

Sustainable Travel Statement

City, University of London is committed to reducing environmental impacts and carbon emissions caused by all transport-related activities and to promoting healthier and more sustainable travel options for staff and students.

Key Principles

The University aims to:

1. Implement a Travel Plan and supporting Action Plan to demonstrate a commitment to sustainable travel.
2. Reduce the need for travel by encouraging virtual communications and other flexible working arrangements and providing staff and students with the necessary tools.
3. Promote the health, environmental and financial benefits of more sustainable travel to our stakeholders and encourage sustainable travel choices.
4. Continually enhance existing sustainable travel initiatives.
5. Comply with all legal and applicable national, regional and local travel requirements.
6. Collaborate with local and regional transport providers, businesses and communities to minimise the negative environmental impact of travel.
7. Develop procurement policies and procedures to encourage contractors and suppliers to meet the key principles of this statement.
8. Continually monitor, review and publish performance in relation to targets and objectives and take appropriate steps to meet them.

The Property and Facilities department will be responsible for planning, management and reporting on the implementation of this statement. This statement will be reviewed every three years and published on the University's website.
