the importance of research and evaluation in the practice of all information work; be able to evaluate critically academic and practitioner research, and assess its significance for their own professional practice; be able to bridge the conceptual gap between academic research and professional practice, effectively linking the two.

Values and attitudes:

- Demonstrate highly developed qualities of critical reflection and openness to different viewpoints, so that they may continue to develop their professional perspectives, and improve their own practice, as well as influencing others similarly.

- Demonstrate positive attitudes to lifelong learning and continuing professional
development, and independent learning skills of a very high level, so that they may continue to develop their knowledge and understanding of professional issues, and their skills of professional practice.

HOW WILL I LEARN?

Students will attend lectures, and participate actively in seminars, tutorials and practical sessions. Opportunities are provided for students to broaden their professional knowledge during the programme through teaching experiences offered by visiting lecturers, usually eminent practitioners in their field, and through visits to organisations in the London area. Modes of study are flexible, being offered on both a full- and part-time basis, and the students’ traditional face-to-face experience is enriched by the provision of an e-learning system. We encourage a community of students who are able to exchange thoughts, develop ideas and learn from one another. Assessment is by individual or group coursework assignments, which aim to develop student self-reliance and autonomy and foster the capacity for lifelong continuing self-development and learning.

The dissertation is a substantial component of the degree offering students the opportunity to demonstrate comprehensive understanding of a particular specialism and a systematic and professional approach to research. It is a substantive task that requires students to investigate a relevant chosen area under the supervision of academic staff.

WHAT TYPES OF ASSESSMENT AND FEEDBACK CAN I EXPECT?

Assessment and Assessment Criteria

Assessment is within each module, including the dissertation. Assessment methods vary according to the nature of the material. Individual written assignments and exercises are the norm, but some modules may use other methods, including individual practical exercises, group work projects and unseen examination papers. Most assessments have an element of choice, allowing students to focus on aspects of interest to them.

Assessment Criteria are descriptions, based on the intended learning outcomes, of the skills, knowledge or attitudes that you need to demonstrate in order to complete an assessment successfully, providing a mechanism by which the quality of an assessment can be measured. Grade-Related Criteria are descriptions of the level of skills, knowledge or attributes that you need to demonstrate in order achieve a certain grade or mark in an assessment, providing a mechanism by which the quality of an assessment can be measured and placed within the overall set of marks. Assessment Criteria and Grade-Related Criteria will be made available to you to support you in completing assessments. These may be provided in programme handbooks, module specifications, on the virtual learning environment or attached to a specific assessment task.

Feedback on assessment
Feedback will be provided in line with our Assessment and Feedback Policy. In particular, you will normally be provided with feedback within three weeks of the submission deadline or assessment date. This would normally include a provisional grade or mark. For end of module examinations or an equivalent significant task (e.g. an end of module project), feedback will normally be provided within four weeks. The timescale for feedback on final year projects or dissertations may be longer. The full policy can be found at: [https://www.city.ac.uk/__data/assets/pdf_file/0008/68921/assessment_and_feedback_policy.pdf](https://www.city.ac.uk/__data/assets/pdf_file/0008/68921/assessment_and_feedback_policy.pdf)

Assessment Regulations

In order to pass your Programme, you should complete successfully or be exempted from the relevant modules and assessments and will therefore acquire the required number of credits.

The pass mark for each module is 50%.

If you fail an assessment component or a module, the following will apply:

1. Compensation: where you fail up to a total of 20 credits at first or resit attempt (15 for a Postgraduate Certificate), you may be allowed compensation if:
   - Compensation is permitted for the module involved (see the What will I Study section of the programme specification), and
   - It can be demonstrated that you have satisfied all the Learning Outcomes of the modules in the Programme, and
   - A minimum overall mark of no more than 10% below the module pass mark has been achieved in the module to be compensated, and
   - An aggregate mark of 50% has been achieved overall.

   Where you are eligible for compensation at the first attempt, this will be applied in the first instance rather than offering a resit opportunity.

   If you receive a compensated pass in a module you will be awarded the credit for that module. The original component marks will be retained in the record of marks and your original module mark will be used for the purpose of your Award calculation.

2. Resit: Where you are not eligible for compensation at the first attempt, you will be offered one resit attempt.

   If you are successful in the resit, you will be awarded the credit for that module. The mark for each assessment component that is subject to a resit will be capped at the pass for the module. This capped mark will be used in the calculation of the final module mark together with the original marks for the components that you passed at first attempt.

   If you do not meet the pass requirements for a module and do not complete your resit by the date specified you will not progress and the Assessment Board will require that you be withdrawn from the Programme.
If you fail to meet the requirements for the Programme, the Assessment Board will consider whether you are eligible for an Exit Award, as per the table below.

If you would like to know more about the way in which assessment works at City, please see the full version of the Assessment Regulations at: http://www.city.ac.uk/__data/assets/word_doc/0003/69249/s19.doc

### WHAT WILL I STUDY?

#### Taught component

Seven core modules plus one elective module; this is followed by the dissertation component. The taught component is taken in one of two standard length patterns: full-time (one year) and part-time (two years).

All modules within the programme are taught at Masters level.

All students enrol on an MSc. Students who wish to withdraw before completion of the MSc, or are required to withdraw by the Assessment Board having failed to meet the requirements to progress, may be eligible for lower awards. Students may opt for the
award of an MA, instead of an MSc.

Dissertation component

A dissertation project of 60 credits is required for the Masters award.

Students may opt, if they wish, to take the dissertation in the alternative mode to their taught course, i.e. a part-time student may opt to do the dissertation project full-time, and vice versa.

You are normally required to pass all taught modules before progressing to the dissertation.
## TO WHAT KIND OF CAREER MIGHT I GO ON?

Students go on to a wide variety of library/information careers, in schools, colleges, universities, research institutes, voluntary sector, public sector and government, and commerce and industry.

If you would like more information on the Careers support available at City, please go to: [http://www.city.ac.uk/careers/for-students-and-recent-graduates](http://www.city.ac.uk/careers/for-students-and-recent-graduates).

## WHAT STUDY ABROAD OPTIONS ARE AVAILABLE?

There is the possibility of undertaking independent study, or the dissertation project, abroad.

## WHAT PLACEMENT OPPORTUNITIES ARE AVAILABLE?

Placements do not form a part of the course, but there are always opportunities for students to obtain volunteer or paid positions to enhance their experience.

## WILL I GET ANY PROFESSIONAL RECOGNITION?

**Accrediting Body:** Chartered Institute of Library & Information Professionals

**Nature of Accreditation**

Accredited.

## HOW DO I ENTER THE PROGRAMME?

- Each application is considered on its merits and is given full consideration by admissions staff.

- The usual minimum entrance requirement is a good second class honours degree from a UK university, a recognised equivalent from an accredited overseas institution or an equivalent professional qualification.

- Applicants should have good professional English in order to understand and produce literature of a complex technical nature; current requirements are shown on the course web pages.

- So as to ensure that students are properly prepared for study, and so as to maximise the benefit gained from the course, admissions staff will also take close account of the areas and nature of previous academic and other achievements.
